open it up. This is a single notebook.
open it up. This is a single notebook. Up here at the top, we have the title of
Up here at the top, we have the title of

Up here at the top, we have the title of the notebook. And here is a brief description of it. This is a notebook all about how to start a garden in Colorado. Each notebook is broken up into three columns. The column on the left are all of the sources. This is what makes up the knowledge base for the notebook. What makes Gemini notebook so unique is that all of the AI knowledge that is used when you are chatting with the notebook or creating things with the notebook are grounded in the sources that you provide. Here are all the sources for this notebook. So what that means is as I use the AI, it only pulls in information from these sources and from nowhere else. That's what grounded means. So this is really helpful for situations where you want an AI to only know certain information. As for the sources themselves, these can be websites, YouTube videos, anything from Google Drive, or you can even paste in some text. Over here in the middle column, we have the AI chat. This is

column, we have the AI chat. This is where you can ask the AI questions about where you can ask the AI questions about where you can ask the AI questions about the information in these sources. If you the information in these sources. If you ever use chat GBT or Gemini, it's very ever use chat GBT or Gemini, it's very similar, but instead of pulling similar, but instead of pulling information from its own training or information from its own training or from the web, it's only using the from the web, it's only using the information from the sources that you information from the sources that you provided. And then over here on the provided. And then over here on the right is studio. This is where you can right is studio. This is where you can create things with Gemini notebook. For create things with Gemini notebook. For instance, you can create audio instance, you can create audio overviews, slide decks, video overviews, overviews, slide decks, video overviews, reports, flashcards, infographics, and reports, flashcards, infographics, and data tables. Let me show you what some data tables. Let me show you what some of those look like. So, right here we of those look like. So, right here we have an infographic that was created. It have an infographic that was created. It pulled in the information from those pulled in the information from those sources and created for us an sources and created for us an infographic based on that information. infographic based on that information. Here is a slide deck. It goes through Here is a slide deck. It goes through how to start gardening in Colorado. And how to start gardening in Colorado. And here's an example of one of the videos here's an example of one of the videos you can make with Gemini Notebook. you can make with Gemini Notebook. >> These conditions you can yield massive >> These conditions you can yield massive healthy tomato plants. Survival here healthy tomato plants. Survival here

healthy tomato plants. Survival here relies on building.
relies on building.
relies on building. >> So there's a lot you can do with Gemini
>> So there's a lot you can do with Gemini
>> So there's a lot you can do with Gemini Notebook. But before you feel
Notebook. But before you feel
Notebook. But before you feel overwhelmed, let's start easy. I'll
overwhelmed, let's start easy. I'll
overwhelmed, let's start easy. I'll click on the top left here to return
click on the top left here to return
click on the top left here to return back to my dashboard and let's start a
back to my dashboard and let's start a
back to my dashboard and let's start a new notebook together. To do that, you
new notebook together. To do that, you
new notebook together. To do that, you want to click right here where it says
want to click right here where it says
want to click right here where it says create new notebook. Each notebook is
create new notebook. Each notebook is
create new notebook. Each notebook is basically its own separate workspace for
basically its own separate workspace for
basically its own separate workspace for one topic or project. And the first
one topic or project. And the first
one topic or project. And the first thing it'll ask you to do when you
thing it'll ask you to do when you
thing it'll ask you to do when you create a notebook is to add in the
create a notebook is to add in the
create a notebook is to add in the sources. These are simply the
sources. These are simply the
sources. These are simply the information you want the notebook to use
information you want the notebook to use
information you want the notebook to use as its source of truth. And there's a
as its source of truth. And there's a
as its source of truth. And there's a lot of options for what you choose as a
lot of options for what you choose as a
lot of options for what you choose as a source. You can upload files, add links
source. You can upload files, add links
source. You can upload files, add links to websites or YouTube videos, add
to websites or YouTube videos, add
to websites or YouTube videos, add things for Drive, or even paste in text.
things for Drive, or even paste in text.
things for Drive, or even paste in text. Here, for instance, I have an article on
Here, for instance, I have an article on
Here, for instance, I have an article on this website that's all about how to
this website that's all about how to
this website that's all about how to garden in Colorado. So, I'm going to
garden in Colorado. So, I'm going to
garden in Colorado. So, I'm going to grab this. All you have to do is copy
grab this. All you have to do is copy
grab this. All you have to do is copy down the URL, come over to Gemini
down the URL, come over to Gemini

down the URL, come over to Gemini Notebook, and click on this button right Notebook, and click on this button right Notebook, and click on this button right here that says websites, and you can here that says websites, and you can here that says websites, and you can paste in that link. And as long as you paste in that link. And as long as you paste in that link. And as long as you separate it with a space, you can add separate it with a space, you can add separate it with a space, you can add some more. So, for instance, right here, some more. So, for instance, right here, some more. So, for instance, right here, there are some YouTube videos I want to there are some YouTube videos I want to there are some YouTube videos I want to add. I will right click on these uh add. I will right click on these uh these dots and click on share to get a these dots and click on share to get a these dots and click on share to get a link to this YouTube video. And then I link to this YouTube video. And then I link to this YouTube video. And then I can paste that one in there. So, that's can paste that one in there. So, that's can paste that one in there. So, that's my second source. Let's add another my second source. Let's add another my second source. Let's add another YouTube video. I will copy down this YouTube video. I will copy down this YouTube video. I will copy down this link and paste that one in. And you can link and paste that one in. And you can link and paste that one in. And you can do this with several other websites as do this with several other websites as do this with several other websites as well. We'll just use these three. And well. We'll just use these three. And well. We'll just use these three. And then I'll click on insert. And you'll then I'll click on insert. And you'll then I'll click on insert. And you'll notice that over here on the left, those notice that over here on the left, those notice that over here on the left, those are now being loaded in. Now, you can are now being loaded in. Now, you can are now being loaded in. Now, you can always add more sources after that always add more sources after that initial setup by clicking right here initial setup by clicking right here where it says add sources. And this where it says add sources. And this where it says add sources. And this time, I'm going to upload a file cuz I time, I'm going to upload a file cuz I time, I'm going to upload a file cuz I have one on my computer that's all about have one on my computer that's all about have one on my computer that's all about local vegetables. There it is. So, I local vegetables. There it is. So, I local vegetables. There it is. So, I will select that one. Click on open. And will select that one. Click on open. And

will select that one. Click on open. And now you'll see that one's being added.
now you'll see that one's being added.
now you'll see that one's being added. Now, if you're completely at a loss as
Now, if you're completely at a loss as
Now, if you're completely at a loss as to where to start because you don't have
to where to start because you don't have
to where to start because you don't have any sources, then that is when you want
any sources, then that is when you want
any sources, then that is when you want to use the research tool. So, right here
to use the research tool. So, right here
to use the research tool. So, right here on the left, you'll see that there's an
on the left, you'll see that there's an
on the left, you'll see that there's an option to either do fast research or
option to either do fast research or
option to either do fast research or deep research. And this can find
deep research. And this can find
deep research. And this can find information and sources from the web to
information and sources from the web to
information and sources from the web to bring them into the notebook as sources.
bring them into the notebook as sources.
bring them into the notebook as sources. I will use fast research for this one.
I will use fast research for this one.
I will use fast research for this one. And I will type in here what I'm going
And I will type in here what I'm going
And I will type in here what I'm going to use this notebook for, what the topic
to use this notebook for, what the topic
to use this notebook for, what the topic of the notebook is, which is gardening
of the notebook is, which is gardening
of the notebook is, which is gardening in Colorado. And if I click on search
in Colorado. And if I click on search
in Colorado. And if I click on search there, you can see that it found these
there, you can see that it found these
there, you can see that it found these websites. Now, if you click right here
websites. Now, if you click right here
websites. Now, if you click right here where it says seven more sources, it's
where it says seven more sources, it's
where it says seven more sources, it's going to be different depending on how
going to be different depending on how
going to be different depending on how many sources it found for you. You can
many sources it found for you. You can
many sources it found for you. You can see the names of all the websites, and
see the names of all the websites, and
see the names of all the websites, and you can actually click on them to open
you can actually click on them to open
you can actually click on them to open them to see if they are sources that you
them to see if they are sources that you
them to see if they are sources that you want to use. here. Actually, I already
want to use. here. Actually, I already
want to use. here. Actually, I already had one of those in there,
had one of those in there,

had one of those in there, coincidentally, but this one's new, and
coincidentally, but this one's new, and
coincidentally, but this one's new, and this one's new. And as long as you're
this one's new. And as long as you're
this one's new. And as long as you're happy with them, you can check off the
happy with them, you can check off the
happy with them, you can check off the ones you want to bring in as sources,
ones you want to bring in as sources,
ones you want to bring in as sources, and then click on import. And you'll see
and then click on import. And you'll see
and then click on import. And you'll see all of those are now being added here on
all of those are now being added here on
all of those are now being added here on the left. It is important that you're
the left. It is important that you're
the left. It is important that you're careful about what sources you add to
careful about what sources you add to
careful about what sources you add to your notebooks because the notebooks are
your notebooks because the notebooks are
your notebooks because the notebooks are grounded in that information. So, only
grounded in that information. So, only
grounded in that information. So, only use reputable websites and websites that
use reputable websites and websites that
use reputable websites and websites that you trust. over here. Now you see all of
you trust. over here. Now you see all of
you trust. over here. Now you see all of them are added but two of them are
them are added but two of them are
them are added but two of them are highlighted in red and that's because
highlighted in red and that's because
highlighted in red and that's because Gemini Notebook can't use every website
Gemini Notebook can't use every website
Gemini Notebook can't use every website as a source. Some are behind a payw wall
as a source. Some are behind a payw wall
as a source. Some are behind a payw wall or there's other reasons they can't be
or there's other reasons they can't be
or there's other reasons they can't be added. Whenever that happens, instead of
added. Whenever that happens, instead of
added. Whenever that happens, instead of trying to fight it, usually the best
trying to fight it, usually the best
trying to fight it, usually the best thing to do is just to click on more
thing to do is just to click on more
thing to do is just to click on more here and click on remove all failed
here and click on remove all failed
here and click on remove all failed sources. that will then delete all the
sources. that will then delete all the
sources. that will then delete all the sources that weren't able to be uploaded
sources that weren't able to be uploaded
sources that weren't able to be uploaded and only keep the ones that actually
and only keep the ones that actually
and only keep the ones that actually worked. As time goes on, your list of
worked. As time goes on, your list of

worked. As time goes on, your list of sources is going to grow and grow and sources is going to grow and grow and sources is going to grow and grow and it can at times become a little grow and it can at times become a little grow and it can at times become a little bit unwieldly and that's when you want bit unwieldly and that's when you want to use the auto label feature. You can to use the auto label feature. You can find that right here. And if you click find that right here. And if you click find that right here. And if you click on this, that will use AI to on this, that will use AI to automatically group your sources automatically group your sources together. So you can see right here we together. So you can see right here we together. So you can see right here we have a section now for fruit have a section now for fruit cultivation, a section for general cultivation, a section for general gardening, and a section for soil and gardening, and a section for soil and pests. And do note that one source can pests. And do note that one source can be inside multiple of these labels if be inside multiple of these labels if multiple labels apply to the same multiple labels apply to the same source. But this is a nice way just to source. But this is a nice way just to keep it all nice and organized. If you keep it all nice and organized. If you need to make any changes, you can open need to make any changes, you can open up the label, click on these three dots, up the label, click on these three dots, and either remove the source entirely and either remove the source entirely from your notebook, rename it, or give from your notebook, rename it, or give it a different label. With our sources it a different label. With our sources now dialed in, let's look at what was now dialed in, let's look at what was automatically set up for us. Up here at automatically set up for us. Up here at the top, you'll notice that it the top, you'll notice that it automatically created a title for this automatically created a title for this

automatically created a title for this notebook. Here's a name, Cultivating notebook. Here's a name, Cultivating notebook. Here's a name, Cultivating Success: A Guide to Colorado Vegetable Success: A Guide to Colorado Vegetable Success: A Guide to Colorado Vegetable Gardening. I think that title is okay. Gardening. I think that title is okay. Gardening. I think that title is okay. Certainly clever, but I don't think it's Certainly clever, but I don't think it's Certainly clever, but I don't think it's that great for when I'm quickly glancing that great for when I'm quickly glancing that great for when I'm quickly glancing at the dashboard and want to easily find at the dashboard and want to easily find at the dashboard and want to easily find this notebook. So, I'm going to rename this notebook. So, I'm going to rename it. You can easily do that just by it. You can easily do that just by it. You can easily do that just by highlighting the text up here and typing highlighting the text up here and typing highlighting the text up here and typing in a new name. So, I will call this one in a new name. So, I will call this one vegetable gardening in Colorado. And it vegetable gardening in Colorado. And it vegetable gardening in Colorado. And it also updates the title here as well. also updates the title here as well. Under that, we have a summary of the Under that, we have a summary of the Under that, we have a summary of the information in this notebook. To information in this notebook. To customize any of this, you can click on customize any of this, you can click on this button right here that says this button right here that says this button right here that says customize. This is another spot where customize. This is another spot where you can change the title. And you can you can change the title. And you can also set a custom notebook summary that also set a custom notebook summary that will replace this summary right here. will replace this summary right here. So, if we click again on customize, I So, if we click again on customize, I So, if we click again on customize, I can toggle that on and just say can toggle that on and just say something simple like this notebook is something simple like this notebook is all about how to create a vegetable all about how to create a vegetable garden in Colorado. And if I click on

garden in Colorado. And if I click on done, you'll see that the summary here done, you'll see that the summary here done, you'll see that the summary here has now been updated to that much has now been updated to that much has now been updated to that much shorter summary. Opening customize back shorter summary. Opening customize back up, you'll see up here is a place where up, you'll see up here is a place where you can upload an image. If we return you can upload an image. If we return you can upload an image. If we return back to my notebook dashboard, you'll back to my notebook dashboard, you'll back to my notebook dashboard, you'll see the notebook right here that we just see the notebook right here that we just started. And this is the one that I started. And this is the one that I started. And this is the one that I showed you earlier. And if you'll showed you earlier. And if you'll showed you earlier. And if you'll notice, there's a nice image here, so notice, there's a nice image here, so notice, there's a nice image here, so it's easier to find. So, if you want to it's easier to find. So, if you want to create a background image like that, you create a background image like that, you create a background image like that, you can do that inside the customize can do that inside the customize section. What I usually do is go over to section. What I usually do is go over to Gemini and ask it to create an image for Gemini and ask it to create an image for me. I then download that image by me. I then download that image by clicking right here. And then returning clicking right here. And then returning back to Gemini notebook, I can click on back to Gemini notebook, I can click on upload and select that image. There we upload and select that image. There we go. Now, clicking on done, you'll see go. Now, clicking on done, you'll see that image back here. And it makes it a that image back here. And it makes it a lot nicer, especially on the dashboard. lot nicer, especially on the dashboard. It makes it easier to find this notebook It makes it easier to find this notebook in the future. in the future. Let's go back into it though. I think we Let's go back into it though. I think we

Let's go back into it though. I think we are done setting up the notebook and we are done setting up the notebook and we are done setting up the notebook and we can start using it. The two sections for can start using it. The two sections for can start using it. The two sections for using the notebook are the middle column using the notebook are the middle column using the notebook are the middle column and the column on the right. We'll start and the column on the right. We'll start with the middle one. This is the chat. with the middle one. This is the chat. This is where you can chat with the AI This is where you can chat with the AI that has access to all of the knowledge that has access to all of the knowledge you have in your sources. So it's very you have in your sources. So it's very similar to using Gemini directly except similar to using Gemini directly except it is locked in and only using these it is locked in and only using these sources as its knowledge base. So here sources as its knowledge base. So here for instance I can ask it a simple for instance I can ask it a simple question like what are the best type of question like what are the best type of vegetables to grow in Colorado for vegetables to grow in Colorado for beginners? beginners? And then here is the answer. It says, And then here is the answer. It says, "Colorado's sunshine makes it fantastic "Colorado's sunshine makes it fantastic for gardening, but the climate can be for gardening, but the climate can be quite dry, which creates some quite dry, which creates some difficulties. So, in the warm seasons, difficulties. So, in the warm seasons, you want to grow tomatoes and peppers, you want to grow tomatoes and peppers, and in the cooler seasons, you can grow and in the cooler seasons, you can grow radishes, lettuce, beets, peas, and radishes, lettuce, beets, peas, and cabbage." And it gives some beginner cabbage." And it gives some beginner tips. Of course, you can then ask some

tips. Of course, you can then ask some follow questions. So, okay, let's say I follow questions. So, okay, let's say I follow questions. So, okay, let's say I only want to grow one to get started. only want to grow one to get started. only want to grow one to get started. Which would be the easiest? And here you Which would be the easiest? And here you Which would be the easiest? And here you can see it gave me a new response and can see it gave me a new response and can see it gave me a new response and narrowed down the list for me to narrowed down the list for me to narrowed down the list for me to radishes and tells me why radishes are radishes and tells me why radishes are radishes and tells me why radishes are one of the easiest to grow. If at any one of the easiest to grow. If at any one of the easiest to grow. If at any point you're stuck and you're not quite point you're stuck and you're not quite point you're stuck and you're not quite sure what to ask, Gemini Notebook always sure what to ask, Gemini Notebook always sure what to ask, Gemini Notebook always gives you suggestions right here as for gives you suggestions right here as for gives you suggestions right here as for prompts you can start with or prompts prompts you can start with or prompts prompts you can start with or prompts you can follow up with. And you can you can follow up with. And you can you can follow up with. And you can click on any of these and it will click on any of these and it will click on any of these and it will automatically send it. As you're working automatically send it. As you're working automatically send it. As you're working inside chat, what I want you to notice inside chat, what I want you to notice inside chat, what I want you to notice is right here, it tells you how many is right here, it tells you how many is right here, it tells you how many sources are being used to answer your sources are being used to answer your sources are being used to answer your query. And you can change this by coming query. And you can change this by coming query. And you can change this by coming over to the sources here on the left and over to the sources here on the left and over to the sources here on the left and unselecting any sources that you don't unselecting any sources that you don't unselecting any sources that you don't want the chat to use when answering your want the chat to use when answering your want the chat to use when answering your question. So let's say for instance I'm question. So let's say for instance I'm question. So let's say for instance I'm looking at all of these sources and I looking at all of these sources and I looking at all of these sources and I start asking some questions and I decide start asking some questions and I decide start asking some questions and I decide that I just want to use one of these as that I just want to use one of these as

that I just want to use one of these as the source of truth for this notebook at the source of truth for this notebook at the source of truth for this notebook at least temporarily. What I can do is least temporarily. What I can do is click on this button which will unselect click on this button which will unselect all of the sources and then I'll select all of the sources and then I'll select this one YouTube video that I want to this one YouTube video that I want to use as my source of truth. Coming over use as my source of truth. Coming over here to the chat now, you'll see there's here to the chat now, you'll see there's only one source listed. So, if I ask a only one source listed. So, if I ask a question now, it's not going to use all question now, it's not going to use all of these sources. It's just going to use of these sources. It's just going to use that single one. And of course, you can that single one. And of course, you can do that with as many or as few sources do that with as many or as few sources as you want. To further refine the as you want. To further refine the responses you get from the chat, you can responses you get from the chat, you can come to the top of the chat and click on come to the top of the chat and click on this button right here that has these this button right here that has these three lines and you can configure the three lines and you can configure the chat. So, first you can define the chat. So, first you can define the conversational goal, style, or role. You conversational goal, style, or role. You can have the default one, which is best can have the default one, which is best for general purpose research and for general purpose research and brainstorming tasks. Or if you're using brainstorming tasks. Or if you're using this notebook to learn about something, this notebook to learn about something, you can turn on learning guide, or you you can turn on learning guide, or you can give it custom instructions. I can give it custom instructions. I

can give it custom instructions. I usually leave it on default most of the time. You can also choose your response time. You can also choose your response length. You can keep it at default, longer, or shorter. And honestly, when I remember to do it, I usually switch it over to shorter because I find that Gemini Notebook tends to give longer responses than I need. So, I will select shorter and click on save. There is more you can do with chat and we will return to it in a few moments. But I first want to show you what you can do inside of Studio over here on the right. Before we get to that though, I have a quick favor to ask you. I release all of my AI courses for free on YouTube because I don't think that learning how to use AI should be locked behind a payw wall. If you appreciate that, all I ask is that you give this video a thumbs up and let me know that you appreciate it in the comment section down below. I still read and respond to every single comment myself and it's what motivates me to keep making this content. If you leave a

Now, let's talk about Studio. Studio is
Now, let's talk about Studio. Studio is my favorite part of Gemini Notebook and
my favorite part of Gemini Notebook and
my favorite part of Gemini Notebook and is arguably the most fun part about
is arguably the most fun part about
is arguably the most fun part about Gemini Notebook. You can use this to
Gemini Notebook. You can use this to
Gemini Notebook. You can use this to generate these different kinds of
generate these different kinds of
generate these different kinds of assets. There are currently nine of them
assets. There are currently nine of them
assets. There are currently nine of them and there may be more by the time you're
and there may be more by the time you're
and there may be more by the time you're watching this video. We have audio
watching this video. We have audio
watching this video. We have audio overviews, which are essentially audio
overviews, which are essentially audio
overviews, which are essentially audio files of podcasts that were generated
files of podcasts that were generated
files of podcasts that were generated with AI. We have slide decks which are
with AI. We have slide decks which are
with AI. We have slide decks which are like powerpoints, video overviews, mind
like powerpoints, video overviews, mind
like powerpoints, video overviews, mind maps, reports, flashcards, quizzes,
maps, reports, flashcards, quizzes,
maps, reports, flashcards, quizzes, infographics, and data tables. So, let
infographics, and data tables. So, let
infographics, and data tables. So, let me first show you audio overview. To
me first show you audio overview. To
me first show you audio overview. To create any of these assets, all you have
create any of these assets, all you have
create any of these assets, all you have to do is click on the card and that will
to do is click on the card and that will
to do is click on the card and that will open up the customize menu. For the
open up the customize menu. For the
open up the customize menu. For the audio overviews, there are four
audio overviews, there are four
audio overviews, there are four different formats. The first is a deep
different formats. The first is a deep
different formats. The first is a deep dive, which is a lively conversation
dive, which is a lively conversation
dive, which is a lively conversation between two different hosts. The second
between two different hosts. The second
between two different hosts. The second is called brief and that's a shorter
is called brief and that's a shorter
is called brief and that's a shorter overview about the concept and the core
overview about the concept and the core

overview about the concept and the core ideas of your notebook. Then we have ideas of your notebook. Then we have ideas of your notebook. Then we have critique where an expert reviews the critique where an expert reviews the critique where an expert reviews the sources and offers constructive sources and offers constructive feedback. And then we have debate where feedback. And then we have debate where the two different hosts will talk the two different hosts will talk against each other and have a debate against each other and have a debate about a topic concerning your notebook. about a topic concerning your notebook. We're just going to stick with deep dive We're just going to stick with deep dive for this one. You can then choose the for this one. You can then choose the language and the length, short, default language and the length, short, default or long. And then you can choose which or long. And then you can choose which sources you want to be used in the sources you want to be used in the creation process for this asset, which creation process for this asset, which in this case is the audio overview. So in this case is the audio overview. So you can select all of them or you can you can select all of them or you can just select some of them. And then just select some of them. And then finally, you can tell the AI hosts what finally, you can tell the AI hosts what to focus on in this episode. You can to focus on in this episode. You can either leave this blank and just leave either leave this blank and just leave it up to the AI or you can type in a it up to the AI or you can type in a response or use one of these response or use one of these suggestions. So, I will select this one suggestions. So, I will select this one that says planning the layout for the that says planning the layout for the garden. Once you have everything garden. Once you have everything selected, you can click on generate. And selected, you can click on generate. And

selected, you can click on generate. And then you'll see right here that it's then you'll see right here that it's then you'll see right here that it's starting that generation. Some of these starting that generation. Some of these assets like the audio overviews and the assets like the audio overviews and the video overviews do take a little bit longer to generate. So, you have to be a little bit patient. So while we're waiting for that, we will move on and generate a slide deck. I'll click on generate a slide deck. I'll click on slide deck here and that will open up slide deck here and that will open up the customize slide deck menu. There are the customize slide deck menu. There are two formats here. A detail deck and a presenter deck. To give you an idea of the difference, let me come back to the other notebook I had started before. And right here, this is a detailed deck. So it has all of the information in it. You see there's a lot of images, but there's also a lot of text in here as well. This is really nice when you just need to send it to someone because it stands on its own. You don't need someone talking and like giving a presentation here. All the information is in the slides. But if we look at a presenter deck, which is what we have right here, this one's a

what we have right here, this one's a lot more sparse. You need someone who's lot more sparse. You need someone who's lot more sparse. You need someone who's actually explaining what's going on. and actually explaining what's going on. and actually explaining what's going on. and there's information that's intentionally there's information that's intentionally there's information that's intentionally left out so that the presenter can talk left out so that the presenter can talk left out so that the presenter can talk about the information while using this about the information while using this about the information while using this as a presentation. So that's really the as a presentation. So that's really the as a presentation. So that's really the difference between a detailed deck and difference between a detailed deck and difference between a detailed deck and presenter slide. So use whichever one presenter slide. So use whichever one presenter slide. So use whichever one that you want. Again, you'll see the that you want. Again, you'll see the that you want. Again, you'll see the same choice for different lengths, same choice for different lengths, same choice for different lengths, short, default or long. And then short, default or long. And then short, default or long. And then sources. I should also spend this moment sources. I should also spend this moment sources. I should also spend this moment to clarify one point. There are going to to clarify one point. There are going to to clarify one point. There are going to be some features that I have in my be some features that I have in my be some features that I have in my Gemini Notebook account that you're not Gemini Notebook account that you're not Gemini Notebook account that you're not going to have, and that depends on the going to have, and that depends on the going to have, and that depends on the pricing plan. You can use Gemini pricing plan. You can use Gemini pricing plan. You can use Gemini Notebook completely for free, but some Notebook completely for free, but some Notebook completely for free, but some capabilities will only be unlocked with capabilities will only be unlocked with capabilities will only be unlocked with a paid subscription. So, you may not see a paid subscription. So, you may not see a paid subscription. So, you may not see these unless you have a pro or even an these unless you have a pro or even an these unless you have a pro or even an Ultra subscription. Just keep that in Ultra subscription. Just keep that in Ultra subscription. Just keep that in mind. Once again, you can select how mind. Once again, you can select how mind. Once again, you can select how many sources and which sources you want many sources and which sources you want many sources and which sources you want to use or Oops, accidentally closed it. to use or Oops, accidentally closed it.

to use or Oops, accidentally closed it. Let me open it back up. And you can, of
Let me open it back up. And you can, of
Let me open it back up. And you can, of course, describe what you want the slide
course, describe what you want the slide
course, describe what you want the slide deck to be about. So, in this case, I
deck to be about. So, in this case, I
deck to be about. So, in this case, I might say all of the vegetables that
might say all of the vegetables that
might say all of the vegetables that thrive in Colorado.
thrive in Colorado.
thrive in Colorado. And then I'll click on generate for that
And then I'll click on generate for that
And then I'll click on generate for that one. And that will start working. So now
one. And that will start working. So now
one. And that will start working. So now we have two generations running. And we
we have two generations running. And we
we have two generations running. And we can try a third one. So for this one,
can try a third one. So for this one,
can try a third one. So for this one, we're going to do the video overview.
we're going to do the video overview.
we're going to do the video overview. Clicking on this, we have the menu that
Clicking on this, we have the menu that
Clicking on this, we have the menu that now pops up. And you'll see we have
now pops up. And you'll see we have
now pops up. And you'll see we have three different choices here. cinematic
three different choices here. cinematic
three different choices here. cinematic videos, explainer, and shorts. And this
videos, explainer, and shorts. And this
videos, explainer, and shorts. And this is one of those cases where you may not
is one of those cases where you may not
is one of those cases where you may not see cinematic videos because you're not
see cinematic videos because you're not
see cinematic videos because you're not on one of the paid plans. But I will
on one of the paid plans. But I will
on one of the paid plans. But I will show you what all three of these types
show you what all three of these types
show you what all three of these types of videos look like. So, this is a
of videos look like. So, this is a
of videos look like. So, this is a cinematic video, and you'll notice as I
cinematic video, and you'll notice as I
cinematic video, and you'll notice as I play this, it's really rich in its
play this, it's really rich in its
play this, it's really rich in its imagery. It uses Gemini behind the
imagery. It uses Gemini behind the
imagery. It uses Gemini behind the scenes to plan out the video before it's

scenes to plan out the video before it's generated. So it has a whole story arc
generated. So it has a whole story arc
generated. So it has a whole story arc to it and all the images and videos that
to it and all the images and videos that

to it and all the images and videos that are used are planned out along with
are used are planned out along with
are used are planned out along with that. So it really comes together quite
that. So it really comes together quite
that. So it really comes together quite nicely.

voice over over the top. They're really nice, just maybe not as rich as those nice, just maybe not as rich as those cinematic ones. And then finally, we cinematic ones. And then finally, we have the shorts. Here's an example of have the shorts. Here's an example of that one right here.

that one right here. >> Just root in the stem actually work. A

>> Just root in the stem actually work. A

>> Just root in the stem actually work. A larger root mass absorbs more water, larger root mass absorbs more water, larger root mass absorbs more water, which prevents drought stress and stops which prevents drought stress and stops your fruit from cracking. Take a your fruit from cracking. Take a standard 10-in tomato transplant sitting standard 10-in tomato transplant sitting in a small nursery pot. So, obviously in a small nursery pot. So, obviously that's better for something like that's better for something like Instagram or a YouTube short, but Instagram or a YouTube short, but honestly, I sometimes love the way the honestly, I sometimes love the way the shorts come out better than the other shorts come out better than the other two. It's just really whatever is going two. It's just really whatever is going on behind the scenes is really, really on behind the scenes is really, really done well. So, anyway, returning back to done well. So, anyway, returning back to the notebook we're using together, you the notebook we're using together, you can choose whichever one you want to can choose whichever one you want to use. And for the explainer one, because use. And for the explainer one, because they are like basically a PowerPoint, they are like basically a PowerPoint, you can choose the style of that you can choose the style of that PowerPoint, that slide deck. You have PowerPoint, that slide deck. You have all those choices right here. So, if you all those choices right here. So, if you wanted to do for like a retropaint wanted to do for like a retropaint

wanted to do for like a retropaint style, you can choose that or style, you can choose that or style, you can choose that or watercolor, whichever one you want. And watercolor, whichever one you want. And again, I'm not going to walk you through again, I'm not going to walk you through the same settings where you can choose the same settings where you can choose the sources, a language, or the topic, the sources, a language, or the topic, but you'll fill all those in and then but you'll fill all those in and then click on generate. Next, we will look at click on generate. Next, we will look at mind maps. These you can find right mind maps. These you can find right here. And there's not much to mind maps. here. And there's not much to mind maps. here. And there's not much to mind maps. Not a lot of settings to change. Of Not a lot of settings to change. Of course, you can give it the topic. I'll choose a landscape for this one. Down choose a landscape for this one. Down here you can choose the level of detail. here you can choose the level of detail. Standard is standard. is what I showed Standard is standard. is what I showed you right here in terms of the amount of you right here in terms of the amount of information in the infographic. Concise information in the infographic. Concise will have less information and then will have less information and then detailed puts a lot more information in detailed puts a lot more information in there. Detailed may not be available on there. Detailed may not be available on your plan. Personally, I don't love your plan. Personally, I don't love using detailed. I find it tries to squish way too much information inside squish way too much information inside of one infographic. So, I usually do of one infographic. So, I usually do standard or concise. Then you can choose standard or concise. Then you can choose the sources, describe what the the sources, describe what the infographic will have in it, and then infographic will have in it, and then click on generate. And finally, we have click on generate. And finally, we have data tables. Data tables look like this. data tables. Data tables look like this. They're basically Excel files that have They're basically Excel files that have different columns and rows of different columns and rows of information. And so you can come in here information. And so you can come in here and say what you want the data table to and say what you want the data table to be about. So for instance, I could say a be about. So for instance, I could say a data table that details the best time of data table that details the best time of

data table that details the best time of the year to plant different vegetables.
the year to plant different vegetables.
the year to plant different vegetables. and it will create that one for me. So
and it will create that one for me. So
and it will create that one for me. So now we've run through all of those and
now we've run through all of those and
now we've run through all of those and you see that some of them are done
you see that some of them are done
you see that some of them are done generating over here. So let's take a
generating over here. So let's take a
generating over here. So let's take a look at what we can now do inside of
look at what we can now do inside of
look at what we can now do inside of this section. So first we can open up
this section. So first we can open up
this section. So first we can open up any of our assets. So this one right
any of our assets. So this one right
any of our assets. So this one right here is our audio overview. Let's give
here is our audio overview. Let's give
here is our audio overview. Let's give that one a quick listen. I'll click
that one a quick listen. I'll click
that one a quick listen. I'll click right here where it says play
right here where it says play
right here where it says play >> slowly suffocating them.
>> slowly suffocating them.
>> slowly suffocating them. >> I mean it sounds a little dramatic but
>> I mean it sounds a little dramatic but
>> I mean it sounds a little dramatic but it is actually true. Right now, in my
it is actually true. Right now, in my
it is actually true. Right now, in my opinion, the best way to listen to these
opinion, the best way to listen to these
opinion, the best way to listen to these audio overviews is to download the
audio overviews is to download the
audio overviews is to download the Gemini Notebook app on your phone and to
Gemini Notebook app on your phone and to
Gemini Notebook app on your phone and to listen to them while you're walking at
listen to them while you're walking at
listen to them while you're walking at the gym or while you're driving, the
the gym or while you're driving, the
the gym or while you're driving, the same way you would listen to any other
same way you would listen to any other
same way you would listen to any other podcast. One other really cool feature
podcast. One other really cool feature
podcast. One other really cool feature of these is there's the option to
of these is there's the option to
of these is there's the option to actually interrupt the podcast. It's
actually interrupt the podcast. It's
actually interrupt the podcast. It's called interactive mode. So, if instead
called interactive mode. So, if instead
called interactive mode. So, if instead of pressing play, you click on this hand
of pressing play, you click on this hand

of pressing play, you click on this hand that's waving, you'll notice it will
that's waving, you'll notice it will
that's waving, you'll notice it will play the podcast, but you can actually
play the podcast, but you can actually
play the podcast, but you can actually interact with it. It's pretty wild. Let
interact with it. It's pretty wild. Let
interact with it. It's pretty wild. Let me show you how it works. With this
me show you how it works. With this
me show you how it works. With this open, I now click on play audio.
open, I now click on play audio.
open, I now click on play audio. >> Welcome to the deep dive. Um, what if I
>> Welcome to the deep dive. Um, what if I
>> Welcome to the deep dive. Um, what if I told you that just simply walking next
told you that just simply walking next
told you that just simply walking next to your tomato plant? Hey there. Want to
to your tomato plant? Hey there. Want to
to your tomato plant? Hey there. Want to share your thoughts on this?
share your thoughts on this?
share your thoughts on this? >> I don't believe that just walking next
>> I don't believe that just walking next
>> I don't believe that just walking next to them can hurt my tomato plants. That
to them can hurt my tomato plants. That
to them can hurt my tomato plants. That sounds like that's not true. It
sounds like that's not true. It
sounds like that's not true. It definitely sounds like I'm exaggerating.
definitely sounds like I'm exaggerating.
definitely sounds like I'm exaggerating. Feeling every step.
Feeling every step.
Feeling every step. >> It's like you're slowly.
>> It's like you're slowly.
>> It's like you're slowly. >> So, it's like an interactive podcast.
>> So, it's like an interactive podcast.
>> So, it's like an interactive podcast. It's pretty cool. So, those are the two
It's pretty cool. So, those are the two
It's pretty cool. So, those are the two things you can do. Either just regularly
things you can do. Either just regularly
things you can do. Either just regularly play it or have that interactive mode.
play it or have that interactive mode.
play it or have that interactive mode. There's also these three dots right
There's also these three dots right
There's also these three dots right here. And this is going to be true for
here. And this is going to be true for
here. And this is going to be true for everything that you generate inside of
everything that you generate inside of
everything that you generate inside of Studio. This will give you the option of
Studio. This will give you the option of
Studio. This will give you the option of sharing it. You can also rename it to
sharing it. You can also rename it to
sharing it. You can also rename it to easily find it later or download it. So,
easily find it later or download it. So,

easily find it later or download it. So, that in this case, it will download it that in this case, it will download it that in this case, it will download it as an MP3 file, I believe. And you can as an MP3 file, I believe. And you can as an MP3 file, I believe. And you can view the prompt and sources. So if view the prompt and sources. So if view the prompt and sources. So if you've used a custom prompt and you want you've used a custom prompt and you want you've used a custom prompt and you want to check what it is to use it again or to check what it is to use it again or to check what it is to use it again or make some changes to that, you can do make some changes to that, you can do make some changes to that, you can do that by clicking on this and this will that by clicking on this and this will that by clicking on this and this will show you what the prompt is right here show you what the prompt is right here show you what the prompt is right here as well as which sources were used. And as well as which sources were used. And as well as which sources were used. And if you want, you can click on this if you want, you can click on this if you want, you can click on this button and that will iterate on this button and that will iterate on this button and that will iterate on this prompt. meaning it will automatically prompt. meaning it will automatically prompt. meaning it will automatically open up the prompt box and fill it in. open up the prompt box and fill it in. open up the prompt box and fill it in. And then you can just make any changes And then you can just make any changes And then you can just make any changes that you want to have a similar podcast that you want to have a similar podcast that you want to have a similar podcast just with those small changes. And then just with those small changes. And then just with those small changes. And then finally, you could also delete it. So if finally, you could also delete it. So if finally, you could also delete it. So if we look at the next one, this one is our we look at the next one, this one is our we look at the next one, this one is our slide deck. And you can see that looks slide deck. And you can see that looks slide deck. And you can see that looks like right here. Now slide decks has like right here. Now slide decks has like right here. Now slide decks has something unique that you don't see for something unique that you don't see for something unique that you don't see for the other assets you create in studio. the other assets you create in studio. the other assets you create in studio. You can actually revise your slide You can actually revise your slide You can actually revise your slide decks. If you click up here where it decks. If you click up here where it decks. If you click up here where it says revise, you can tell it what says revise, you can tell it what

says revise, you can tell it what changes you want to make to each slide.
changes you want to make to each slide.
changes you want to make to each slide. So let's say this title slide right
So let's say this title slide right
So let's say this title slide right here, I don't love something like maybe
here, I don't love something like maybe
here, I don't love something like maybe just the text. I can just describe those
just the text. I can just describe those
just the text. I can just describe those changes. In this case, I'll say I don't
changes. In this case, I'll say I don't
changes. In this case, I'll say I don't like the green.
like the green.
like the green. Make it
Make it
Make it blue instead. I actually do like the
blue instead. I actually do like the
blue instead. I actually do like the green, but we'll just do that for this
green, but we'll just do that for this
green, but we'll just do that for this example. And then I will click on the
example. And then I will click on the
example. And then I will click on the next slide. And this one's okay. So, I'm
next slide. And this one's okay. So, I'm
next slide. And this one's okay. So, I'm not going to ask for any changes here.
not going to ask for any changes here.
not going to ask for any changes here. This one's okay. So, I won't ask for any
This one's okay. So, I won't ask for any
This one's okay. So, I won't ask for any changes. This one, I can say I don't
changes. This one, I can say I don't
changes. This one, I can say I don't like the word crop roster or the words
like the word crop roster or the words
like the word crop roster or the words crop roster at the top. Remove those.
crop roster at the top. Remove those.
crop roster at the top. Remove those. So, once you've typed out all the
So, once you've typed out all the
So, once you've typed out all the changes you want to make, click on
changes you want to make, click on
changes you want to make, click on generate revised deck and then it will
generate revised deck and then it will
generate revised deck and then it will generate a new slide deck with those
generate a new slide deck with those
generate a new slide deck with those changes. While that's waiting, I'll open
changes. While that's waiting, I'll open
changes. While that's waiting, I'll open up the old slide deck. And I want to
up the old slide deck. And I want to
up the old slide deck. And I want to show you something else in here, which
show you something else in here, which
show you something else in here, which is this play button right here. That
is this play button right here. That
is this play button right here. That will start a slideshow that's full
will start a slideshow that's full

will start a slideshow that's full screen. And then to exit, you could just screen. And then to exit, you could just screen. And then to exit, you could just press the escape key. Now, I press the escape key. Now, I press the escape key. Now, I showed you before those three dots. You showed you before those three dots. You showed you before those three dots. You get a little bit more with slideshows or get a little bit more with slideshows or get a little bit more with slideshows or slide decks. In addition to the other slide decks. In addition to the other slide decks. In addition to the other options, there's also options for again options, there's also options for again options, there's also options for again clicking on slideshow or revise, but you clicking on slideshow or revise, but you clicking on slideshow or revise, but you can also download in different formats. can also download in different formats. can also download in different formats. So there's two different formats you can So there's two different formats you can So there's two different formats you can download into a PDF or a PowerPoint. And download into a PDF or a PowerPoint. And download into a PDF or a PowerPoint. And you'll notice that with a few of the you'll notice that with a few of the you'll notice that with a few of the other assets you generate like for data other assets you generate like for data other assets you generate like for data tables, you can download those to sheets tables, you can download those to sheets tables, you can download those to sheets or export to sheets which is directly or export to sheets which is directly or export to sheets which is directly inside of Google Drive like Google inside of Google Drive like Google inside of Google Drive like Google Sheets. Let me just show you. Click on Sheets. Let me just show you. Click on that. You can see it's exporting and that. You can see it's exporting and then it opens it up inside of Google then it opens it up inside of Google then it opens it up inside of Google Sheets for you right here. And so each Sheets for you right here. And so each of them is going to be a little bit of them is going to be a little bit different in terms of what export different in terms of what export different in terms of what export options are available. Frustratingly, if options are available. Frustratingly, if we take a look at this infographic, and we take a look at this infographic, and remember this is the Quai style just to remember this is the Quai style just to give you an idea of what that looks

give you an idea of what that looks like. Frustratingly, you cannot revise a like. Frustratingly, you cannot revise a like. Frustratingly, you cannot revise a infographic like you can a slide deck. infographic like you can a slide deck. infographic like you can a slide deck. I'm sure that capability is coming soon I'm sure that capability is coming soon I'm sure that capability is coming soon because it seems like it should be because it seems like it should be because it seems like it should be exactly the same, but we don't yet have exactly the same, but we don't yet have exactly the same, but we don't yet have that available. One final thing I'll that available. One final thing I'll show you inside of Studio down here is show you inside of Studio down here is show you inside of Studio down here is the option to add a note. Clicking on the option to add a note. Clicking on the option to add a note. Clicking on this, you can type out any note that you this, you can type out any note that you this, you can type out any note that you want. This is helpful if you want to want. This is helpful if you want to take notes as you are learning take notes as you are learning take notes as you are learning something. You can just take down those something. You can just take down those something. You can just take down those notes right here and then it will notes right here and then it will notes right here and then it will automatically save. You just collapse it automatically save. You just collapse it automatically save. You just collapse it and you'll see your note here. Okay, at and you'll see your note here. Okay, at and you'll see your note here. Okay, at this point I think you have mastered the this point I think you have mastered the this point I think you have mastered the basics on how to use Gemini notebook. I basics on how to use Gemini notebook. I want to show you some more advanced want to show you some more advanced want to show you some more advanced capabilities though. For that I want to capabilities though. For that I want to capabilities though. For that I want to start a new notebook. So we'll click on start a new notebook. So we'll click on start a new notebook. So we'll click on the top left here to return back to the the top left here to return back to the the top left here to return back to the Gemini notebook dashboard. Before we Gemini notebook dashboard. Before we Gemini notebook dashboard. Before we create that notebook though, I want to create that notebook though, I want to create that notebook though, I want to show you a little bit more about how to show you a little bit more about how to show you a little bit more about how to organize and navigate this dashboard. So organize and navigate this dashboard. So

organize and navigate this dashboard. So up here at the top are what are called up here at the top are what are called up here at the top are what are called featured notebooks. These are ones that featured notebooks. These are ones that featured notebooks. These are ones that have been created by Google Gemini. I have been created by Google Gemini. I have been created by Google Gemini. I honestly usually ignore those ones. Down honestly usually ignore those ones. Down honestly usually ignore those ones. Down here you have your recent notebooks. here you have your recent notebooks. here you have your recent notebooks. These will be sorted so that the These will be sorted so that the These will be sorted so that the notebook that you last used will appear notebook that you last used will appear notebook that you last used will appear at the top. You'll notice that for all at the top. You'll notice that for all at the top. You'll notice that for all these notebooks there are these three these notebooks there are these three these notebooks there are these three little dots here. It can be harder to little dots here. It can be harder to little dots here. It can be harder to see when you have the images, but they see when you have the images, but they see when you have the images, but they are there. So clicking on that you can are there. So clicking on that you can are there. So clicking on that you can delete these notebooks. You can edit the delete these notebooks. You can edit the delete these notebooks. You can edit the title, you can add them to a collection, title, you can add them to a collection, title, you can add them to a collection, or you can pin them. So, if I click on or you can pin them. So, if I click on or you can pin them. So, if I click on pin to top, you'll see that it it pin to top, you'll see that it it pin to top, you'll see that it it appended to the top here so it's easier appended to the top here so it's easier appended to the top here so it's easier to find. Along the top here, there are to find. Along the top here, there are to find. Along the top here, there are some sorting options. So, we have all some sorting options. So, we have all some sorting options. So, we have all selected by default. That shows you all selected by default. That shows you all selected by default. That shows you all of the notebooks, both yours and the of the notebooks, both yours and the of the notebooks, both yours and the ones that were created by Google. My ones that were created by Google. My ones that were created by Google. My notebooks will only show you your notebooks will only show you your notebooks will only show you your notebooks. Featured notebooks will only notebooks. Featured notebooks will only notebooks. Featured notebooks will only show you the ones that were created by show you the ones that were created by

show you the ones that were created by Google. And you can also share Google. And you can also share Google. And you can also share notebooks. So if anyone shares a notebooks. So if anyone shares a notebooks. So if anyone shares a notebook with you, that will appear notebook with you, that will appear notebook with you, that will appear here. Finally, we have collections. here. Finally, we have collections. Collections are how you can organize Collections are how you can organize Collections are how you can organize your notebooks. So we'll start a new your notebooks. So we'll start a new your notebooks. So we'll start a new collection here, and I'll call this one collection here, and I'll call this one collection here, and I'll call this one home. I'm going to use this for any home. I'm going to use this for any home. I'm going to use this for any topics I'm studying about, you know, how topics I'm studying about, you know, how topics I'm studying about, you know, how to make my house and my life more homey. to make my house and my life more homey. to make my house and my life more homey. So I selected that one. And then down So I selected that one. And then down So I selected that one. And then down here, I can choose which notebooks I here, I can choose which notebooks I here, I can choose which notebooks I want to add to this collection. So here want to add to this collection. So here want to add to this collection. So here I have a notebook about how to bake I have a notebook about how to bake I have a notebook about how to bake chocolate chip cookies. I'll throw that chocolate chip cookies. I'll throw that chocolate chip cookies. I'll throw that one in there. And how to sleep better. I one in there. And how to sleep better. I one in there. And how to sleep better. I will choose that one in there. And then will choose that one in there. And then will choose that one in there. And then I'll select my one about gardening. And I'll select my one about gardening. And I'll select my one about gardening. And then click on create. So now here is my then click on create. So now here is my then click on create. So now here is my home collection. If I click on that, I home collection. If I click on that, I home collection. If I click on that, I see the three notebooks in here. see the three notebooks in here. see the three notebooks in here. Notebooks can exist in multiple Notebooks can exist in multiple Notebooks can exist in multiple collections, by the way. So, if I go collections, by the way. So, if I go collections, by the way. So, if I go backwards and start a new collection and backwards and start a new collection and backwards and start a new collection and maybe call this one outdoors or maybe call this one outdoors or

maybe call this one outdoors or something, I can choose that same something, I can choose that same something, I can choose that same gardening notebook and it can exist in gardening notebook and it can exist in gardening notebook and it can exist in multiple collections. Let me return back multiple collections. Let me return back multiple collections. Let me return back now to the all notebooks section. I now to the all notebooks section. I don't need this one pinned, so I'll don't need this one pinned, so I'll don't need this one pinned, so I'll click on these three dots and unpin it click on these three dots and unpin it click on these three dots and unpin it so I can see it back down here. Up here so I can see it back down here. Up here at the top, you can switch between this at the top, you can switch between this at the top, you can switch between this grid view to this list view. I prefer grid view to this list view. I prefer grid view to this list view. And you can choose how the grid view. And you can choose how the grid view. And you can choose how they're sorted, most recent, or you can they're sorted, most recent, or you can they're sorted, most recent, or you can sort by title. I think most recent makes sort by title. I think most recent makes sort by title. I think most recent makes more sense to me. And then there's also more sense to me. And then there's also more sense to me. And then there's also a search button right here. So if you're a search button right here. So if you're a search button right here. So if you're having trouble finding one of your having trouble finding one of your having trouble finding one of your notebooks, you can just use this search notebooks, you can just use this search notebooks, you can just use this search function right here. All right, so for function right here. All right, so for the dashboard, that's everything you the dashboard, that's everything you the dashboard, that's everything you need to know. Let me now move on and need to know. Let me now move on and need to know. Let me now move on and show you some of those more advanced show you some of those more advanced show you some of those more advanced capabilities. For this, we will create a capabilities. For this, we will create a capabilities. For this, we will create a new notebook, of course, by clicking new notebook, of course, by clicking new notebook, of course, by clicking right here where it says create new right here where it says create new right here where it says create new notebook. For this notebook, instead of notebook. For this notebook, instead of notebook. For this notebook, instead of uploading the same types of sources I uploading the same types of sources I

uploading the same types of sources I showed you before, different websites showed you before, different websites showed you before, different websites and such, I'm going to do something a and such, I'm going to do something a and such, I'm going to do something a little bit differently because this little bit differently because this little bit differently because this notebook I'm going to use as a way to notebook I'm going to use as a way to notebook I'm going to use as a way to analyze different data and information I analyze different data and information I analyze different data and information I have. It's more of a personalized have. It's more of a personalized have. It's more of a personalized notebook. So, what I have on my computer notebook. So, what I have on my computer notebook. So, what I have on my computer is this folder right here that contains is this folder right here that contains is this folder right here that contains all of these files that I'm using to all of these files that I'm using to all of these files that I'm using to keep track of my family's budget. So, we keep track of my family's budget. So, we keep track of my family's budget. So, we have my 2023, 2024, and 2025 family have my 2023, 2024, and 2025 family have my 2023, 2024, and 2025 family expenses. We have my financial goals as expenses. We have my financial goals as expenses. We have my financial goals as well, and a file here with some trips I well, and a file here with some trips I well, and a file here with some trips I have planned for my family. In addition have planned for my family. In addition have planned for my family. In addition to that, I have this Google doc that to that, I have this Google doc that to that, I have this Google doc that also has my family trips in here. And also has my family trips in here. And also has my family trips in here. And this is something I share with other this is something I share with other this is something I share with other members of my family. So, we can keep members of my family. So, we can keep members of my family. So, we can keep this updated as we think of new trip this updated as we think of new trip this updated as we think of new trip ideas. So, I want all of that brought in ideas. So, I want all of that brought in ideas. So, I want all of that brought in to this notebook. So I can choose upload to this notebook. So I can choose upload to this notebook. So I can choose upload files here. Find the files I want to files here. Find the files I want to files here. Find the files I want to upload and select all of them then open upload and select all of them then open upload and select all of them then open those. So now those are being loaded in. those. So now those are being loaded in. those. So now those are being loaded in. We also have to add that Google doc. So We also have to add that Google doc. So

We also have to add that Google doc. So I'll click on add source and I will I'll click on add source and I will I'll click on add source and I will select drive here and I'll select that select drive here and I'll select that select drive here and I'll select that file which is called travel ideas and file which is called travel ideas and file which is called travel ideas and click on insert. What's really neat click on insert. What's really neat about adding something from Google Drive about adding something from Google Drive about adding something from Google Drive is that that will stay updated. So if is that that will stay updated. So if is that that will stay updated. So if myself or another member of my family myself or another member of my family myself or another member of my family changes this file that will changes this file that will changes this file that will automatically automatically be reflected automatically automatically be reflected automatically automatically be reflected inside the notebook. So I don't have to inside the notebook. So I don't have to inside the notebook. So I don't have to refresh it or delete it and then edit refresh it or delete it and then edit refresh it or delete it and then edit again. Now we will come over to the chat again. Now we will come over to the chat again. Now we will come over to the chat in the middle cuz I want to show you in the middle cuz I want to show you some of the newer features of Gemini some of the newer features of Gemini some of the newer features of Gemini notebook. Under the hood, Google has notebook. Under the hood, Google has notebook. Under the hood, Google has added a lot more capabilities to Gemini added a lot more capabilities to Gemini added a lot more capabilities to Gemini notebook, a lot more powerful models, notebook, a lot more powerful models, notebook, a lot more powerful models, and each notebook also has its own and each notebook also has its own and each notebook also has its own private cloud compute computer running, private cloud compute computer running, private cloud compute computer running, which allows it to do a gentic work for which allows it to do a gentic work for which allows it to do a gentic work for you. That sounds like a mouthful, but you. That sounds like a mouthful, but all that means is that it can do more all that means is that it can do more all that means is that it can do more and it can analyze more information and and it can analyze more information and and it can analyze more information and more data. So here, for instance, we more data. So here, for instance, we more data. So here, for instance, we have all of these expenses from the past have all of these expenses from the past

have all of these expenses from the past 3 years. I'm going to ask it to
3 years. I'm going to ask it to
3 years. I'm going to ask it to summarize all that information. Create a
summarize all that information. Create a
summarize all that information. Create a PNG file that has a pie chart that
PNG file that has a pie chart that
PNG file that has a pie chart that summarizes how my family spends spends
summarizes how my family spends spends
summarizes how my family spends spends money broken up into different
money broken up into different
money broken up into different categories. I should really say broken
categories. I should really say broken
categories. I should really say broken down into different categories. For this
down into different categories. For this
down into different categories. For this one, I don't needed to have access to
one, I don't needed to have access to
one, I don't needed to have access to all the files, only the ones with my
all the files, only the ones with my
all the files, only the ones with my expenses. So, I've only selected those
expenses. So, I've only selected those
expenses. So, I've only selected those three. So, this new capability allows
three. So, this new capability allows
three. So, this new capability allows you to create all these different file
you to create all these different file
you to create all these different file types directly from the chat. Here I'm
types directly from the chat. Here I'm
types directly from the chat. Here I'm demonstrating how it creates a PNG file,
demonstrating how it creates a PNG file,
demonstrating how it creates a PNG file, but you can also use this to create Word
but you can also use this to create Word
but you can also use this to create Word documents, PDFs, Excel documents,
documents, PDFs, Excel documents,
documents, PDFs, Excel documents, PowerPoints, all of that. All right,
PowerPoints, all of that. All right,
PowerPoints, all of that. All right, check that out. You can now see the PNG
check that out. You can now see the PNG
check that out. You can now see the PNG file over here on the right. And it's
file over here on the right. And it's
file over here on the right. And it's kind of walking through exactly what it
kind of walking through exactly what it
kind of walking through exactly what it found. So, let's just open this up
found. So, let's just open this up
found. So, let's just open this up instead. And you can see that breakdown
instead. And you can see that breakdown
instead. And you can see that breakdown right here. So, notice how I'm using
right here. So, notice how I'm using
right here. So, notice how I'm using notebooks two different ways. one is for
notebooks two different ways. one is for
notebooks two different ways. one is for learning where I'm pulling information
learning where I'm pulling information

learning where I'm pulling information from the web and then we have notebooks from the web and then we have notebooks like this where I'm analyzing and it's like this where I'm analyzing and it's like this where I'm analyzing and it's analyzing my information my data so we analyzing my information my data so we analyzing my information my data so we can create another one in here so I can create another one in here so I can create another one in here so I can say something like create a word say something like create a word say something like create a word document that contains a breakdown of document that contains a breakdown of document that contains a breakdown of this same info and this is what it looks this same info and this is what it looks this same info and this is what it looks like so we have this sort of title page like so we have this sort of title page here and then you can see it's quite a here and then you can see it's quite a here and then you can see it's quite a comprehensive report really nicely put comprehensive report really nicely put comprehensive report really nicely put together. Another thing you can always together. Another thing you can always together. Another thing you can always do inside the chat for any of the do inside the chat for any of the responses that you get, even if you're responses that you get, even if you're responses that you get, even if you're not using it to create assets like we not using it to create assets like we just did, you can click right here where just did, you can click right here where just did, you can click right here where it says save to note, it says save to note, it says save to note, and that will save the response as a and that will save the response as a note over here on the right if you want. note over here on the right if you want. Now, with this new functionality, you Now, with this new functionality, you can also search for sources using the can also search for sources using the chat. What I'll do now is turn on all of chat. What I'll do now is turn on all of my existing sources. So, we are now my existing sources. So, we are now using all of them. And I will ask it, I using all of them. And I will ask it, I want to budget better with my family. want to budget better with my family. Can you find some reputable sources that Can you find some reputable sources that

Can you find some reputable sources that can help with that? And now it will look
can help with that? And now it will look
can help with that? And now it will look at the sources I already have and all
at the sources I already have and all
at the sources I already have and all the information in here and find new
the information in here and find new
the information in here and find new sources from the web that would actually
sources from the web that would actually
sources from the web that would actually be helpful for my situation. So, here it
be helpful for my situation. So, here it
be helpful for my situation. So, here it looked at my sources and it says, "Your
looked at my sources and it says, "Your
looked at my sources and it says, "Your sources outline your family specific
sources outline your family specific
sources outline your family specific financial goals, including prioritized
financial goals, including prioritized
financial goals, including prioritized goals, and you need to have a monthly
goals, and you need to have a monthly
goals, and you need to have a monthly savings sequence and internal house
savings sequence and internal house
savings sequence and internal house rules. Would you like me to do some web
rules. Would you like me to do some web
rules. Would you like me to do some web research to find highly recommended,
research to find highly recommended,
research to find highly recommended, reputable external sources?" I'll say,
reputable external sources?" I'll say,
reputable external sources?" I'll say, "Yes, please do that." So, this is
"Yes, please do that." So, this is
"Yes, please do that." So, this is different from using the research tool
different from using the research tool
different from using the research tool right here like I showed you before
right here like I showed you before
right here like I showed you before because this one doesn't take into
because this one doesn't take into
because this one doesn't take into consideration the sources you already
consideration the sources you already
consideration the sources you already have or the things you've already
have or the things you've already
have or the things you've already chatted about. But this search tool is
chatted about. But this search tool is
chatted about. But this search tool is looking at the full picture when it's
is looking at the full picture when it's
is looking at the full picture when it's going out and finding and doing research
going out and finding and doing research
going out and finding and doing research for you. This can also be helpful in the
for you. This can also be helpful in the
for you. This can also be helpful in the other notebook I showed you before that
other notebook I showed you before that
other notebook I showed you before that we started together, the one about
we started together, the one about

we started together, the one about gardening. Because this one I could ask gardening. Because this one I could ask gardening. Because this one I could ask it for instance, look at all the it for instance, look at all the sources. Is there anything that I'm sources. Is there anything that I'm sources. Is there anything that I'm missing? And if there is, can you find missing? And if there is, can you find missing? And if there is, can you find some sources to fill in those gaps? And some sources to fill in those gaps? And some sources to fill in those gaps? And it's really good at doing that as well. it's really good at doing that as well. it's really good at doing that as well. But returning back to our new financial But returning back to our new financial But returning back to our new financial family planning notebook, you can see family planning notebook, you can see family planning notebook, you can see here that it went out, did the research, here that it went out, did the research, here that it went out, did the research, and it found some things for us and and it found some things for us and and it found some things for us and actually broke it down into these actually broke it down into these actually broke it down into these different key themes. And here are the different key themes. And here are the different key themes. And here are the sources that it recommends importing. So sources that it recommends importing. So if you want to import these, you can now if you want to import these, you can now if you want to import these, you can now click on import and those will be added click on import and those will be added click on import and those will be added here on the left. Since this is a family here on the left. Since this is a family here on the left. Since this is a family financial report notebook, I want to financial report notebook, I want to financial report notebook, I want to share this with other members of my share this with other members of my share this with other members of my family. To do that, you can click on the family. To do that, you can click on the family. To do that, you can click on the top right here where it says share and top right here where it says share and top right here where it says share and you can put in the other user's email you can put in the other user's email you can put in the other user's email address and they will have access to address and they will have access to address and they will have access to this notebook. You can change the access this notebook. You can change the access this notebook. You can change the access settings. So with this, it can be anyone settings. So with this, it can be anyone settings. So with this, it can be anyone with the that you put in here. That's with the that you put in here. That's

with the that you put in here. That's what restricted means. Or you can change what restricted means. Or you can change what restricted means. Or you can change it to anyone with the link or you can it to anyone with the link or you can it to anyone with the link or you can make it public. Notebooks that you make it public. Notebooks that you make it public. Notebooks that you create inside of Gemini notebook don't create inside of Gemini notebook don't create inside of Gemini notebook don't just exist inside of Gemini notebook. just exist inside of Gemini notebook. just exist inside of Gemini notebook. You can also access them to some degree You can also access them to some degree You can also access them to some degree inside of Gemini directly. So here I've inside of Gemini directly. So here I've inside of Gemini directly. So here I've come over to gemini.google.com. come over to gemini.google.com. come over to gemini.google.com. This is Google Gemini. If you open up This is Google Gemini. If you open up This is Google Gemini. If you open up the sidebar, you'll see right here the sidebar, you'll see right here the sidebar, you'll see right here notebooks. And if I click on all notebooks. And if I click on all notebooks. And if I click on all notebooks, you can see all of my Gemini notebooks, you can see all of my Gemini notebooks, you can see all of my Gemini notebook notebooks. And here is the one notebook notebooks. And here is the one notebook notebooks. And here is the one that we created together about that we created together about that we created together about gardening. Here is the one with the gardening. Here is the one with the gardening. Here is the one with the family financial records. Let's look at family financial records. Let's look at family financial records. Let's look at the gardening one. I'll click on that. the gardening one. I'll click on that. the gardening one. I'll click on that. And you'll see right here the name of And you'll see right here the name of And you'll see right here the name of the notebook and I can see all the the notebook and I can see all the the notebook and I can see all the sources right here. I can even add new sources right here. I can even add new sources directly from Gemini. Closing sources directly from Gemini. Closing sources directly from Gemini. Closing this out, you'll then see the Gemini this out, you'll then see the Gemini chat. This is very similar to how chat. This is very similar to how chat. This is very similar to how regular Gemini chat works, but it's regular Gemini chat works, but it's regular Gemini chat works, but it's going to have access to all of these going to have access to all of these

going to have access to all of these sources, and it's going to prioritize sources, and it's going to prioritize sources, and it's going to prioritize these sources when answering your these sources when answering your these sources when answering your questions. So, if I were to ask the same questions. So, if I were to ask the same question with regular Gemini Chat or question with regular Gemini Chat or with Gemini Chat inside the notebook, with Gemini Chat inside the notebook, with Gemini Chat inside the notebook, I'm going to get slightly different I'm going to get slightly different answers. If you click on the three dots answers. If you click on the three dots on the top right, you can find your on the top right, you can find your notebook settings. There's not much in notebook settings. There's not much in here, but what I want to point out is here, but what I want to point out is that you can use notebook memory. With that you can use notebook memory. With this toggled on, then anytime you start this toggled on, then anytime you start a chat from within this notebook, it will remember the prior chats from this notebook. Let me start a few chats and notebook. Let me start a few chats and show you an example. So, I'll ask it, can I grow any fruit in Colorado? So, here is the answer that it's giving me. And now, if I return back to that notebook, which you can see right here, then down here we can see the past chats. And you see that chat that I just started. So, inside of Gemini, notebooks are in part a folder system. It will organize all of your chats to keep them

organize all of your chats to keep them nice and tidy, and you'll know and be nice and tidy, and you'll know and be nice and tidy, and you'll know and be able to return back to them pretty able to return back to them pretty easily. Another interesting feature easily. Another interesting feature about this is that if we now return back about this is that if we now return back to Gemini notebook and I come over to to Gemini notebook and I come over to that notebook, you'll now see as a that notebook, you'll now see as a source on the side the chats from source on the side the chats from Gemini. And if I open this up, I can see Gemini. And if I open this up, I can see all the chats that I started in Gemini. all the chats that I started in Gemini. In this case, it's only one. So, it goes In this case, it's only one. So, it goes both way. Gemini can pull the both way. Gemini can pull the information from Gemini notebook and information from Gemini notebook and Gemini notebook can pull the chats from Gemini notebook can pull the chats from Gemini as long as it was started from Gemini as long as it was started from within the notebook in Gemini. So that within the notebook in Gemini. So that is literally everything you can do with is literally everything you can do with Gemini notebook. You now know how to Gemini notebook. You now know how to create notebooks, fill them with the create notebooks, fill them with the right sources, create infographics, right sources, create infographics, slide decks, and audio overviews, and slide decks, and audio overviews, and how to use this more advanced how to use this more advanced capabilities. If you made it this far, capabilities. If you made it this far, I'm willing to bet that you got some I'm willing to bet that you got some value out of this video. If you did, value out of this video. If you did, again, the best way to show your

[00:10:37.040] 回到正題吧。我認為我們已經 完成了筆記型電腦的設置，
[00:10:39.110] 完成了筆記型電腦的設置，
[00:10:39.120] 完成了筆記型電腦的設置， 可以開始使用了。
[00:10:42.550] 可以開始使用了。
[00:10:42.560] 可以開始使用了。筆記本的使用區域分為中間一欄
[00:10:44.790] 筆記本的使用區域分為中間一欄
[00:10:44.800] 筆記本的使用區域分為中間一欄 和右側一欄。我們先從
[00:10:46.310] 和右側一欄。我們先從
[00:10:46.320] 和右側一欄。我們先從 中間那個開始。這是聊天記錄。在
[00:10:48.710] 中間那個開始。這是聊天記錄。在
[00:11:02.399] 這裡，你可以與人工智慧聊天，它可以存取你所有資訊來源中的知識。所以它與直接使用 Gemini
非常相似，只是它被鎖定在這些來源中，並且只使用這些來源作為其知識庫。例如，

[00:18:30.630]。記住這一點

[00:18:30.640]。記住這一點。再次，您可以選擇要使用的

[00:18:32.470]。再次， 您可以選擇要使用的

[00:18:32.480]。再次， 您可以選擇要使用的 資料來源數量和資料來源，

[00:18:33.990] 資料來源數量和資料來源，

[00:18:34.000] 資料來源數量和資料來源， 或者， 哎呀， 不小心把它關掉了。

[00:18:35.909] 或者， 哎呀， 不小心把它關掉了。

[00:18:35.919] 或者， 哎呀， 不小心把它關掉了。讓我把它重新打開。當然，你也可以

[00:18:38.070] 讓我把它重新打開。當然， 你也可以

[00:18:38.080] 讓我把它重新打開。當然， 你也可以 描述一下你希望投影

[00:18:39.590] 描述一下你希望投影

[00:18:39.600] 描述一下你希望投影片的內容。所以，在這種情況下，我

[00:18:42.070] 片的內容。所以，在這種情況下，我

[00:18:42.080] 片的內容。所以，在這種情況下，我 可能會說所有

[00:18:44.789] 可能會說所有

[00:18:44.799] 可能會說所有 在科羅拉多州生長茂盛的蔬菜。

[00:19:03.190] 彈出選單。你會看到

[00:19:03.200] 彈出選單。你會看到 這裡有三種不同的選擇。電影級

[00:19:05.190] 這裡有三種不同的選擇。電影級

[00:19:05.200] 這裡有三種不同的選擇。電影級 影片、解說影片和短片。而這

[00:19:07.990] 影片、解說影片和短片。而這

[00:19:08.000] 影片、解說影片和短片。而這 正是那種你可能無法

[00:19:09.909] 正是那種你可能無法

[00:19:09.919] 正是那種你可能無法 觀看電影級影片的情況之一，因為你沒有

[00:19:12.150] 觀看電影級影片的情況之一，因為你沒有

[00:19:12.160] 觀看電影級影片的情況之一，因為你沒有 訂閱付費方案。但我會向

[00:19:14.549] 訂閱付費方案。但我會向

[00:19:14.559] 訂閱付費方案。但我會向 你們展示這三種影片類型的樣子
[00:19:16.310] 你們展示這三種影片類型的樣子
[00:19:16.320] 你們展示這三種影片類型的樣子。所以，這是一段
[00:19:18.950] 。所以，這是一段
[00:19:18.960] 。所以，這是一段 電影感十足的視頻，你會注意到，在我
[00:19:21.669] 電影感十足的視頻，你會注意到，在我
[00:19:21.679] 電影感十足的視頻，你會注意到，在我 播放的過程中，它的畫面非常豐富
[00:19:24.630] 播放的過程中，它的畫面非常豐富
[00:19:24.640] 播放的過程中，它的畫面非常豐富。它在後台使用 Gemini
[00:19:27.270] 。它在後台使用 Gemini
[00:19:27.280] 。它在後台使用 Gemini 來規劃視頻，然後再
[00:19:31.029] 來規劃視頻，然後再
[00:19:31.039] 來規劃視頻，然後再 生成視頻。所以它有一個完整的故事線，
[00:19:34.549] 生成視頻。所以它有一個完整的故事線，
[00:19:34.559] 生成視頻。所以它有一個完整的故事線， 所有使用的圖片和影片都是
[00:19:37.590] 所有使用的圖片和影片都是
[00:19:37.600] 所有使用的圖片和影片都是 圍繞著這個故事線精心策劃的
[00:19:39.750] 圍繞著這個故事線精心策劃的

[00:27:22.390] 不同列和行資訊的 Excel 檔案。

[00:27:22.400] 不同列和行資訊的 Excel 檔案。所以

[00:27:24.710] 所以

[00:27:26.880] 你可以在

[00:27:28.640] 你可以在 這裡說明你希望資料表包含什麼內容。例如，

[00:27:31.190] 這裡說明你希望資料表包含什麼內容。例如，

[00:27:31.200] 這裡說明你希望資料表包含什麼內容。例如，

我可以提供一張數據表，詳細說明一年中種植不同蔬菜的最佳時間。

它會為我創建一個。現在我們已經把這些都檢查完了，您可以看到其中一些已經生成完畢。

那麼讓我們來看看在這個部分我們可以做些什麼。首先，我們可以打開

[00:27:37.029] 那麼讓我們來看看在這個部分我們可以做些什麼。首先，我們可以打開

[00:27:37.039] 那麼讓我們來看看在這個部分我們可以做些什麼。首先，我們可以打開 我們的任何資產。所以，這裡是

[00:27:39.029] 我們的任何資產。所以，這裡是

[00:27:39.039] 我們的任何資產。所以，這裡是 我們的音訊概覽。

[00:27:41.750] 我們的音訊概覽。

[00:27:58.159] 我們來快速聽一下。我

[00:28:01.840] 會點擊這裡，選擇「慢慢窒息他們」的播放方式。

我的意思是，這聽起來有點誇張，但實際上是真的。在我看來，目前收聽這些音訊概述的最佳方式是在手機上下載 Gemini Notebook 應用，然後在健身房散步或開車時收聽，就像收聽其他

我的意思是，這聽起來有點誇張，但實際上是真的。在我看來，目前收聽這些音訊概述的最佳方式是在手機上下載 Gemini Notebook 應用，然後在健身房散步或開車時收聽，就像收聽其他 播客一樣

[00:28:06.710] 播客一樣

[00:28:09.600] 。

[00:28:11.840] 。

[00:28:13.830] 叫做交互模式。所以，如果你

[00:28:13.840] 叫做交互模式。所以，如果你 點擊這隻

[00:28:16.310] 點擊這隻

[00:28:16.320] 點擊這隻 揮舞的手而不是按下播放鍵，你會發現它會

[00:28:18.389] 揮舞的手而不是按下播放鍵，你會發現它會

[00:28:18.399] 揮舞的手而不是按下播放鍵，你會發現它會 播放播客，但你實際上可以與它互動。真是

[00:28:20.710] 播放播客，但你實際上可以與它互動。真是

[00:28:20.720] 播放播客，但你實際上可以與它互動。真是 太瘋狂了。讓

[00:28:22.950] 太瘋狂了。讓

[00:28:22.960] 太瘋狂了。讓 我來給你示範一下它是如何運作的。打開這個視窗後，我點擊播放音訊。

[00:28:25.110] 我來給你示範一下它是如何運作的。打開這個視窗後，我點擊播放音訊。

[00:28:27.520] 歡迎來到深度探索環節。嗯，如果我告訴你，

[00:28:35.600] 只要你走到番茄植株旁邊走走呢？嘿。你對此有什麼看法？

我不認為僅僅從它們旁邊走過會傷害我的番茄植株。

[00:28:39.919] 聽起來好像並非如此。聽起來

[00:28:41.760] 聽起來好像並非如此。聽起來 我好像在誇大其詞。感受著每一步。感覺就像你在

[00:28:42.950] 我好像在誇大其詞。感受著每一步。感覺就像你在

[00:28:44.080] 慢慢地。

[00:28:45.360] 慢慢地。所以，它就像一個互動式播客

[00:28:47.510] 所以，它就像一個互動式播客

[00:28:52.000] 。挺酷的。所以，

[00:29:01.520] 你可以做這兩件事。要嘛就正常玩，要嘛就玩互動模式。這裡還有這三個點。這一點適用於你在 Studio 中產生的所有內容。這樣你就可以選擇分享它了。您也可以重命名它，以便

[00:30:37.520] 改變。就這一點而言，我可以說我不 喜歡「作物名冊」這個詞，或者說我不喜歡

[00:30:42.149] 喜歡「作物名冊」這個詞，或者說我不喜歡

[00:30:42.159] 喜歡「作物名冊」這個詞，或者說我不喜歡 標題中的「作物名冊」字樣

[00:30:46.070] 標題中的「作物名冊」字樣

[00:30:58.720]。刪除它們。所以，一旦你輸入完所有想要做的更改，點擊“生成修改後的簡報”，

[00:31:02.799] 它

[00:31:04.640] 它就會產生一個包含這些更改的新幻燈片簡報

[00:31:06.710] 就會產生一個包含這些更改的新幻燈片簡報

[00:31:06.720] 就會產生一個包含這些更改的新幻燈片簡報。趁著等待的時間，我打開一下舊的

[00:31:08.310]。趁著等待的時間，我打開一下舊的

[00:31:08.320]。趁著等待的時間，我打開一下舊的幻燈片。我還想向

[00:31:10.230] 幻燈片。我還想向

[00:31:10.240] 幻燈片。我還想向你們展示這裡還有

[00:31:12.789] 你們展示這裡還有

[00:31:15.679] 別的東西，就是這個播放按鈕。這將啟動一個全螢幕幻燈片播放。然後，要退出，只需按下 Esc 鍵即可。我之前已經有給你們看過那三個點了。使用幻燈片或幻燈片簡報可以獲得更多資訊

[00:31:25.919]。除了其他選項外，還可以再次點擊投影片或進行修改，也可以下載為不同的格式。

[00:31:29.520] 所以你可以

[00:31:38.080] 下載兩種不同的格式：PDF 或 PowerPoint。您還會注意到，對於您產生的其他一些資源（

[00:31:43.360] 例如資料

[00:31:44.720] 例如資料表），

[00:31:46.310] 表），

[00:32:17.679] 我們看一下這張資訊圖，記住這是 Quai 風格，只是為了讓您了解它的樣子。令人沮喪的是，

[00:32:19.669]。令人沮喪的是，

[00:32:24.880] 你無法像修改投影片那樣修改資訊圖。我相信這項功能很快就會推出，因為它看起來應該完全一樣，但

[00:32:39.840] 我們目前還沒有這項功能。最後，

[00:32:44.720] 我

[00:32:47.279] 我要向大家展示 Studio 中新增的新增註解的

[00:32:48.870] 要向大家展示 Studio 中新增的新增註解的

[00:32:48.880] 要向大家展示 Studio 中新增的新增註解的功能。點擊這裡，你可以輸入任何你想輸入的筆記。如果你想在學習過程中做筆記，這會很有幫助。你可以直接在這裡記筆記，它會自動儲存。

[00:32:53.350] 你只需將其折疊起來，就能在這裡看到你的筆記。好了，

[00:32:58.960] 我想你現在已經掌握了使用 Gemini 筆記本的基本方法。不過，我還想向

[00:33:00.640] 我想你現在已經掌握了使用 Gemini 筆記本的基本方法。不過，我還想向您展示一些更進階的功能

[00:33:02.630] 您展示一些更進階的功能

[00:33:02.640] 您展示一些更進階的功能。為此，我想新建一本筆記本。所以，我們

[00:33:06.149]。為此，我想新建一本筆記本。所以，我們

[00:33:06.159]。為此，我想新建一本筆記本。所以，我們 點擊左上角，回到

[00:33:07.909] 點擊左上角，回到

[00:33:09.679] Gemini 筆記本的控制面板。不過，在創建該筆記本之前，我想先向您展示如何

[00:33:18.159] 組織和

[00:33:19.840] 組織和 瀏覽此儀表板。所以，最上面這些就是所謂的特色筆記本。這些是由 Google 雙子座（Google Gemini）創建的。老實說，我通常都會忽略那些。這裡放著你最近的

[00:33:23.029] 瀏覽此儀表板。所以，最上面這些就是所謂的特色筆記本。這些是由 Google 雙子座（Google Gemini）創建的。老實說，我通常都會忽略那些。這裡放著你最近的

[00:33:25.519] 筆記本。

[00:33:33.679] 這些筆記本將按時間順序排列，您上次使用的筆記本將顯示在頂部。你會注意到，所有這些筆記本上都有這三個小點子。有了圖像之後可能更難看清

[00:34:41.510] 選了那個。

[00:34:41.520] 選了那個。然後在這裡，我可以選擇要新增到此

[00:34:43.589] 然後在這裡，我可以選擇要新增到此

[00:34:46.159] 收藏中的

[00:34:48.879] 收藏中的 筆記本。我這裡有一本關於如何烘焙巧克力曲奇的筆記本。

[00:34:51.190] 筆記本。我這裡有一本關於如何烘焙巧克力曲奇的筆記本。

[00:34:53.280] 我也把那條加

[00:34:55.599] 我也把那條加 進去。以及如何睡得更好。我會

[00:34:57.829] 進去。以及如何睡得更好。我會

[00:34:57.839] 進去。以及如何睡得更好。我會 選裡面的那個。然後

[00:35:00.150] 選裡面的那個。然後

[00:35:00.160] 選裡面的那個。然後 我會選擇一本關於

[00:35:02.710] 我會選擇一本關於

[00:35:02.720] 我會選擇一本關於園藝的書。然後點擊創建。這就是我的家庭收藏。如果

。現在讓我回到所有筆記本部分。我不需要把它置頂，所以我點擊這三個點，取消置頂，這樣我就可以在

[00:35:30.150] 。

[00:35:30.150] 現在讓我回到所有筆記本部分。我不需要把它置頂，所以我點擊這三個點，取消置頂，這樣我就可以在

[00:35:37.680] 這裡再次看到它了。在頂部，您可以切換網格視圖和清單視圖。我更喜歡網格視圖。您可以

[00:35:44.640] 選擇它們的排序方式，按最新發佈時間排序，或按標題排序。我覺得最新的版本更有道理。

[00:35:48.079] 這裡還有一個搜尋按鈕。所以，如果您在

[00:39:15.920] 所以，我們還是打開來看看吧。

[00:39:17.920] 所以，我們還是打開來看看吧。您可以在這裡看到

[00:39:20.390] 您可以在這裡看到

[00:39:20.400] 您可以在這裡看到 詳細的分析結果。所以，請注意我是如何以兩種不同的方式使用筆記本的。一個是用來學習的，我從網上獲取信息；然後我們還有像這樣的筆記本，

[00:39:23.670] 詳細的分析結果。所以，請注意我是如何以兩種不同的方式使用筆記本的。一個是用來學習的，我從網上獲取信息；然後我們還有像這樣的筆記本，

[00:39:44.800] 用來分析

[00:39:50.800] 我的信息和數據，所以我們可以在這裡再創建一個，比如創建一個 Word 文檔，其中包含對相同信息的分解，它看起來是這樣的，這裡有一個標題頁，然後

[00:39:58.079] 你可以看到這是一個非常全面的報告，組織得非常好。還有一件事，即使你沒有像我們剛才那樣用它來創建素材，你也可以在聊天中對收到的任何回復進行操作，點擊這裡“保存到筆記”，這樣就可以將回復

[00:40:24.720] 保存為右側的筆記（如果你願意的話）。現在，有了這項新功能，您還可以透過聊天搜尋資訊來源。我現在要做的是打開我所有的現有訊號源。所以，我們現在都在使用它們。我會問這個問題，

[00:40:26.640] 保存為右側的筆記（如果你願意的話）。現在，有了這項新功能，您還可以透過聊天搜尋資訊來源。我現在要做的是打開我所有的現有訊號源。所以，我們現在都在使用它們。我會問這個問題，我想更好地規劃家庭預算。你能找到一些

[00:41:12.720] 一些備受推崇、信譽良好的外部信息來源？”我會說：“好的，請 這樣做。”所以，這已經和使用我之前向你

[00:41:15.190] 這樣做。”所以，這已經和使用我之前向你

[00:41:18.480] 展示過的工具。但是，這個搜尋工具在為你尋找和進行研究時，會考慮全域情況。這對我們之前一起開始寫的另一本筆記本——關於園藝的筆記本——也很有幫助

[00:41:26.560]。因為例如我可以問這個問題，看看所有的資料

[00:41:29.839]。因為例如我可以問這個問題，看看所有的資料 來源。還有什麼我遺漏的嗎？

[00:41:32.790] 來源。還有什麼我遺漏的嗎？

[00:41:32.800] 來源。還有什麼我遺漏的嗎？如果確實存在這種情況，你能

[00:41:34.470] 如果確實存在這種情況，你能

[00:41:34.480] 如果確實存在這種情況，你能 找到一些資料來填補這些空白嗎？

[00:41:36.790] 找到一些資料來填補這些空白嗎？

[00:41:45.839] 而且它在這方面也做得非常好

[00:41:52.640]。但回到我們新的家庭財務規劃筆記本，你可以看到它已經進行了調查研究，並為我們找到了一些信息，實際上還將其分解為這些不同的關鍵主題。

[00:41:57.440] 以下是它建議導入的

[00:43:17.190] 在

[00:43:17.200] 在這裡看到

[00:43:18.710] 這裡看到

[00:43:18.720] 這裡看到 筆記本的名稱，我也可以看到所有的來源。我什至可以直接從 Gemini 添加新的資料來源。

[00:43:21.349] 筆記本的名稱，我也可以看到所有的來源。我什至可以直接從 Gemini 添加新的資料來源。

[00:43:24.230] 關閉此

[00:43:24.240] 關閉此 視窗後，您

[00:43:26.470] 視窗後，您

[00:43:26.480] 視窗後，您 將看到雙子座聊天記錄

[00:43:29.190] 將看到雙子座聊天記錄

[00:43:29.200] 將看到雙子座聊天記錄。這與普通的 Gemini 聊天功能非常相似，但它

[00:43:31.349]。這與普通的 Gemini 聊天功能非常相似，但它

[00:43:33.839] 可以存取所有這些資源，並且在回答您的問題時優先考慮這些資源

[00:43:36.240] 可以存取所有這些資源，並且在回答您的問題時優先考慮這些資源。

[00:43:38.790]。

[00:43:38.800]。所以，如果我用普通的

[00:43:40.630] 所以，如果我用普通的

[00:43:47.920] Gemini Chat 或用筆記本裡的 Gemini Chat

問同樣的問題，我會得到略有不同的答案。點擊右上角的三個點，即可找到筆記型電腦

[00:43:51.359] Gemini Chat 或用筆記本裡的 Gemini Chat

問同樣的問題，我會得到略有不同的答案。點擊右上角的三個點，即可找到筆記型電腦

設定。這裡面沒什麼特別的，但我想指出的是，你可以使用筆記型電腦記憶體。啟用

[00:43:54.470] 設定。這裡面沒什麼特別的，但我想指出的是，你可以使用筆記型電腦記憶體。啟用

[00:44:03.920] 此功能後，無論何時您從此

[00:44:06.240] 此功能後，無論何時您從此 筆記本發起聊天，它都會記住

[00:44:09.670] 筆記本發起聊天，它都會記住

[00:44:09.680] 筆記本發起聊天，它都會記住 此筆記本中的先前聊天記錄

[00:44:12.309] 此筆記本中的先前聊天記錄

[00:44:14.640]。讓我發起幾個對話，並舉個例子給你聽

[00:44:18.720]。讓我發起幾個對話，並舉個例子給你聽。那麼，我想問一下，我可以在科羅拉多州種植任何水果嗎？

[00:44:21.910]。那麼，我想問一下，我可以在科羅拉多州種植任何水果嗎？

[00:44:21.920]。那麼，我想問一下，我可以在科羅拉多州種植任何水果嗎？ 所以，這就是它給我的答案。現在，如果我

[00:44:24.550] 所以，這就是它給我的答案。現在，如果我

[00:44:24.560] 所以，這就是它給我的答案。現在，如果我 回到那本

[00:44:27.589] 回到那本

[00:44:27.599] 回到那本 筆記本（你現在看到的就是它），那麼在下面我們就

[00:44:30.470] 筆記本（你現在看到的就是它），那麼在下面我們就

[00:44:30.480] 筆記本（你現在看到的就是它），那麼在下面我們就 可以看到過去的聊天記錄。你看，我剛剛發起的那個聊天

[00:44:32.710] 可以看到過去的聊天記錄。你看，我剛剛發起的那個聊天

[00:44:34.880]。所以，在 Gemini 內部，筆記本在某種程度上

[00:44:37.040]。所以，在 Gemini 內部，筆記本在某種程度上 是一個資料夾系統

[00:44:38.790] 是一個資料夾系統

[00:44:38.800] 是一個資料夾系統。它會

[00:44:40.870]。它會

[00:44:40.880]。它會 整理你的所有聊天記錄，讓它們

[00:44:42.550] 整理你的所有聊天記錄，讓它們

[00:44:42.560] 整理你的所有聊天記錄，讓它們 井然有序，你也能輕鬆地找到並返回查看。另一個有趣的特點是，

[00:44:44.390] 井然有序，你也能輕鬆地找到並返回查看。另一個有趣的特點是，

[00:44:48.000] 如果我們現在回到 Gemini 筆記本，

[00:44:50.400] 如果我們現在回到 Gemini 筆記本，我切換到

[00:44:52.309] 我切換到

[00:44:52.319] 我切換到 該筆記本，你現在會在側邊欄看到 Gemini 的聊天記錄作為來源。如果我打開這個，就可以

[00:44:54.309] 該筆記本，你現在會在側邊欄看到 Gemini 的聊天記錄作為來源。如果我打開這個，就可以

[00:45:01.599] 看到我在 Gemini 中發起的所有聊天記錄。在這種情況下，只有一個

[00:45:04.079] 看到我在 Gemini 中發起的所有聊天記錄。在這種情況下，只有一個。所以，這是雙向的。

[00:45:06.630]。所以，這是雙向的。

[00:45:06.640]。所以，這是雙向的。Gemini 可以從 Gemini 筆記本中提取信息，Gemini 筆記本也可以從 Gemini 中提取聊天記錄

[00:45:09.030] Gemini 可以從 Gemini 筆記本中提取信息，Gemini 筆記本也可以從 Gemini 中提取聊天記錄

[00:45:10.960]，只要聊天記錄是從 Gemini 筆記本內部開始的。這就是 Gemini 筆記本的全部功能了。現在

[00:45:13.520]，只要聊天記錄是從 Gemini 筆記本內部開始的。這就是 Gemini 筆記本的全部功能了。現在 您已經知道如何建立筆記本，如何用正確的資源填充筆記本，如何建立資訊圖表、投影片和音訊概述，以及如何使用這些更高級的功能。如果你看到了這裡，我敢打賭你從這個影片中有所收穫。如果你喜歡這個視頻，那麼表達你感謝的最好方法就是給這個視頻點讚並留言。但如果您還沒有完全掌握人工智慧的使用方法，那麼請觀看此影片。這是我關於如何精通 Google Gemini 的深度課程。如果你想學習我關於 Google Gemini 的所有最佳技巧，請點擊這裡觀看影片。我一秒鐘後就到那邊了。暫時

[00:00:57.430] show you how to master everything you
[00:00:57.440] show you how to master everything you get with Gemini notebook. To get
[00:00:59.670] get with Gemini notebook. To get
[00:00:59.680] get with Gemini notebook. To get started, go to notebooklm.google.com.
[00:01:03.189] started, go to notebooklm.google.com.
[00:01:03.199] started, go to notebooklm.google.com. This is included with your Google
[00:01:05.109] This is included with your Google
[00:01:05.119] This is included with your Google account. So, as long as you open it in
[00:01:07.190] account. So, as long as you open it in
[00:01:07.200] account. So, as long as you open it in the same browser you use for Gmail or
[00:01:09.429] the same browser you use for Gmail or
[00:01:09.439] the same browser you use for Gmail or Gemini, it should open right up under

[00:01:12.230] Gemini, it should open right up under
[00:01:12.240] Gemini, it should open right up under that account. This is the main
[00:01:14.469] that account. This is the main
[00:01:14.479] that account. This is the main dashboard. This is where you'll find all
[00:01:16.550] dashboard. This is where you'll find all
[00:01:16.560] dashboard. This is where you'll find all of your notebooks you've already
[00:01:17.990] of your notebooks you've already
[00:01:18.000] of your notebooks you've already created. If you're brand new to this,
[00:01:19.910] created. If you're brand new to this,
[00:01:19.920] created. If you're brand new to this, you won't have any notebooks yet, except
[00:01:22.070] you won't have any notebooks yet, except
[00:01:22.080] you won't have any notebooks yet, except for the ones up here that are supplied
[00:01:24.390] for the ones up here that are supplied
[00:01:24.400] for the ones up here that are supplied by Google. Here you can see a notebook I
[00:01:27.190] by Google. Here you can see a notebook I
[00:01:27.200] by Google. Here you can see a notebook I recently created. Let me show you what
[00:01:29.190] recently created. Let me show you what
[00:01:29.200] recently created. Let me show you what this looks like, a completed notebook,
[00:01:31.190] this looks like, a completed notebook,
[00:01:31.200] this looks like, a completed notebook, so you know where we're headed with
[00:01:32.630] so you know where we're headed with
[00:01:32.640] so you know where we're headed with this. I can click on this notebook to
[00:01:34.870] this. I can click on this notebook to
[00:01:34.880] this. I can click on this notebook to open it up. This is a single notebook.
[00:01:37.830] open it up. This is a single notebook.
[00:01:37.840] open it up. This is a single notebook. Up here at the top, we have the title of
[00:01:39.910] Up here at the top, we have the title of
[00:01:39.920] Up here at the top, we have the title of the notebook. And here is a brief
[00:01:41.990] the notebook. And here is a brief
[00:01:42.000] the notebook. And here is a brief description of it. This is a notebook
[00:01:43.990] description of it. This is a notebook
[00:01:44.000] description of it. This is a notebook all about how to start a garden in
[00:01:45.990] all about how to start a garden in
[00:01:46.000] all about how to start a garden in Colorado. Each notebook is broken up
[00:01:48.630] Colorado. Each notebook is broken up
[00:01:48.640] Colorado. Each notebook is broken up into three columns. The column on the
[00:01:51.749] into three columns. The column on the
[00:01:51.759] into three columns. The column on the left are all of the sources. This is
[00:01:54.710] left are all of the sources. This is
[00:01:54.720] left are all of the sources. This is what makes up the knowledge base for the
[00:01:57.350] what makes up the knowledge base for the
[00:01:57.360] what makes up the knowledge base for the notebook. What makes Gemini notebook so
[00:02:00.389] notebook. What makes Gemini notebook so
[00:02:00.399] notebook. What makes Gemini notebook so unique is that all of the AI knowledge
[00:02:04.550] unique is that all of the AI knowledge
[00:02:04.560] unique is that all of the AI knowledge that is used when you are chatting with
[00:02:06.630] that is used when you are chatting with
[00:02:06.640] that is used when you are chatting with the notebook or creating things with the
[00:02:08.389] the notebook or creating things with the
[00:02:08.399] the notebook or creating things with the notebook are grounded in the sources
[00:02:11.270] notebook are grounded in the sources
[00:02:11.280] notebook are grounded in the sources that you provide. Here are all the
[00:02:13.830] that you provide. Here are all the
[00:02:13.840] that you provide. Here are all the sources for this notebook. So what that
[00:02:15.910] sources for this notebook. So what that
[00:02:15.920] sources for this notebook. So what that means is as I use the AI, it only pulls
[00:02:19.510] means is as I use the AI, it only pulls
[00:02:19.520] means is as I use the AI, it only pulls in information from these sources and
[00:02:21.589] in information from these sources and
[00:02:21.599] in information from these sources and from nowhere else. That's what grounded
[00:02:24.229] from nowhere else. That's what grounded
[00:02:24.239] from nowhere else. That's what grounded means. So this is really helpful for
[00:02:26.470] means. So this is really helpful for
[00:02:26.480] means. So this is really helpful for situations where you want an AI to only

[00:02:29.990] situations where you want an AI to only
[00:02:30.000] situations where you want an AI to only know certain information. As for the
[00:02:32.390] know certain information. As for the
[00:02:32.400] know certain information. As for the sources themselves, these can be
[00:02:34.309] sources themselves, these can be
[00:02:34.319] sources themselves, these can be websites, YouTube videos, anything from
[00:02:37.270] websites, YouTube videos, anything from
[00:02:37.280] websites, YouTube videos, anything from Google Drive, or you can even paste in
[00:02:39.990] Google Drive, or you can even paste in
[00:02:40.000] Google Drive, or you can even paste in some text. Over here in the middle
[00:02:42.869] some text. Over here in the middle
[00:02:42.879] some text. Over here in the middle column, we have the AI chat. This is
[00:02:45.750] column, we have the AI chat. This is
[00:02:45.760] column, we have the AI chat. This is where you can ask the AI questions about
[00:02:48.790] where you can ask the AI questions about
[00:02:48.800] where you can ask the AI questions about the information in these sources. If you
[00:02:51.509] the information in these sources. If you
[00:02:51.519] the information in these sources. If you ever use chat GBT or Gemini, it's very
[00:02:54.949] ever use chat GBT or Gemini, it's very
[00:02:54.959] ever use chat GBT or Gemini, it's very similar, but instead of pulling
[00:02:56.790] similar, but instead of pulling
[00:02:56.800] similar, but instead of pulling information from its own training or
[00:02:59.190] information from its own training or
[00:02:59.200] information from its own training or from the web, it's only using the
[00:03:01.509] from the web, it's only using the
[00:03:01.519] from the web, it's only using the information from the sources that you
[00:03:03.110] information from the sources that you
[00:03:03.120] information from the sources that you provided. And then over here on the
[00:03:04.869] provided. And then over here on the
[00:03:04.879] provided. And then over here on the right is studio. This is where you can
[00:03:07.910] right is studio. This is where you can
[00:03:07.920] right is studio. This is where you can create things with Gemini notebook. For
[00:03:11.110] create things with Gemini notebook. For
[00:03:11.120] create things with Gemini notebook. For instance, you can create audio
[00:03:12.390] instance, you can create audio
[00:03:12.400] instance, you can create audio overviews, slide decks, video overviews,
[00:03:15.110] overviews, slide decks, video overviews,
[00:03:15.120] overviews, slide decks, video overviews, reports, flashcards, infographics, and
[00:03:17.670] reports, flashcards, infographics, and
[00:03:17.680] reports, flashcards, infographics, and data tables. Let me show you what some
[00:03:19.830] data tables. Let me show you what some
[00:03:19.840] data tables. Let me show you what some of those look like. So, right here we
[00:03:22.229] of those look like. So, right here we
[00:03:22.239] of those look like. So, right here we have an infographic that was created. It
[00:03:24.869] have an infographic that was created. It
[00:03:24.879] have an infographic that was created. It pulled in the information from those
[00:03:26.390] pulled in the information from those
[00:03:26.400] pulled in the information from those sources and created for us an
[00:03:28.309] sources and created for us an
[00:03:28.319] sources and created for us an infographic based on that information.
[00:03:30.869] infographic based on that information.
[00:03:30.879] infographic based on that information. Here is a slide deck. It goes through
[00:03:33.830] Here is a slide deck. It goes through
[00:03:33.840] Here is a slide deck. It goes through how to start gardening in Colorado. And
[00:03:36.390] how to start gardening in Colorado. And
[00:03:36.400] how to start gardening in Colorado. And here's an example of one of the videos
[00:03:38.309] here's an example of one of the videos
[00:03:38.319] here's an example of one of the videos you can make with Gemini Notebook.
[00:03:40.149] you can make with Gemini Notebook.
[00:03:40.159] you can make with Gemini Notebook. >> These conditions you can yield massive
[00:03:42.470] >> These conditions you can yield massive
[00:03:42.480] >> These conditions you can yield massive healthy tomato plants. Survival here
[00:03:45.110] healthy tomato plants. Survival here
[00:03:45.120] healthy tomato plants. Survival here relies on building.

[00:03:46.149] relies on building.
[00:03:46.159] relies on building. >> So there's a lot you can do with Gemini
[00:03:48.550] >> So there's a lot you can do with Gemini
[00:03:48.560] >> So there's a lot you can do with Gemini Notebook. But before you feel
[00:03:50.229] Notebook. But before you feel
[00:03:50.239] Notebook. But before you feel overwhelmed, let's start easy. I'll
[00:03:53.110] overwhelmed, let's start easy. I'll
[00:03:53.120] overwhelmed, let's start easy. I'll click on the top left here to return
[00:03:55.270] click on the top left here to return
[00:03:55.280] click on the top left here to return back to my dashboard and let's start a
[00:03:58.550] back to my dashboard and let's start a
[00:03:58.560] back to my dashboard and let's start a new notebook together. To do that, you
[00:04:01.030] new notebook together. To do that, you
[00:04:01.040] new notebook together. To do that, you want to click right here where it says
[00:04:02.710] want to click right here where it says
[00:04:02.720] want to click right here where it says create new notebook. Each notebook is
[00:04:05.030] create new notebook. Each notebook is
[00:04:05.040] create new notebook. Each notebook is basically its own separate workspace for
[00:04:07.589] basically its own separate workspace for
[00:04:07.599] basically its own separate workspace for one topic or project. And the first
[00:04:10.309] one topic or project. And the first
[00:04:10.319] one topic or project. And the first thing it'll ask you to do when you
[00:04:12.149] thing it'll ask you to do when you
[00:04:12.159] thing it'll ask you to do when you create a notebook is to add in the
[00:04:14.869] create a notebook is to add in the
[00:04:14.879] create a notebook is to add in the sources. These are simply the
[00:04:16.629] sources. These are simply the
[00:04:16.639] sources. These are simply the information you want the notebook to use
[00:04:18.710] information you want the notebook to use
[00:04:18.720] information you want the notebook to use as its source of truth. And there's a
[00:04:21.270] as its source of truth. And there's a
[00:04:21.280] as its source of truth. And there's a lot of options for what you choose as a
[00:04:24.230] lot of options for what you choose as a
[00:04:24.240] lot of options for what you choose as a source. You can upload files, add links
[00:04:27.670] source. You can upload files, add links
[00:04:27.680] source. You can upload files, add links to websites or YouTube videos, add
[00:04:30.070] to websites or YouTube videos, add
[00:04:30.080] to websites or YouTube videos, add things for Drive, or even paste in text.
[00:04:32.790] things for Drive, or even paste in text.
[00:04:32.800] things for Drive, or even paste in text. Here, for instance, I have an article on
[00:04:35.350] Here, for instance, I have an article on
[00:04:35.360] Here, for instance, I have an article on this website that's all about how to
[00:04:37.590] this website that's all about how to
[00:04:37.600] this website that's all about how to garden in Colorado. So, I'm going to
[00:04:39.030] garden in Colorado. So, I'm going to
[00:04:39.040] garden in Colorado. So, I'm going to grab this. All you have to do is copy
[00:04:41.110] grab this. All you have to do is copy
[00:04:41.120] grab this. All you have to do is copy down the URL, come over to Gemini
[00:04:43.670] down the URL, come over to Gemini
[00:04:43.680] down the URL, come over to Gemini Notebook, and click on this button right
[00:04:46.230] Notebook, and click on this button right
[00:04:46.240] Notebook, and click on this button right here that says websites, and you can
[00:04:48.310] here that says websites, and you can
[00:04:48.320] here that says websites, and you can paste in that link. And as long as you
[00:04:50.710] paste in that link. And as long as you
[00:04:50.720] paste in that link. And as long as you separate it with a space, you can add
[00:04:52.629] separate it with a space, you can add
[00:04:52.639] separate it with a space, you can add some more. So, for instance, right here,
[00:04:54.950] some more. So, for instance, right here,
[00:04:54.960] some more. So, for instance, right here, there are some YouTube videos I want to
[00:04:56.550] there are some YouTube videos I want to
[00:04:56.560] there are some YouTube videos I want to add. I will right click on these uh
[00:04:58.950] add. I will right click on these uh
[00:04:58.960] add. I will right click on these uh these dots and click on share to get a

[00:05:01.749] these dots and click on share to get a
[00:05:01.759] these dots and click on share to get a link to this YouTube video. And then I
[00:05:04.390] link to this YouTube video. And then I
[00:05:04.400] link to this YouTube video. And then I can paste that one in there. So, that's
[00:05:06.870] can paste that one in there. So, that's
[00:05:06.880] can paste that one in there. So, that's my second source. Let's add another
[00:05:09.029] my second source. Let's add another
[00:05:09.039] my second source. Let's add another YouTube video. I will copy down this
[00:05:13.110] YouTube video. I will copy down this
[00:05:13.120] YouTube video. I will copy down this link and paste that one in. And you can
[00:05:16.070] link and paste that one in. And you can
[00:05:16.080] link and paste that one in. And you can do this with several other websites as
[00:05:18.230] do this with several other websites as
[00:05:18.240] do this with several other websites as well. We'll just use these three. And
[00:05:20.150] well. We'll just use these three. And
[00:05:20.160] well. We'll just use these three. And then I'll click on insert. And you'll
[00:05:21.909] then I'll click on insert. And you'll
[00:05:21.919] then I'll click on insert. And you'll notice that over here on the left, those
[00:05:23.590] notice that over here on the left, those
[00:05:23.600] notice that over here on the left, those are now being loaded in. Now, you can
[00:05:26.070] are now being loaded in. Now, you can
[00:05:26.080] are now being loaded in. Now, you can always add more sources after that
[00:05:28.310] always add more sources after that
[00:05:28.320] always add more sources after that initial setup by clicking right here
[00:05:30.629] initial setup by clicking right here
[00:05:30.639] initial setup by clicking right here where it says add sources. And this
[00:05:32.790] where it says add sources. And this
[00:05:32.800] where it says add sources. And this time, I'm going to upload a file cuz I
[00:05:35.270] time, I'm going to upload a file cuz I
[00:05:35.280] time, I'm going to upload a file cuz I have one on my computer that's all about
[00:05:37.510] have one on my computer that's all about
[00:05:37.520] have one on my computer that's all about local vegetables. There it is. So, I
[00:05:40.310] local vegetables. There it is. So, I
[00:05:40.320] local vegetables. There it is. So, I will select that one. Click on open. And
[00:05:43.350] will select that one. Click on open. And
[00:05:43.360] will select that one. Click on open. And now you'll see that one's being added.
[00:05:45.029] now you'll see that one's being added.
[00:05:45.039] now you'll see that one's being added. Now, if you're completely at a loss as
[00:05:47.350] Now, if you're completely at a loss as
[00:05:47.360] Now, if you're completely at a loss as to where to start because you don't have
[00:05:49.590] to where to start because you don't have
[00:05:49.600] to where to start because you don't have any sources, then that is when you want
[00:05:52.230] any sources, then that is when you want
[00:05:52.240] any sources, then that is when you want to use the research tool. So, right here
[00:05:55.510] to use the research tool. So, right here
[00:05:55.520] to use the research tool. So, right here on the left, you'll see that there's an
[00:05:57.909] on the left, you'll see that there's an
[00:05:57.919] on the left, you'll see that there's an option to either do fast research or
[00:06:00.469] option to either do fast research or
[00:06:00.479] option to either do fast research or deep research. And this can find
[00:06:03.749] deep research. And this can find
[00:06:03.759] deep research. And this can find information and sources from the web to
[00:06:06.230] information and sources from the web to
[00:06:06.240] information and sources from the web to bring them into the notebook as sources.
[00:06:09.510] bring them into the notebook as sources.
[00:06:09.520] bring them into the notebook as sources. I will use fast research for this one.
[00:06:12.070] I will use fast research for this one.
[00:06:12.080] I will use fast research for this one. And I will type in here what I'm going
[00:06:14.469] And I will type in here what I'm going
[00:06:14.479] And I will type in here what I'm going to use this notebook for, what the topic
[00:06:16.390] to use this notebook for, what the topic
[00:06:16.400] to use this notebook for, what the topic of the notebook is, which is gardening
[00:06:19.350] of the notebook is, which is gardening
[00:06:19.360] of the notebook is, which is gardening in Colorado. And if I click on search

[00:06:22.550] in Colorado. And if I click on search
[00:06:22.560] in Colorado. And if I click on search there, you can see that it found these
[00:06:24.950] there, you can see that it found these
[00:06:24.960] there, you can see that it found these websites. Now, if you click right here
[00:06:27.029] websites. Now, if you click right here
[00:06:27.039] websites. Now, if you click right here where it says seven more sources, it's
[00:06:29.029] where it says seven more sources, it's
[00:06:29.039] where it says seven more sources, it's going to be different depending on how
[00:06:30.230] going to be different depending on how
[00:06:30.240] going to be different depending on how many sources it found for you. You can
[00:06:32.390] many sources it found for you. You can
[00:06:32.400] many sources it found for you. You can see the names of all the websites, and
[00:06:34.390] see the names of all the websites, and
[00:06:34.400] see the names of all the websites, and you can actually click on them to open
[00:06:35.909] you can actually click on them to open
[00:06:35.919] you can actually click on them to open them to see if they are sources that you
[00:06:38.390] them to see if they are sources that you
[00:06:38.400] them to see if they are sources that you want to use. here. Actually, I already
[00:06:41.029] want to use. here. Actually, I already
[00:06:41.039] want to use. here. Actually, I already had one of those in there,
[00:06:42.070] had one of those in there,
[00:06:42.080] had one of those in there, coincidentally, but this one's new, and
[00:06:44.390] coincidentally, but this one's new, and
[00:06:44.400] coincidentally, but this one's new, and this one's new. And as long as you're
[00:06:46.629] this one's new. And as long as you're
[00:06:46.639] this one's new. And as long as you're happy with them, you can check off the
[00:06:48.070] happy with them, you can check off the
[00:06:48.080] happy with them, you can check off the ones you want to bring in as sources,
[00:06:50.550] ones you want to bring in as sources,
[00:06:50.560] ones you want to bring in as sources, and then click on import. And you'll see
[00:06:52.790] and then click on import. And you'll see
[00:06:52.800] and then click on import. And you'll see all of those are now being added here on
[00:06:54.950] all of those are now being added here on
[00:06:54.960] all of those are now being added here on the left. It is important that you're
[00:06:56.870] the left. It is important that you're
[00:06:56.880] the left. It is important that you're careful about what sources you add to
[00:06:59.670] careful about what sources you add to
[00:06:59.680] careful about what sources you add to your notebooks because the notebooks are
[00:07:01.909] your notebooks because the notebooks are
[00:07:01.919] your notebooks because the notebooks are grounded in that information. So, only
[00:07:03.830] grounded in that information. So, only
[00:07:03.840] grounded in that information. So, only use reputable websites and websites that
[00:07:06.469] use reputable websites and websites that
[00:07:06.479] use reputable websites and websites that you trust. over here. Now you see all of
[00:07:09.270] you trust. over here. Now you see all of
[00:07:09.280] you trust. over here. Now you see all of them are added but two of them are
[00:07:11.110] them are added but two of them are
[00:07:11.120] them are added but two of them are highlighted in red and that's because
[00:07:13.749] highlighted in red and that's because
[00:07:13.759] highlighted in red and that's because Gemini Notebook can't use every website
[00:07:17.670] Gemini Notebook can't use every website
[00:07:17.680] Gemini Notebook can't use every website as a source. Some are behind a payw wall
[00:07:21.350] as a source. Some are behind a payw wall
[00:07:21.360] as a source. Some are behind a payw wall or there's other reasons they can't be
[00:07:23.589] or there's other reasons they can't be
[00:07:23.599] or there's other reasons they can't be added. Whenever that happens, instead of
[00:07:25.990] added. Whenever that happens, instead of
[00:07:26.000] added. Whenever that happens, instead of trying to fight it, usually the best
[00:07:28.150] trying to fight it, usually the best
[00:07:28.160] trying to fight it, usually the best thing to do is just to click on more
[00:07:30.070] thing to do is just to click on more
[00:07:30.080] thing to do is just to click on more here and click on remove all failed
[00:07:32.550] here and click on remove all failed
[00:07:32.560] here and click on remove all failed sources. that will then delete all the

[00:07:35.110] sources. that will then delete all the
[00:07:35.120] sources. that will then delete all the sources that weren't able to be uploaded
[00:07:37.589] sources that weren't able to be uploaded
[00:07:37.599] sources that weren't able to be uploaded and only keep the ones that actually
[00:07:39.589] and only keep the ones that actually
[00:07:39.599] and only keep the ones that actually worked. As time goes on, your list of
[00:07:42.150] worked. As time goes on, your list of
[00:07:42.160] worked. As time goes on, your list of sources is going to grow and grow and
[00:07:44.629] sources is going to grow and grow and
[00:07:44.639] sources is going to grow and grow and grow and it can at times become a little
[00:07:47.189] grow and it can at times become a little
[00:07:47.199] grow and it can at times become a little bit unwieldy and that's when you want
[00:07:49.430] bit unwieldy and that's when you want
[00:07:49.440] bit unwieldy and that's when you want to use the auto label feature. You can
[00:07:51.670] to use the auto label feature. You can
[00:07:51.680] to use the auto label feature. You can find that right here. And if you click
[00:07:53.430] find that right here. And if you click
[00:07:53.440] find that right here. And if you click on this, that will use AI to
[00:07:55.990] on this, that will use AI to
[00:07:56.000] on this, that will use AI to automatically group your sources
[00:07:57.830] automatically group your sources
[00:07:57.840] automatically group your sources together. So you can see right here we
[00:08:00.629] together. So you can see right here we
[00:08:00.639] together. So you can see right here we have a section now for fruit
[00:08:02.309] have a section now for fruit
[00:08:02.319] have a section now for fruit cultivation, a section for general
[00:08:04.629] cultivation, a section for general
[00:08:04.639] cultivation, a section for general gardening, and a section for soil and
[00:08:07.189] gardening, and a section for soil and
[00:08:07.199] gardening, and a section for soil and pests. And do note that one source can
[00:08:10.710] pests. And do note that one source can
[00:08:10.720] pests. And do note that one source can be inside multiple of these labels if
[00:08:14.790] be inside multiple of these labels if
[00:08:14.800] be inside multiple of these labels if multiple labels apply to the same
[00:08:16.710] multiple labels apply to the same
[00:08:16.720] multiple labels apply to the same source. But this is a nice way just to
[00:08:18.469] source. But this is a nice way just to
[00:08:18.479] source. But this is a nice way just to keep it all nice and organized. If you
[00:08:20.629] keep it all nice and organized. If you
[00:08:20.639] keep it all nice and organized. If you need to make any changes, you can open
[00:08:22.950] need to make any changes, you can open
[00:08:22.960] need to make any changes, you can open up the label, click on these three dots,
[00:08:25.029] up the label, click on these three dots,
[00:08:25.039] up the label, click on these three dots, and either remove the source entirely
[00:08:27.270] and either remove the source entirely
[00:08:27.280] and either remove the source entirely from your notebook, rename it, or give
[00:08:29.909] from your notebook, rename it, or give
[00:08:29.919] from your notebook, rename it, or give it a different label. With our sources
[00:08:31.990] it a different label. With our sources
[00:08:32.000] it a different label. With our sources now dialed in, let's look at what was
[00:08:34.949] now dialed in, let's look at what was
[00:08:34.959] now dialed in, let's look at what was automatically set up for us. Up here at
[00:08:37.269] automatically set up for us. Up here at
[00:08:37.279] automatically set up for us. Up here at the top, you'll notice that it
[00:08:38.709] the top, you'll notice that it
[00:08:38.719] the top, you'll notice that it automatically created a title for this
[00:08:41.110] automatically created a title for this
[00:08:41.120] automatically created a title for this notebook. Here's a name, Cultivating
[00:08:43.350] notebook. Here's a name, Cultivating
[00:08:43.360] notebook. Here's a name, Cultivating Success: A Guide to Colorado Vegetable
[00:08:45.750] Success: A Guide to Colorado Vegetable
[00:08:45.760] Success: A Guide to Colorado Vegetable Gardening. I think that title is okay.
[00:08:48.550] Gardening. I think that title is okay.
[00:08:48.560] Gardening. I think that title is okay. Certainly clever, but I don't think it's

[00:08:51.030] Certainly clever, but I don't think it's
[00:08:51.040] Certainly clever, but I don't think it's that great for when I'm quickly glancing
[00:08:53.190] that great for when I'm quickly glancing
[00:08:53.200] that great for when I'm quickly glancing at the dashboard and want to easily find
[00:08:55.910] at the dashboard and want to easily find
[00:08:55.920] at the dashboard and want to easily find this notebook. So, I'm going to rename
[00:08:58.310] this notebook. So, I'm going to rename
[00:08:58.320] this notebook. So, I'm going to rename it. You can easily do that just by
[00:09:00.630] it. You can easily do that just by
[00:09:00.640] it. You can easily do that just by highlighting the text up here and typing
[00:09:02.389] highlighting the text up here and typing
[00:09:02.399] highlighting the text up here and typing in a new name. So, I will call this one
[00:09:04.949] in a new name. So, I will call this one
[00:09:04.959] in a new name. So, I will call this one vegetable gardening in Colorado. And it
[00:09:07.269] vegetable gardening in Colorado. And it
[00:09:07.279] vegetable gardening in Colorado. And it also updates the title here as well.
[00:09:10.150] also updates the title here as well.
[00:09:10.160] also updates the title here as well. Under that, we have a summary of the
[00:09:12.870] Under that, we have a summary of the
[00:09:12.880] Under that, we have a summary of the information in this notebook. To
[00:09:15.829] information in this notebook. To
[00:09:15.839] information in this notebook. To customize any of this, you can click on
[00:09:17.590] customize any of this, you can click on
[00:09:17.600] customize any of this, you can click on this button right here that says
[00:09:19.110] this button right here that says
[00:09:19.120] this button right here that says customize. This is another spot where
[00:09:21.509] customize. This is another spot where
[00:09:21.519] customize. This is another spot where you can change the title. And you can
[00:09:23.430] you can change the title. And you can
[00:09:23.440] you can change the title. And you can also set a custom notebook summary that
[00:09:26.470] also set a custom notebook summary that
[00:09:26.480] also set a custom notebook summary that will replace this summary right here.
[00:09:29.590] will replace this summary right here.
[00:09:29.600] will replace this summary right here. So, if we click again on customize, I
[00:09:31.910] So, if we click again on customize, I
[00:09:31.920] So, if we click again on customize, I can toggle that on and just say
[00:09:33.910] can toggle that on and just say
[00:09:33.920] can toggle that on and just say something simple like this notebook is
[00:09:35.910] something simple like this notebook is
[00:09:35.920] something simple like this notebook is all about how to create a vegetable
[00:09:37.430] all about how to create a vegetable
[00:09:37.440] all about how to create a vegetable garden in Colorado. And if I click on
[00:09:40.070] garden in Colorado. And if I click on
[00:09:40.080] garden in Colorado. And if I click on done, you'll see that the summary here
[00:09:42.389] done, you'll see that the summary here
[00:09:42.399] done, you'll see that the summary here has now been updated to that much
[00:09:44.630] has now been updated to that much
[00:09:44.640] has now been updated to that much shorter summary. Opening customize back
[00:09:47.910] shorter summary. Opening customize back
[00:09:47.920] shorter summary. Opening customize back up, you'll see up here is a place where
[00:09:51.190] up, you'll see up here is a place where
[00:09:51.200] up, you'll see up here is a place where you can upload an image. If we return
[00:09:53.750] you can upload an image. If we return
[00:09:53.760] you can upload an image. If we return back to my notebook dashboard, you'll
[00:09:56.870] back to my notebook dashboard, you'll
[00:09:56.880] back to my notebook dashboard, you'll see the notebook right here that we just
[00:09:58.550] see the notebook right here that we just
[00:09:58.560] see the notebook right here that we just started. And this is the one that I
[00:10:00.150] started. And this is the one that I
[00:10:00.160] started. And this is the one that I showed you earlier. And if you'll
[00:10:01.670] showed you earlier. And if you'll
[00:10:01.680] showed you earlier. And if you'll notice, there's a nice image here, so
[00:10:03.750] notice, there's a nice image here, so
[00:10:03.760] notice, there's a nice image here, so it's easier to find. So, if you want to

[00:10:06.310] it's easier to find. So, if you want to
[00:10:06.320] it's easier to find. So, if you want to create a background image like that, you
[00:10:08.790] create a background image like that, you
[00:10:08.800] create a background image like that, you can do that inside the customize
[00:10:10.550] can do that inside the customize
[00:10:10.560] can do that inside the customize section. What I usually do is go over to
[00:10:12.949] section. What I usually do is go over to
[00:10:12.959] section. What I usually do is go over to Gemini and ask it to create an image for
[00:10:15.590] Gemini and ask it to create an image for
[00:10:15.600] Gemini and ask it to create an image for me. I then download that image by
[00:10:17.670] me. I then download that image by
[00:10:17.680] me. I then download that image by clicking right here. And then returning
[00:10:19.590] clicking right here. And then returning
[00:10:19.600] clicking right here. And then returning back to Gemini notebook, I can click on
[00:10:21.829] back to Gemini notebook, I can click on
[00:10:21.839] back to Gemini notebook, I can click on upload and select that image. There we
[00:10:23.910] upload and select that image. There we
[00:10:23.920] upload and select that image. There we go. Now, clicking on done, you'll see
[00:10:26.870] go. Now, clicking on done, you'll see
[00:10:26.880] go. Now, clicking on done, you'll see that image back here. And it makes it a
[00:10:29.670] that image back here. And it makes it a
[00:10:29.680] that image back here. And it makes it a lot nicer, especially on the dashboard.
[00:10:31.750] lot nicer, especially on the dashboard.
[00:10:31.760] lot nicer, especially on the dashboard. It makes it easier to find this notebook
[00:10:33.750] It makes it easier to find this notebook
[00:10:33.760] It makes it easier to find this notebook in the future.
[00:10:35.110] in the future.
[00:10:35.120] in the future. Let's go back into it though. I think we
[00:10:37.030] Let's go back into it though. I think we
[00:10:37.040] Let's go back into it though. I think we are done setting up the notebook and we
[00:10:39.110] are done setting up the notebook and we
[00:10:39.120] are done setting up the notebook and we can start using it. The two sections for
[00:10:42.550] can start using it. The two sections for
[00:10:42.560] can start using it. The two sections for using the notebook are the middle column
[00:10:44.790] using the notebook are the middle column
[00:10:44.800] using the notebook are the middle column and the column on the right. We'll start
[00:10:46.310] and the column on the right. We'll start
[00:10:46.320] and the column on the right. We'll start with the middle one. This is the chat.
[00:10:48.710] with the middle one. This is the chat.
[00:10:48.720] with the middle one. This is the chat. This is where you can chat with the AI
[00:10:51.910] This is where you can chat with the AI
[00:10:51.920] This is where you can chat with the AI that has access to all of the knowledge
[00:10:54.230] that has access to all of the knowledge
[00:10:54.240] that has access to all of the knowledge you have in your sources. So it's very
[00:10:56.389] you have in your sources. So it's very
[00:10:56.399] you have in your sources. So it's very similar to using Gemini directly except
[00:10:59.590] similar to using Gemini directly except
[00:10:59.600] similar to using Gemini directly except it is locked in and only using these
[00:11:02.389] it is locked in and only using these
[00:11:02.399] it is locked in and only using these sources as its knowledge base. So here
[00:11:05.750] sources as its knowledge base. So here
[00:11:05.760] sources as its knowledge base. So here for instance I can ask it a simple
[00:11:07.829] for instance I can ask it a simple
[00:11:07.839] for instance I can ask it a simple question like what are the best type of
[00:11:11.750] question like what are the best type of
[00:11:11.760] question like what are the best type of vegetables to grow in Colorado for
[00:11:16.310] vegetables to grow in Colorado for
[00:11:16.320] vegetables to grow in Colorado for beginners?
[00:11:18.389] beginners?
[00:11:18.399] beginners? And then here is the answer. It says,
[00:11:19.910] And then here is the answer. It says,
[00:11:19.920] And then here is the answer. It says, "Colorado's sunshine makes it fantastic
[00:11:22.470] "Colorado's sunshine makes it fantastic
[00:11:22.480] "Colorado's sunshine makes it fantastic for gardening, but the climate can be

[00:11:24.870] for gardening, but the climate can be
[00:11:24.880] for gardening, but the climate can be quite dry, which creates some
[00:11:26.630] quite dry, which creates some
[00:11:26.640] quite dry, which creates some difficulties. So, in the warm seasons,
[00:11:29.110] difficulties. So, in the warm seasons,
[00:11:29.120] difficulties. So, in the warm seasons, you want to grow tomatoes and peppers,
[00:11:31.350] you want to grow tomatoes and peppers,
[00:11:31.360] you want to grow tomatoes and peppers, and in the cooler seasons, you can grow
[00:11:33.190] and in the cooler seasons, you can grow
[00:11:33.200] and in the cooler seasons, you can grow radishes, lettuce, beets, peas, and
[00:11:35.670] radishes, lettuce, beets, peas, and
[00:11:35.680] radishes, lettuce, beets, peas, and cabbage." And it gives some beginner
[00:11:37.509] cabbage." And it gives some beginner
[00:11:37.519] cabbage." And it gives some beginner tips. Of course, you can then ask some
[00:11:39.750] tips. Of course, you can then ask some
[00:11:39.760] tips. Of course, you can then ask some follow questions. So, okay, let's say I
[00:11:43.030] follow questions. So, okay, let's say I
[00:11:43.040] follow questions. So, okay, let's say I only want to grow one to get started.
[00:11:45.829] only want to grow one to get started.
[00:11:45.839] only want to grow one to get started. Which would be the easiest? And here you
[00:11:48.949] Which would be the easiest? And here you
[00:11:48.959] Which would be the easiest? And here you can see it gave me a new response and
[00:11:50.870] can see it gave me a new response and
[00:11:50.880] can see it gave me a new response and narrowed down the list for me to
[00:11:52.470] narrowed down the list for me to
[00:11:52.480] narrowed down the list for me to radishes and tells me why radishes are
[00:11:54.710] radishes and tells me why radishes are
[00:11:54.720] radishes and tells me why radishes are one of the easiest to grow. If at any
[00:11:56.790] one of the easiest to grow. If at any
[00:11:56.800] one of the easiest to grow. If at any point you're stuck and you're not quite
[00:11:58.470] point you're stuck and you're not quite
[00:11:58.480] point you're stuck and you're not quite sure what to ask, Gemini Notebook always
[00:12:01.590] sure what to ask, Gemini Notebook always
[00:12:01.600] sure what to ask, Gemini Notebook always gives you suggestions right here as for
[00:12:04.949] gives you suggestions right here as for
[00:12:04.959] gives you suggestions right here as for prompts you can start with or prompts
[00:12:06.790] prompts you can start with or prompts
[00:12:06.800] prompts you can start with or prompts you can follow up with. And you can
[00:12:08.550] you can follow up with. And you can
[00:12:08.560] you can follow up with. And you can click on any of these and it will
[00:12:09.910] click on any of these and it will
[00:12:09.920] click on any of these and it will automatically send it. As you're working
[00:12:12.629] automatically send it. As you're working
[00:12:12.639] automatically send it. As you're working inside chat, what I want you to notice
[00:12:14.550] inside chat, what I want you to notice
[00:12:14.560] inside chat, what I want you to notice is right here, it tells you how many
[00:12:17.269] is right here, it tells you how many
[00:12:17.279] is right here, it tells you how many sources are being used to answer your
[00:12:20.710] sources are being used to answer your
[00:12:20.720] sources are being used to answer your query. And you can change this by coming
[00:12:24.470] query. And you can change this by coming
[00:12:24.480] query. And you can change this by coming over to the sources here on the left and
[00:12:27.910] over to the sources here on the left and
[00:12:27.920] over to the sources here on the left and unselecting any sources that you don't
[00:12:31.030] unselecting any sources that you don't
[00:12:31.040] unselecting any sources that you don't want the chat to use when answering your
[00:12:33.990] want the chat to use when answering your
[00:12:34.000] want the chat to use when answering your question. So let's say for instance I'm
[00:12:37.829] question. So let's say for instance I'm
[00:12:37.839] question. So let's say for instance I'm looking at all of these sources and I
[00:12:40.870] looking at all of these sources and I
[00:12:40.880] looking at all of these sources and I start asking some questions and I decide
[00:12:43.269] start asking some questions and I decide
[00:12:43.279] start asking some questions and I decide that I just want to use one of these as

[00:12:46.949] that I just want to use one of these as
[00:12:46.959] that I just want to use one of these as the source of truth for this notebook at
[00:12:49.670] the source of truth for this notebook at
[00:12:49.680] the source of truth for this notebook at least temporarily. What I can do is
[00:12:52.470] least temporarily. What I can do is
[00:12:52.480] least temporarily. What I can do is click on this button which will unselect
[00:12:54.790] click on this button which will unselect
[00:12:54.800] click on this button which will unselect all of the sources and then I'll select
[00:12:57.190] all of the sources and then I'll select
[00:12:57.200] all of the sources and then I'll select this one YouTube video that I want to
[00:12:59.430] this one YouTube video that I want to
[00:12:59.440] this one YouTube video that I want to use as my source of truth. Coming over
[00:13:02.230] use as my source of truth. Coming over
[00:13:02.240] use as my source of truth. Coming over here to the chat now, you'll see there's
[00:13:04.550] here to the chat now, you'll see there's
[00:13:04.560] here to the chat now, you'll see there's only one source listed. So, if I ask a
[00:13:07.990] only one source listed. So, if I ask a
[00:13:08.000] only one source listed. So, if I ask a question now, it's not going to use all
[00:13:10.069] question now, it's not going to use all
[00:13:10.079] question now, it's not going to use all of these sources. It's just going to use
[00:13:11.670] of these sources. It's just going to use
[00:13:11.680] of these sources. It's just going to use that single one. And of course, you can
[00:13:13.910] that single one. And of course, you can
[00:13:13.920] that single one. And of course, you can do that with as many or as few sources
[00:13:16.470] do that with as many or as few sources
[00:13:16.480] do that with as many or as few sources as you want. To further refine the
[00:13:19.030] as you want. To further refine the
[00:13:19.040] as you want. To further refine the responses you get from the chat, you can
[00:13:21.110] responses you get from the chat, you can
[00:13:21.120] responses you get from the chat, you can come to the top of the chat and click on
[00:13:23.190] come to the top of the chat and click on
[00:13:23.200] come to the top of the chat and click on this button right here that has these
[00:13:25.110] this button right here that has these
[00:13:25.120] this button right here that has these three lines and you can configure the
[00:13:27.990] three lines and you can configure the
[00:13:28.000] three lines and you can configure the chat. So, first you can define the
[00:13:30.550] chat. So, first you can define the
[00:13:30.560] chat. So, first you can define the conversational goal, style, or role. You
[00:13:33.750] conversational goal, style, or role. You
[00:13:33.760] conversational goal, style, or role. You can have the default one, which is best
[00:13:35.430] can have the default one, which is best
[00:13:35.440] can have the default one, which is best for general purpose research and
[00:13:37.190] for general purpose research and
[00:13:37.200] for general purpose research and brainstorming tasks. Or if you're using
[00:13:39.670] brainstorming tasks. Or if you're using
[00:13:39.680] brainstorming tasks. Or if you're using this notebook to learn about something,
[00:13:41.750] this notebook to learn about something,
[00:13:41.760] this notebook to learn about something, you can turn on learning guide, or you
[00:13:44.150] you can turn on learning guide, or you
[00:13:44.160] you can turn on learning guide, or you can give it custom instructions. I
[00:13:46.550] can give it custom instructions. I
[00:13:46.560] can give it custom instructions. I usually leave it on default most of the
[00:13:48.949] usually leave it on default most of the
[00:13:48.959] usually leave it on default most of the time. You can also choose your response
[00:13:51.509] time. You can also choose your response
[00:13:51.519] time. You can also choose your response length. You can keep it at default,
[00:13:53.430] length. You can keep it at default,
[00:13:53.440] length. You can keep it at default, longer, or shorter. And honestly, when I
[00:13:56.389] longer, or shorter. And honestly, when I
[00:13:56.399] longer, or shorter. And honestly, when I remember to do it, I usually switch it
[00:13:58.470] remember to do it, I usually switch it
[00:13:58.480] remember to do it, I usually switch it over to shorter because I find that
[00:14:00.310] over to shorter because I find that
[00:14:00.320] over to shorter because I find that Gemini Notebook tends to give longer

[00:14:03.030] Gemini Notebook tends to give longer
[00:14:03.040] Gemini Notebook tends to give longer responses than I need. So, I will select
[00:14:05.990] responses than I need. So, I will select
[00:14:06.000] responses than I need. So, I will select shorter and click on save. There is more
[00:14:08.550] shorter and click on save. There is more
[00:14:08.560] shorter and click on save. There is more you can do with chat and we will return
[00:14:10.550] you can do with chat and we will return
[00:14:10.560] you can do with chat and we will return to it in a few moments. But I first want
[00:14:12.790] to it in a few moments. But I first want
[00:14:12.800] to it in a few moments. But I first want to show you what you can do inside of
[00:14:14.710] to show you what you can do inside of
[00:14:14.720] to show you what you can do inside of Studio over here on the right. Before we
[00:14:16.629] Studio over here on the right. Before we
[00:14:16.639] Studio over here on the right. Before we get to that though, I have a quick favor
[00:14:18.389] get to that though, I have a quick favor
[00:14:18.399] get to that though, I have a quick favor to ask you. I release all of my AI
[00:14:20.629] to ask you. I release all of my AI
[00:14:20.639] to ask you. I release all of my AI courses for free on YouTube because I
[00:14:22.710] courses for free on YouTube because I
[00:14:22.720] courses for free on YouTube because I don't think that learning how to use AI
[00:14:24.790] don't think that learning how to use AI
[00:14:24.800] don't think that learning how to use AI should be locked behind a payw wall. If
[00:14:27.110] should be locked behind a payw wall. If
[00:14:27.120] should be locked behind a payw wall. If you appreciate that, all I ask is that
[00:14:29.030] you appreciate that, all I ask is that
[00:14:29.040] you appreciate that, all I ask is that you give this video a thumbs up and let
[00:14:31.110] you give this video a thumbs up and let
[00:14:31.120] you give this video a thumbs up and let me know that you appreciate it in the
[00:14:32.949] me know that you appreciate it in the
[00:14:32.959] me know that you appreciate it in the comment section down below. I still read
[00:14:35.189] comment section down below. I still read
[00:14:35.199] comment section down below. I still read and respond to every single comment
[00:14:37.030] and respond to every single comment
[00:14:37.040] and respond to every single comment myself and it's what motivates me to
[00:14:39.269] myself and it's what motivates me to
[00:14:39.279] myself and it's what motivates me to keep making this content. If you leave a
[00:14:41.430] keep making this content. If you leave a
[00:14:41.440] keep making this content. If you leave a comment, I would really appreciate it.
[00:14:43.509] comment, I would really appreciate it.
[00:14:43.519] comment, I would really appreciate it. Now, let's talk about Studio. Studio is
[00:14:46.310] Now, let's talk about Studio. Studio is
[00:14:46.320] Now, let's talk about Studio. Studio is my favorite part of Gemini Notebook and
[00:14:48.230] my favorite part of Gemini Notebook and
[00:14:48.240] my favorite part of Gemini Notebook and is arguably the most fun part about
[00:14:50.629] is arguably the most fun part about
[00:14:50.639] is arguably the most fun part about Gemini Notebook. You can use this to
[00:14:52.949] Gemini Notebook. You can use this to
[00:14:52.959] Gemini Notebook. You can use this to generate these different kinds of
[00:14:54.310] generate these different kinds of
[00:14:54.320] generate these different kinds of assets. There are currently nine of them
[00:14:56.790] assets. There are currently nine of them
[00:14:56.800] assets. There are currently nine of them and there may be more by the time you're
[00:14:58.470] and there may be more by the time you're
[00:14:58.480] and there may be more by the time you're watching this video. We have audio
[00:15:00.470] watching this video. We have audio
[00:15:00.480] watching this video. We have audio overviews, which are essentially audio
[00:15:03.030] overviews, which are essentially audio
[00:15:03.040] overviews, which are essentially audio files of podcasts that were generated
[00:15:05.430] files of podcasts that were generated
[00:15:05.440] files of podcasts that were generated with AI. We have slide decks which are
[00:15:08.069] with AI. We have slide decks which are
[00:15:08.079] with AI. We have slide decks which are like powerpoints, video overviews, mind
[00:15:11.189] like powerpoints, video overviews, mind
[00:15:11.199] like powerpoints, video overviews, mind maps, reports, flashcards, quizzes,

[00:15:13.750] maps, reports, flashcards, quizzes,
[00:15:13.760] maps, reports, flashcards, quizzes, infographics, and data tables. So, let
[00:15:16.629] infographics, and data tables. So, let
[00:15:16.639] infographics, and data tables. So, let me first show you audio overview. To
[00:15:19.030] me first show you audio overview. To
[00:15:19.040] me first show you audio overview. To create any of these assets, all you have
[00:15:21.110] create any of these assets, all you have
[00:15:21.120] create any of these assets, all you have to do is click on the card and that will
[00:15:23.990] to do is click on the card and that will
[00:15:24.000] to do is click on the card and that will open up the customize menu. For the
[00:15:26.470] open up the customize menu. For the
[00:15:26.480] open up the customize menu. For the audio overviews, there are four
[00:15:28.389] audio overviews, there are four
[00:15:28.399] audio overviews, there are four different formats. The first is a deep
[00:15:31.189] different formats. The first is a deep
[00:15:31.199] different formats. The first is a deep dive, which is a lively conversation
[00:15:33.030] dive, which is a lively conversation
[00:15:33.040] dive, which is a lively conversation between two different hosts. The second
[00:15:34.949] between two different hosts. The second
[00:15:34.959] between two different hosts. The second is called brief and that's a shorter
[00:15:37.110] is called brief and that's a shorter
[00:15:37.120] is called brief and that's a shorter overview about the concept and the core
[00:15:39.670] overview about the concept and the core
[00:15:39.680] overview about the concept and the core ideas of your notebook. Then we have
[00:15:42.150] ideas of your notebook. Then we have
[00:15:42.160] ideas of your notebook. Then we have critique where an expert reviews the
[00:15:44.389] critique where an expert reviews the
[00:15:44.399] critique where an expert reviews the sources and offers constructive
[00:15:46.069] sources and offers constructive
[00:15:46.079] sources and offers constructive feedback. And then we have debate where
[00:15:48.629] feedback. And then we have debate where
[00:15:48.639] feedback. And then we have debate where the two different hosts will talk
[00:15:50.710] the two different hosts will talk
[00:15:50.720] the two different hosts will talk against each other and have a debate
[00:15:53.509] against each other and have a debate
[00:15:53.519] against each other and have a debate about a topic concerning your notebook.
[00:15:56.310] about a topic concerning your notebook.
[00:15:56.320] about a topic concerning your notebook. We're just going to stick with deep dive
[00:15:57.749] We're just going to stick with deep dive
[00:15:57.759] We're just going to stick with deep dive for this one. You can then choose the
[00:15:59.910] for this one. You can then choose the
[00:15:59.920] for this one. You can then choose the language and the length, short, default
[00:16:03.030] language and the length, short, default
[00:16:03.040] language and the length, short, default or long. And then you can choose which
[00:16:05.670] or long. And then you can choose which
[00:16:05.680] or long. And then you can choose which sources you want to be used in the
[00:16:08.389] sources you want to be used in the
[00:16:08.399] sources you want to be used in the creation process for this asset, which
[00:16:10.870] creation process for this asset, which
[00:16:10.880] creation process for this asset, which in this case is the audio overview. So
[00:16:13.189] in this case is the audio overview. So
[00:16:13.199] in this case is the audio overview. So you can select all of them or you can
[00:16:15.350] you can select all of them or you can
[00:16:15.360] you can select all of them or you can just select some of them. And then
[00:16:17.110] just select some of them. And then
[00:16:17.120] just select some of them. And then finally, you can tell the AI hosts what
[00:16:19.749] finally, you can tell the AI hosts what
[00:16:19.759] finally, you can tell the AI hosts what to focus on in this episode. You can
[00:16:22.710] to focus on in this episode. You can
[00:16:22.720] to focus on in this episode. You can either leave this blank and just leave
[00:16:24.310] either leave this blank and just leave
[00:16:24.320] either leave this blank and just leave it up to the AI or you can type in a
[00:16:27.030] it up to the AI or you can type in a
[00:16:27.040] it up to the AI or you can type in a response or use one of these

[00:16:28.710] response or use one of these
[00:16:28.720] response or use one of these suggestions. So, I will select this one
[00:16:31.189] suggestions. So, I will select this one
[00:16:31.199] suggestions. So, I will select this one that says planning the layout for the
[00:16:33.189] that says planning the layout for the
[00:16:33.199] that says planning the layout for the garden. Once you have everything
[00:16:34.710] garden. Once you have everything
[00:16:34.720] garden. Once you have everything selected, you can click on generate. And
[00:16:37.670] selected, you can click on generate. And
[00:16:37.680] selected, you can click on generate. And then you'll see right here that it's
[00:16:39.749] then you'll see right here that it's
[00:16:39.759] then you'll see right here that it's starting that generation. Some of these
[00:16:41.829] starting that generation. Some of these
[00:16:41.839] starting that generation. Some of these assets like the audio overviews and the
[00:16:43.990] assets like the audio overviews and the
[00:16:44.000] assets like the audio overviews and the video overviews do take a little bit
[00:16:46.069] video overviews do take a little bit
[00:16:46.079] video overviews do take a little bit longer to generate. So, you have to be a
[00:16:48.310] longer to generate. So, you have to be a
[00:16:48.320] longer to generate. So, you have to be a little bit patient. So while we're
[00:16:49.829] little bit patient. So while we're
[00:16:49.839] little bit patient. So while we're waiting for that, we will move on and
[00:16:51.670] waiting for that, we will move on and
[00:16:51.680] waiting for that, we will move on and generate a slide deck. I'll click on
[00:16:53.749] generate a slide deck. I'll click on
[00:16:53.759] generate a slide deck. I'll click on slide deck here and that will open up
[00:16:55.509] slide deck here and that will open up
[00:16:55.519] slide deck here and that will open up the customize slide deck menu. There are
[00:16:58.389] the customize slide deck menu. There are
[00:16:58.399] the customize slide deck menu. There are two formats here. A detail deck and a
[00:17:00.870] two formats here. A detail deck and a
[00:17:00.880] two formats here. A detail deck and a presenter deck. To give you an idea of
[00:17:02.870] presenter deck. To give you an idea of
[00:17:02.880] presenter deck. To give you an idea of the difference, let me come back to the
[00:17:05.350] the difference, let me come back to the
[00:17:05.360] the difference, let me come back to the other notebook I had started before. And
[00:17:07.909] other notebook I had started before. And
[00:17:07.919] other notebook I had started before. And right here, this is a detailed deck. So
[00:17:12.069] right here, this is a detailed deck. So
[00:17:12.079] right here, this is a detailed deck. So it has all of the information in it. You
[00:17:14.390] it has all of the information in it. You
[00:17:14.400] it has all of the information in it. You see there's a lot of images, but there's
[00:17:16.150] see there's a lot of images, but there's
[00:17:16.160] see there's a lot of images, but there's also a lot of text in here as well. This
[00:17:18.789] also a lot of text in here as well. This
[00:17:18.799] also a lot of text in here as well. This is really nice when you just need to
[00:17:20.630] is really nice when you just need to
[00:17:20.640] is really nice when you just need to send it to someone because it stands on
[00:17:23.029] send it to someone because it stands on
[00:17:23.039] send it to someone because it stands on its own. You don't need someone talking
[00:17:25.590] its own. You don't need someone talking
[00:17:25.600] its own. You don't need someone talking and like giving a presentation here. All
[00:17:27.909] and like giving a presentation here. All
[00:17:27.919] and like giving a presentation here. All the information is in the slides. But if
[00:17:31.830] the information is in the slides. But if
[00:17:31.840] the information is in the slides. But if we look at a presenter deck, which is
[00:17:34.070] we look at a presenter deck, which is
[00:17:34.080] we look at a presenter deck, which is what we have right here, this one's a
[00:17:35.990] what we have right here, this one's a
[00:17:36.000] what we have right here, this one's a lot more sparse. You need someone who's
[00:17:39.190] lot more sparse. You need someone who's
[00:17:39.200] lot more sparse. You need someone who's actually explaining what's going on. and
[00:17:41.990] actually explaining what's going on. and
[00:17:42.000] actually explaining what's going on. and there's information that's intentionally

[00:17:43.830] there's information that's intentionally
[00:17:43.840] there's information that's intentionally left out so that the presenter can talk
[00:17:47.029] left out so that the presenter can talk
[00:17:47.039] left out so that the presenter can talk about the information while using this
[00:17:49.430] about the information while using this
[00:17:49.440] about the information while using this as a presentation. So that's really the
[00:17:51.990] as a presentation. So that's really the
[00:17:52.000] as a presentation. So that's really the difference between a detailed deck and
[00:17:53.830] difference between a detailed deck and
[00:17:53.840] difference between a detailed deck and presenter slide. So use whichever one
[00:17:55.909] presenter slide. So use whichever one
[00:17:55.919] presenter slide. So use whichever one that you want. Again, you'll see the
[00:17:58.070] that you want. Again, you'll see the
[00:17:58.080] that you want. Again, you'll see the same choice for different lengths,
[00:17:59.830] same choice for different lengths,
[00:17:59.840] same choice for different lengths, short, default or long. And then
[00:18:02.150] short, default or long. And then
[00:18:02.160] short, default or long. And then sources. I should also spend this moment
[00:18:05.029] sources. I should also spend this moment
[00:18:05.039] sources. I should also spend this moment to clarify one point. There are going to
[00:18:08.070] to clarify one point. There are going to
[00:18:08.080] to clarify one point. There are going to be some features that I have in my
[00:18:10.710] be some features that I have in my
[00:18:10.720] be some features that I have in my Gemini Notebook account that you're not
[00:18:12.950] Gemini Notebook account that you're not
[00:18:12.960] Gemini Notebook account that you're not going to have, and that depends on the
[00:18:15.190] going to have, and that depends on the
[00:18:15.200] going to have, and that depends on the pricing plan. You can use Gemini
[00:18:17.590] pricing plan. You can use Gemini
[00:18:17.600] pricing plan. You can use Gemini Notebook completely for free, but some
[00:18:20.710] Notebook completely for free, but some
[00:18:20.720] Notebook completely for free, but some capabilities will only be unlocked with
[00:18:23.669] capabilities will only be unlocked with
[00:18:23.679] capabilities will only be unlocked with a paid subscription. So, you may not see
[00:18:26.549] a paid subscription. So, you may not see
[00:18:26.559] a paid subscription. So, you may not see these unless you have a pro or even an
[00:18:28.470] these unless you have a pro or even an
[00:18:28.480] these unless you have a pro or even an Ultra subscription. Just keep that in
[00:18:30.630] Ultra subscription. Just keep that in
[00:18:30.640] Ultra subscription. Just keep that in mind. Once again, you can select how
[00:18:32.470] mind. Once again, you can select how
[00:18:32.480] mind. Once again, you can select how many sources and which sources you want
[00:18:33.990] many sources and which sources you want
[00:18:34.000] many sources and which sources you want to use or Oops, accidentally closed it.
[00:18:35.909] to use or Oops, accidentally closed it.
[00:18:35.919] to use or Oops, accidentally closed it. Let me open it back up. And you can, of
[00:18:38.070] Let me open it back up. And you can, of
[00:18:38.080] Let me open it back up. And you can, of course, describe what you want the slide
[00:18:39.590] course, describe what you want the slide
[00:18:39.600] course, describe what you want the slide deck to be about. So, in this case, I
[00:18:42.070] deck to be about. So, in this case, I
[00:18:42.080] deck to be about. So, in this case, I might say all of the vegetables that
[00:18:44.789] might say all of the vegetables that
[00:18:44.799] might say all of the vegetables that thrive in Colorado.
[00:18:47.430] thrive in Colorado.
[00:18:47.440] thrive in Colorado. And then I'll click on generate for that
[00:18:49.270] And then I'll click on generate for that
[00:18:49.280] And then I'll click on generate for that one. And that will start working. So now
[00:18:51.669] one. And that will start working. So now
[00:18:51.679] one. And that will start working. So now we have two generations running. And we
[00:18:54.390] we have two generations running. And we
[00:18:54.400] we have two generations running. And we can try a third one. So for this one,
[00:18:56.230] can try a third one. So for this one,
[00:18:56.240] can try a third one. So for this one, we're going to do the video overview.

[00:18:58.390] we're going to do the video overview.
[00:18:58.400] we're going to do the video overview. Clicking on this, we have the menu that
[00:19:00.630] Clicking on this, we have the menu that
[00:19:00.640] Clicking on this, we have the menu that now pops up. And you'll see we have
[00:19:03.190] now pops up. And you'll see we have
[00:19:03.200] now pops up. And you'll see we have three different choices here. cinematic
[00:19:05.190] three different choices here. cinematic
[00:19:05.200] three different choices here. cinematic videos, explainer, and shorts. And this
[00:19:07.990] videos, explainer, and shorts. And this
[00:19:08.000] videos, explainer, and shorts. And this is one of those cases where you may not
[00:19:09.909] is one of those cases where you may not
[00:19:09.919] is one of those cases where you may not see cinematic videos because you're not
[00:19:12.150] see cinematic videos because you're not
[00:19:12.160] see cinematic videos because you're not on one of the paid plans. But I will
[00:19:14.549] on one of the paid plans. But I will
[00:19:14.559] on one of the paid plans. But I will show you what all three of these types
[00:19:16.310] show you what all three of these types
[00:19:16.320] show you what all three of these types of videos look like. So, this is a
[00:19:18.950] of videos look like. So, this is a
[00:19:18.960] of videos look like. So, this is a cinematic video, and you'll notice as I
[00:19:21.669] cinematic video, and you'll notice as I
[00:19:21.679] cinematic video, and you'll notice as I play this, it's really rich in its
[00:19:24.630] play this, it's really rich in its
[00:19:24.640] play this, it's really rich in its imagery. It uses Gemini behind the
[00:19:27.270] imagery. It uses Gemini behind the
[00:19:27.280] imagery. It uses Gemini behind the scenes to plan out the video before it's
[00:19:31.029] scenes to plan out the video before it's
[00:19:31.039] scenes to plan out the video before it's generated. So it has a whole story arc
[00:19:34.549] generated. So it has a whole story arc
[00:19:34.559] generated. So it has a whole story arc to it and all the images and videos that
[00:19:37.590] to it and all the images and videos that
[00:19:37.600] to it and all the images and videos that are used are planned out along with
[00:19:39.750] are used are planned out along with
[00:19:39.760] are used are planned out along with that. So it really comes together quite
[00:19:42.549] that. So it really comes together quite
[00:19:42.559] that. So it really comes together quite nicely.
[00:19:43.430] nicely.
[00:19:43.440] nicely. >> Intense UV radiation, heavy clay, short
[00:19:46.710] >> Intense UV radiation, heavy clay, short
[00:19:46.720] >> Intense UV radiation, heavy clay, short growing windows, and sudden severe than
[00:19:49.190] growing windows, and sudden severe than
[00:19:49.200] growing windows, and sudden severe than our short frostfree window. Looking at
[00:19:51.750] our short frostfree window. Looking at
[00:19:51.760] our short frostfree window. Looking at this anatomical diagram, you can see the
[00:19:54.390] this anatomical diagram, you can see the
[00:19:54.400] this anatomical diagram, you can see the difference. On the left, a healthy plant
[00:19:56.870] difference. On the left, a healthy plant
[00:19:56.880] difference. On the left, a healthy plant has a thick main stem and dense bright
[00:19:59.510] has a thick main stem and dense bright

[00:20:02.549] roots. on the right, a compromised plant
[00:20:02.559] roots. on the right, a compromised plant is rootbound.
[00:20:03.510] is rootbound.
[00:20:03.520] is rootbound. >> So quite nice. They are very impressive.
[00:20:06.630] >> So quite nice. They are very impressive.
[00:20:06.640] >> So quite nice. They are very impressive. The second type are the explainer
[00:20:09.510] The second type are the explainer
[00:20:09.520] The second type are the explainer videos. So here's an example of that
[00:20:11.110] videos. So here's an example of that
[00:20:11.120] videos. So here's an example of that one.
[00:20:11.830] one.
[00:20:11.840] one. >> Let's jump right into this explainer and
[00:20:13.909] >> Let's jump right into this explainer and
[00:20:13.919] >> Let's jump right into this explainer and demystify defending your hard-earned

[00:20:15.830] demystify defending your hard-earned
[00:20:15.840] demystify defending your hard-earned harvest and finally joining the local
[00:20:17.750] harvest and finally joining the local
[00:20:17.760] harvest and finally joining the local gardening community. We're going to make
[00:20:19.270] gardening community. We're going to make
[00:20:19.280] gardening community. We're going to make sure you conquer this rugged terrain
[00:20:20.789] sure you conquer this rugged terrain
[00:20:20.799] sure you conquer this rugged terrain without making those classic rookie
[00:20:22.390] without making those classic rookie
[00:20:22.400] without making those classic rookie mistakes. You know, the sheer scale of
[00:20:24.630] mistakes. You know, the sheer scale of
[00:20:24.640] mistakes. You know, the sheer scale of our well battle. So, these are more like
[00:20:27.270] our well battle. So, these are more like
[00:20:27.280] our well battle. So, these are more like a PowerPoint presentation with an AI
[00:20:30.630] a PowerPoint presentation with an AI
[00:20:30.640] a PowerPoint presentation with an AI voice over over the top. They're really
[00:20:32.950] voice over over the top. They're really
[00:20:32.960] voice over over the top. They're really nice, just maybe not as rich as those
[00:20:34.950] nice, just maybe not as rich as those
[00:20:34.960] nice, just maybe not as rich as those cinematic ones. And then finally, we
[00:20:37.190] cinematic ones. And then finally, we
[00:20:37.200] cinematic ones. And then finally, we have the shorts. Here's an example of
[00:20:39.350] have the shorts. Here's an example of
[00:20:39.360] have the shorts. Here's an example of that one right here.
[00:20:40.549] that one right here.
[00:20:40.559] that one right here. >> Just root in the stem actually work. A
[00:20:42.870] >> Just root in the stem actually work. A
[00:20:42.880] >> Just root in the stem actually work. A larger root mass absorbs more water,
[00:20:45.029] larger root mass absorbs more water,
[00:20:45.039] larger root mass absorbs more water, which prevents drought stress and stops
[00:20:47.029] which prevents drought stress and stops
[00:20:47.039] which prevents drought stress and stops your fruit from cracking. Take a
[00:20:49.110] your fruit from cracking. Take a
[00:20:49.120] your fruit from cracking. Take a standard 10-in tomato transplant sitting
[00:20:51.270] standard 10-in tomato transplant sitting
[00:20:51.280] standard 10-in tomato transplant sitting in a small nursery pot. So, obviously
[00:20:53.510] in a small nursery pot. So, obviously
[00:20:53.520] in a small nursery pot. So, obviously that's better for something like
[00:20:55.110] that's better for something like
[00:20:55.120] that's better for something like Instagram or a YouTube short, but
[00:20:58.070] Instagram or a YouTube short, but
[00:20:58.080] Instagram or a YouTube short, but honestly, I sometimes love the way the
[00:21:00.230] honestly, I sometimes love the way the
[00:21:00.240] honestly, I sometimes love the way the shorts come out better than the other
[00:21:01.830] shorts come out better than the other
[00:21:01.840] shorts come out better than the other two. It's just really whatever is going
[00:21:04.070] two. It's just really whatever is going
[00:21:04.080] two. It's just really whatever is going on behind the scenes is really, really
[00:21:06.230] on behind the scenes is really, really
[00:21:06.240] on behind the scenes is really, really done well. So, anyway, returning back to
[00:21:08.710] done well. So, anyway, returning back to
[00:21:08.720] done well. So, anyway, returning back to the notebook we're using together, you
[00:21:10.789] the notebook we're using together, you
[00:21:10.799] the notebook we're using together, you can choose whichever one you want to
[00:21:12.549] can choose whichever one you want to
[00:21:12.559] can choose whichever one you want to use. And for the explainer one, because
[00:21:15.590] use. And for the explainer one, because
[00:21:15.600] use. And for the explainer one, because they are like basically a PowerPoint,
[00:21:18.549] they are like basically a PowerPoint,
[00:21:18.559] they are like basically a PowerPoint, you can choose the style of that
[00:21:21.110] you can choose the style of that
[00:21:21.120] you can choose the style of that PowerPoint, that slide deck. You have
[00:21:22.710] PowerPoint, that slide deck. You have
[00:21:22.720] PowerPoint, that slide deck. You have all those choices right here. So, if you

[00:21:25.510] all those choices right here. So, if you
[00:21:25.520] all those choices right here. So, if you wanted to do for like a retro paint
[00:21:27.990] wanted to do for like a retro paint
[00:21:28.000] wanted to do for like a retro paint style, you can choose that or
[00:21:29.590] style, you can choose that or
[00:21:29.600] style, you can choose that or watercolor, whichever one you want. And
[00:21:31.909] watercolor, whichever one you want. And
[00:21:31.919] watercolor, whichever one you want. And again, I'm not going to walk you through
[00:21:32.950] again, I'm not going to walk you through
[00:21:32.960] again, I'm not going to walk you through the same settings where you can choose
[00:21:34.230] the same settings where you can choose
[00:21:34.240] the same settings where you can choose the sources, a language, or the topic,
[00:21:36.630] the sources, a language, or the topic,
[00:21:36.640] the sources, a language, or the topic, but you'll fill all those in and then
[00:21:38.070] but you'll fill all those in and then
[00:21:38.080] but you'll fill all those in and then click on generate. Next, we will look at
[00:21:40.710] click on generate. Next, we will look at
[00:21:40.720] click on generate. Next, we will look at mind maps. These you can find right
[00:21:43.510] mind maps. These you can find right
[00:21:43.520] mind maps. These you can find right here. And there's not much to mind maps.
[00:21:46.310] here. And there's not much to mind maps.
[00:21:46.320] here. And there's not much to mind maps. Not a lot of settings to change. Of
[00:21:48.070] Not a lot of settings to change. Of
[00:21:48.080] Not a lot of settings to change. Of course, you can give it the topic. And
[00:21:49.590] course, you can give it the topic. And
[00:21:49.600] course, you can give it the topic. And this is what they look like. It's a way
[00:21:51.750] this is what they look like. It's a way
[00:21:51.760] this is what they look like. It's a way to basically structure and visually see
[00:21:54.390] to basically structure and visually see
[00:21:54.400] to basically structure and visually see the information from your notebook. I
[00:21:57.110] the information from your notebook. I
[00:21:57.120] the information from your notebook. I admittedly don't use these that much,
[00:21:59.190] admittedly don't use these that much,
[00:21:59.200] admittedly don't use these that much, but I think there are some fans of it.
[00:22:01.669] but I think there are some fans of it.
[00:22:01.679] but I think there are some fans of it. So, if you want to generate those, you
[00:22:03.430] So, if you want to generate those, you
[00:22:03.440] So, if you want to generate those, you can do that right here. And then we have
[00:22:05.750] can do that right here. And then we have
[00:22:05.760] can do that right here. And then we have reports. Reports are text reports. And
[00:22:08.789] reports. Reports are text reports. And
[00:22:08.799] reports. Reports are text reports. And there's a few different options here.
[00:22:10.310] there's a few different options here.
[00:22:10.320] there's a few different options here. You can create your own. You can create
[00:22:12.789] You can create your own. You can create
[00:22:12.799] You can create your own. You can create a brief document or briefing document,
[00:22:15.110] a brief document or briefing document,
[00:22:15.120] a brief document or briefing document, which is an overview of your sources, a
[00:22:17.430] which is an overview of your sources, a
[00:22:17.440] which is an overview of your sources, a study guide, or a blog post. Here's an
[00:22:19.990] study guide, or a blog post. Here's an
[00:22:20.000] study guide, or a blog post. Here's an example of what one of those looks like.
[00:22:21.909] example of what one of those looks like.
[00:22:21.919] example of what one of those looks like. For this one, I chose blog posts. So, it
[00:22:24.470] For this one, I chose blog posts. So, it
[00:22:24.480] For this one, I chose blog posts. So, it just takes all the information in the
[00:22:26.230] just takes all the information in the
[00:22:26.240] just takes all the information in the sources and creates for you a blog post.
[00:22:29.750] sources and creates for you a blog post.
[00:22:29.760] sources and creates for you a blog post. And next, we have flashcards. Flashcards
[00:22:33.190] And next, we have flashcards. Flashcards
[00:22:33.200] And next, we have flashcards. Flashcards are great for students. I see a lot of
[00:22:36.230] are great for students. I see a lot of
[00:22:36.240] are great for students. I see a lot of students using Gemini notebook because

[00:22:38.630] students using Gemini notebook because
[00:22:38.640] students using Gemini notebook because you can create a new notebook for each
[00:22:40.870] you can create a new notebook for each
[00:22:40.880] you can create a new notebook for each of your classes or even the subjects in
[00:22:43.510] of your classes or even the subjects in
[00:22:43.520] of your classes or even the subjects in your classes and then use things like
[00:22:45.590] your classes and then use things like
[00:22:45.600] your classes and then use things like the flashcards and the quizzes which
[00:22:47.510] the flashcards and the quizzes which
[00:22:47.520] the flashcards and the quizzes which I'll show you next to learn that
[00:22:49.590] I'll show you next to learn that
[00:22:49.600] I'll show you next to learn that information. Opening up flash cards, you
[00:22:52.230] information. Opening up flash cards, you
[00:22:52.240] information. Opening up flash cards, you can see you can choose between a shorter
[00:22:54.630] can see you can choose between a shorter
[00:22:54.640] can see you can choose between a shorter deck of flash cards, standard or a
[00:22:56.789] deck of flash cards, standard or a
[00:22:56.799] deck of flash cards, standard or a longer deck, and the level of difficulty
[00:22:58.950] longer deck, and the level of difficulty
[00:22:58.960] longer deck, and the level of difficulty and again the sources. And you can
[00:23:00.390] and again the sources. And you can
[00:23:00.400] and again the sources. And you can really be specific about what topic you
[00:23:02.789] really be specific about what topic you
[00:23:02.799] really be specific about what topic you want for that set of flashcards. And
[00:23:05.430] want for that set of flashcards. And
[00:23:05.440] want for that set of flashcards. And because with these studio assets, you
[00:23:08.630] because with these studio assets, you
[00:23:08.640] because with these studio assets, you can generate them more than once. You
[00:23:10.789] can generate them more than once. You
[00:23:10.799] can generate them more than once. You can create multiple decks for each topic
[00:23:14.149] can create multiple decks for each topic
[00:23:14.159] can create multiple decks for each topic that you're studying. And to give you an
[00:23:15.990] that you're studying. And to give you an
[00:23:16.000] that you're studying. And to give you an idea of what those flash cards look
[00:23:18.149] idea of what those flash cards look
[00:23:18.159] idea of what those flash cards look like, here's one of the decks. You'll
[00:23:20.230] like, here's one of the decks. You'll
[00:23:20.240] like, here's one of the decks. You'll get the question and then you can
[00:23:22.230] get the question and then you can
[00:23:22.240] get the question and then you can mentally answer it. Click on the card
[00:23:24.470] mentally answer it. Click on the card
[00:23:24.480] mentally answer it. Click on the card and it will reveal the answer. If you
[00:23:26.390] and it will reveal the answer. If you
[00:23:26.400] and it will reveal the answer. If you need a further explanation, you can
[00:23:28.310] need a further explanation, you can
[00:23:28.320] need a further explanation, you can click on explain and then the chat will
[00:23:31.350] click on explain and then the chat will
[00:23:31.360] click on explain and then the chat will explain why that answer is correct and
[00:23:34.070] explain why that answer is correct and
[00:23:34.080] explain why that answer is correct and give you some more information. If you
[00:23:35.830] give you some more information. If you
[00:23:35.840] give you some more information. If you got it right, you can click on the green
[00:23:37.909] got it right, you can click on the green
[00:23:37.919] got it right, you can click on the green check mark. And if you get it wrong, you
[00:23:39.750] check mark. And if you get it wrong, you
[00:23:39.760] check mark. And if you get it wrong, you can click on the red X and it'll keep
[00:23:41.830] can click on the red X and it'll keep
[00:23:41.840] can click on the red X and it'll keep track of your progress as you move
[00:23:43.909] track of your progress as you move
[00:23:43.919] track of your progress as you move along. If you're reading one of these
[00:23:46.149] along. If you're reading one of these
[00:23:46.159] along. If you're reading one of these flash cards and you don't like it for
[00:23:48.390] flash cards and you don't like it for
[00:23:48.400] flash cards and you don't like it for some reason, you can click on these

[00:23:49.590] some reason, you can click on these
[00:23:49.600] some reason, you can click on these three dots and delete it or edit it. Or
[00:23:52.710] three dots and delete it or edit it. Or
[00:23:52.720] three dots and delete it or edit it. Or you can even add new flash cards in
[00:23:54.470] you can even add new flash cards in
[00:23:54.480] you can even add new flash cards in here. You can also shuffle the set or
[00:23:57.669] here. You can also shuffle the set or
[00:23:57.679] here. You can also shuffle the set or restart it. So, we've already answered
[00:24:00.070] restart it. So, we've already answered
[00:24:00.080] restart it. So, we've already answered two of them. I can click on restart.
[00:24:01.830] two of them. I can click on restart.
[00:24:01.840] two of them. I can click on restart. That restarts the whole thing. After
[00:24:03.590] That restarts the whole thing. After
[00:24:03.600] That restarts the whole thing. After you're done, it will give you a score.
[00:24:05.669] you're done, it will give you a score.
[00:24:05.679] you're done, it will give you a score. It will tell you how many you got right
[00:24:07.270] It will tell you how many you got right
[00:24:07.280] It will tell you how many you got right and how many you missed. And you can
[00:24:09.270] and how many you missed. And you can
[00:24:09.280] and how many you missed. And you can click on see full report to see all the
[00:24:11.590] click on see full report to see all the
[00:24:11.600] click on see full report to see all the topics that were covered and where you
[00:24:13.909] topics that were covered and where you
[00:24:13.919] topics that were covered and where you are struggling. And you can generate
[00:24:15.990] are struggling. And you can generate
[00:24:16.000] are struggling. And you can generate flashc cards from within here based on
[00:24:18.950] flashc cards from within here based on
[00:24:18.960] flashc cards from within here based on any of these topics that you struggled
[00:24:20.470] any of these topics that you struggled
[00:24:20.480] any of these topics that you struggled with. So it says I didn't do very well
[00:24:22.630] with. So it says I didn't do very well
[00:24:22.640] with. So it says I didn't do very well with mountain soil chemistry. So I
[00:24:24.470] with mountain soil chemistry. So I
[00:24:24.480] with mountain soil chemistry. So I select that one, click on generate
[00:24:26.390] select that one, click on generate
[00:24:26.400] select that one, click on generate flashcards, and it will make sure that
[00:24:28.950] flashcards, and it will make sure that
[00:24:28.960] flashcards, and it will make sure that this new deck is specific to that topic
[00:24:32.230] this new deck is specific to that topic
[00:24:32.240] this new deck is specific to that topic that I was having some issues with. So
[00:24:34.310] that I was having some issues with. So
[00:24:34.320] that I was having some issues with. So that is flashcards. really helpful for
[00:24:36.870] that is flashcards. really helpful for
[00:24:36.880] that is flashcards. really helpful for learning, as are quizzes. Quizzes are, I
[00:24:40.230] learning, as are quizzes. Quizzes are, I
[00:24:40.240] learning, as are quizzes. Quizzes are, I think, are pretty self-explanatory.
[00:24:42.070] think, are pretty self-explanatory.
[00:24:42.080] think, are pretty self-explanatory. That's where it just asks you questions
[00:24:44.149] That's where it just asks you questions
[00:24:44.159] That's where it just asks you questions about the topic. So, here's what one of
[00:24:46.789] about the topic. So, here's what one of
[00:24:46.799] about the topic. So, here's what one of those looks like. The question, we get
[00:24:48.870] those looks like. The question, we get
[00:24:48.880] those looks like. The question, we get multiple choices. You can select and
[00:24:51.110] multiple choices. You can select and
[00:24:51.120] multiple choices. You can select and you'll see if you got it right or wrong.
[00:24:53.269] you'll see if you got it right or wrong.
[00:24:53.279] you'll see if you got it right or wrong. And again, there's an explain button.
[00:24:55.029] And again, there's an explain button.
[00:24:55.039] And again, there's an explain button. You can click on these dots to delete
[00:24:56.870] You can click on these dots to delete
[00:24:56.880] You can click on these dots to delete any of them. So, very similar to what we
[00:24:59.190] any of them. So, very similar to what we
[00:24:59.200] any of them. So, very similar to what we saw with flashcards, and it will give

[00:25:00.789] saw with flashcards, and it will give
[00:25:00.799] saw with flashcards, and it will give you a score at the end. Moving along, we
[00:25:03.269] you a score at the end. Moving along, we
[00:25:03.279] you a score at the end. Moving along, we also have infographics. Another one of
[00:25:06.070] also have infographics. Another one of
[00:25:06.080] also have infographics. Another one of my favorite features inside of Studio,
[00:25:09.029] my favorite features inside of Studio,
[00:25:09.039] my favorite features inside of Studio, these will generate images for you. But
[00:25:11.510] these will generate images for you. But
[00:25:11.520] these will generate images for you. But unlike most images that are generated
[00:25:13.830] unlike most images that are generated
[00:25:13.840] unlike most images that are generated with AI, these aren't hyper realistic
[00:25:16.789] with AI, these aren't hyper realistic
[00:25:16.799] with AI, these aren't hyper realistic images. These are images with a specific
[00:25:19.590] images. These are images with a specific
[00:25:19.600] images. These are images with a specific purpose of conveying information. That's
[00:25:22.470] purpose of conveying information. That's
[00:25:22.480] purpose of conveying information. That's what an infographic is. As an example,
[00:25:25.510] what an infographic is. As an example,
[00:25:25.520] what an infographic is. As an example, here is what an infographic looks like.
[00:25:27.830] here is what an infographic looks like.
[00:25:27.840] here is what an infographic looks like. You see, it usually has a title at the
[00:25:29.750] You see, it usually has a title at the
[00:25:29.760] You see, it usually has a title at the top along with a lot of text that
[00:25:32.149] top along with a lot of text that
[00:25:32.159] top along with a lot of text that explains information to you. What's
[00:25:35.269] explains information to you. What's
[00:25:35.279] explains information to you. What's great about Gemini Notebook is that it
[00:25:37.990] great about Gemini Notebook is that it
[00:25:38.000] great about Gemini Notebook is that it gives you all these different really
[00:25:39.990] gives you all these different really
[00:25:40.000] gives you all these different really nice looking visual styles that you
[00:25:41.990] nice looking visual styles that you
[00:25:42.000] nice looking visual styles that you can choose between. And this makes these
[00:25:44.070] can choose between. And this makes these
[00:25:44.080] can choose between. And this makes these generations not only fun, but also keeps
[00:25:47.990] generations not only fun, but also keeps
[00:25:48.000] generations not only fun, but also keeps them very engaging. I really encourage
[00:25:50.789] them very engaging. I really encourage
[00:25:50.799] them very engaging. I really encourage you to spend some time generating
[00:25:53.029] you to spend some time generating
[00:25:53.039] you to spend some time generating infographics in all these different
[00:25:54.710] infographics in all these different
[00:25:54.720] infographics in all these different styles to see which ones you like the
[00:25:56.870] styles to see which ones you like the
[00:25:56.880] styles to see which ones you like the best. Personally, I really like sketch
[00:25:59.190] best. Personally, I really like sketch
[00:25:59.200] best. Personally, I really like sketch notes and I'll admit I also really like
[00:26:01.830] notes and I'll admit I also really like
[00:26:01.840] notes and I'll admit I also really like Kauai quite a bit. So for this one I
[00:26:03.990] Kauai quite a bit. So for this one I
[00:26:04.000] Kauai quite a bit. So for this one I will select qui. Up here at the top you
[00:26:06.230] will select qui. Up here at the top you
[00:26:06.240] will select qui. Up here at the top you can choose the orientation landscape,
[00:26:08.710] can choose the orientation landscape,
[00:26:08.720] can choose the orientation landscape, portrait or square. Landscape is 16x9.
[00:26:12.549] portrait or square. Landscape is 16x9.
[00:26:12.559] portrait or square. Landscape is 16x9. That's what you're watching right now.
[00:26:14.789] That's what you're watching right now.
[00:26:14.799] That's what you're watching right now. Portrait is 9 by 6. That's the aspect
[00:26:17.830] Portrait is 9 by 6. That's the aspect
[00:26:17.840] Portrait is 9 by 6. That's the aspect ratio of a phone for instance. And
[00:26:20.310] ratio of a phone for instance. And
[00:26:20.320] ratio of a phone for instance. And square is obviously a square. I'll

[00:26:22.470] square is obviously a square. I'll
[00:26:22.480] square is obviously a square. I'll choose a landscape for this one. Down
[00:26:24.710] choose a landscape for this one. Down
[00:26:24.720] choose a landscape for this one. Down here you can choose the level of detail.
[00:26:27.669] here you can choose the level of detail.
[00:26:27.679] here you can choose the level of detail. Standard is standard. is what I showed
[00:26:30.149] Standard is standard. is what I showed
[00:26:30.159] Standard is standard. is what I showed you right here in terms of the amount of
[00:26:32.789] you right here in terms of the amount of
[00:26:32.799] you right here in terms of the amount of information in the infographic. Concise
[00:26:35.510] information in the infographic. Concise
[00:26:35.520] information in the infographic. Concise will have less information and then
[00:26:38.310] will have less information and then
[00:26:38.320] will have less information and then detailed puts a lot more information in
[00:26:40.950] detailed puts a lot more information in
[00:26:40.960] detailed puts a lot more information in there. Detailed may not be available on
[00:26:43.190] there. Detailed may not be available on
[00:26:43.200] there. Detailed may not be available on your plan. Personally, I don't love
[00:26:45.430] your plan. Personally, I don't love
[00:26:45.440] your plan. Personally, I don't love using detailed. I find it tries to
[00:26:47.110] using detailed. I find it tries to
[00:26:47.120] using detailed. I find it tries to squish way too much information inside
[00:26:49.990] squish way too much information inside
[00:26:50.000] squish way too much information inside of one infographic. So, I usually do
[00:26:52.710] of one infographic. So, I usually do
[00:26:52.720] of one infographic. So, I usually do standard or concise. Then you can choose
[00:26:55.110] standard or concise. Then you can choose
[00:26:55.120] standard or concise. Then you can choose the sources, describe what the
[00:26:56.470] the sources, describe what the
[00:26:56.480] the sources, describe what the infographic will have in it, and then
[00:26:58.710] infographic will have in it, and then
[00:26:58.720] infographic will have in it, and then click on generate. And finally, we have
[00:27:01.430] click on generate. And finally, we have
[00:27:01.440] click on generate. And finally, we have data tables. Data tables look like this.
[00:27:04.870] data tables. Data tables look like this.
[00:27:04.880] data tables. Data tables look like this. They're basically Excel files that have
[00:27:08.310] They're basically Excel files that have
[00:27:08.320] They're basically Excel files that have different columns and rows of
[00:27:10.470] different columns and rows of
[00:27:10.480] different columns and rows of information. And so you can come in here
[00:27:13.350] information. And so you can come in here
[00:27:13.360] information. And so you can come in here and say what you want the data table to
[00:27:15.669] and say what you want the data table to
[00:27:15.679] and say what you want the data table to be about. So for instance, I could say a
[00:27:17.909] be about. So for instance, I could say a
[00:27:17.919] be about. So for instance, I could say a data table that details the best time of
[00:27:19.669] data table that details the best time of
[00:27:19.679] data table that details the best time of the year to plant different vegetables.
[00:27:22.390] the year to plant different vegetables.
[00:27:22.400] the year to plant different vegetables. and it will create that one for me. So
[00:27:24.710] and it will create that one for me. So
[00:27:24.720] and it will create that one for me. So now we've run through all of those and
[00:27:26.870] now we've run through all of those and
[00:27:26.880] now we've run through all of those and you see that some of them are done
[00:27:28.630] you see that some of them are done
[00:27:28.640] you see that some of them are done generating over here. So let's take a
[00:27:31.190] generating over here. So let's take a
[00:27:31.200] generating over here. So let's take a look at what we can now do inside of
[00:27:33.269] look at what we can now do inside of
[00:27:33.279] look at what we can now do inside of this section. So first we can open up
[00:27:37.029] this section. So first we can open up
[00:27:37.039] this section. So first we can open up any of our assets. So this one right
[00:27:39.029] any of our assets. So this one right
[00:27:39.039] any of our assets. So this one right here is our audio overview. Let's give

[00:27:41.750] here is our audio overview. Let's give
[00:27:41.760] here is our audio overview. Let's give that one a quick listen. I'll click
[00:27:43.669] that one a quick listen. I'll click
[00:27:43.679] that one a quick listen. I'll click right here where it says play
[00:27:45.430] right here where it says play
[00:27:45.440] right here where it says play >> slowly suffocating them.
[00:27:47.029] >> slowly suffocating them.
[00:27:47.039] >> slowly suffocating them. >> I mean it sounds a little dramatic but
[00:27:48.710] >> I mean it sounds a little dramatic but
[00:27:48.720] >> I mean it sounds a little dramatic but it is actually true. Right now, in my
[00:27:51.350] it is actually true. Right now, in my
[00:27:51.360] it is actually true. Right now, in my opinion, the best way to listen to these
[00:27:53.590] opinion, the best way to listen to these
[00:27:53.600] opinion, the best way to listen to these audio overviews is to download the
[00:27:55.590] audio overviews is to download the
[00:27:55.600] audio overviews is to download the Gemini Notebook app on your phone and to
[00:27:58.149] Gemini Notebook app on your phone and to
[00:27:58.159] Gemini Notebook app on your phone and to listen to them while you're walking at
[00:27:59.830] listen to them while you're walking at
[00:27:59.840] listen to them while you're walking at the gym or while you're driving, the
[00:28:01.830] the gym or while you're driving, the
[00:28:01.840] the gym or while you're driving, the same way you would listen to any other
[00:28:03.830] same way you would listen to any other
[00:28:03.840] same way you would listen to any other podcast. One other really cool feature
[00:28:06.710] podcast. One other really cool feature
[00:28:06.720] podcast. One other really cool feature of these is there's the option to
[00:28:09.590] of these is there's the option to
[00:28:09.600] of these is there's the option to actually interrupt the podcast. It's
[00:28:11.830] actually interrupt the podcast. It's
[00:28:11.840] actually interrupt the podcast. It's called interactive mode. So, if instead
[00:28:13.830] called interactive mode. So, if instead
[00:28:13.840] called interactive mode. So, if instead of pressing play, you click on this hand
[00:28:16.310] of pressing play, you click on this hand
[00:28:16.320] of pressing play, you click on this hand that's waving, you'll notice it will
[00:28:18.389] that's waving, you'll notice it will
[00:28:18.399] that's waving, you'll notice it will play the podcast, but you can actually
[00:28:20.710] play the podcast, but you can actually
[00:28:20.720] play the podcast, but you can actually interact with it. It's pretty wild. Let
[00:28:22.950] interact with it. It's pretty wild. Let
[00:28:22.960] interact with it. It's pretty wild. Let me show you how it works. With this
[00:28:25.110] me show you how it works. With this
[00:28:25.120] me show you how it works. With this open, I now click on play audio.
[00:28:27.510] open, I now click on play audio.
[00:28:27.520] open, I now click on play audio. >> Welcome to the deep dive. Um, what if I
[00:28:30.070] >> Welcome to the deep dive. Um, what if I
[00:28:30.080] >> Welcome to the deep dive. Um, what if I told you that just simply walking next
[00:28:32.230] told you that just simply walking next
[00:28:32.240] told you that just simply walking next to your tomato plant? Hey there. Want to
[00:28:34.630] to your tomato plant? Hey there. Want to
[00:28:34.640] to your tomato plant? Hey there. Want to share your thoughts on this?
[00:28:35.590] share your thoughts on this?
[00:28:35.600] share your thoughts on this? >> I don't believe that just walking next
[00:28:37.750] >> I don't believe that just walking next
[00:28:37.760] >> I don't believe that just walking next to them can hurt my tomato plants. That
[00:28:39.909] to them can hurt my tomato plants. That
[00:28:39.919] to them can hurt my tomato plants. That sounds like that's not true. It
[00:28:41.750] sounds like that's not true. It
[00:28:41.760] sounds like that's not true. It definitely sounds like I'm exaggerating.
[00:28:42.950] definitely sounds like I'm exaggerating.
[00:28:42.960] definitely sounds like I'm exaggerating. Feeling every step.
[00:28:44.070] Feeling every step.
[00:28:44.080] Feeling every step. >> It's like you're slowly.
[00:28:45.350] >> It's like you're slowly.
[00:28:45.360] >> It's like you're slowly. >> So, it's like an interactive podcast.

[00:28:47.510] >> So, it's like an interactive podcast.
[00:28:47.520] >> So, it's like an interactive podcast. It's pretty cool. So, those are the two
[00:28:49.830] It's pretty cool. So, those are the two
[00:28:49.840] It's pretty cool. So, those are the two things you can do. Either just regularly
[00:28:51.990] things you can do. Either just regularly
[00:28:52.000] things you can do. Either just regularly play it or have that interactive mode.
[00:28:54.230] play it or have that interactive mode.
[00:28:54.240] play it or have that interactive mode. There's also these three dots right
[00:28:55.909] There's also these three dots right
[00:28:55.919] There's also these three dots right here. And this is going to be true for
[00:28:57.750] here. And this is going to be true for
[00:28:57.760] here. And this is going to be true for everything that you generate inside of
[00:28:59.350] everything that you generate inside of
[00:28:59.360] everything that you generate inside of Studio. This will give you the option of
[00:29:01.510] Studio. This will give you the option of
[00:29:01.520] Studio. This will give you the option of sharing it. You can also rename it to
[00:29:03.830] sharing it. You can also rename it to
[00:29:03.840] sharing it. You can also rename it to easily find it later or download it. So,
[00:29:06.789] easily find it later or download it. So,
[00:29:06.799] easily find it later or download it. So, that in this case, it will download it
[00:29:08.389] that in this case, it will download it
[00:29:08.399] that in this case, it will download it as an MP3 file, I believe. And you can
[00:29:11.750] as an MP3 file, I believe. And you can
[00:29:11.760] as an MP3 file, I believe. And you can view the prompt and sources. So if
[00:29:14.230] view the prompt and sources. So if
[00:29:14.240] view the prompt and sources. So if you've used a custom prompt and you want
[00:29:16.470] you've used a custom prompt and you want
[00:29:16.480] you've used a custom prompt and you want to check what it is to use it again or
[00:29:19.350] to check what it is to use it again or
[00:29:19.360] to check what it is to use it again or make some changes to that, you can do
[00:29:21.110] make some changes to that, you can do
[00:29:21.120] make some changes to that, you can do that by clicking on this and this will
[00:29:23.029] that by clicking on this and this will
[00:29:23.039] that by clicking on this and this will show you what the prompt is right here
[00:29:25.510] show you what the prompt is right here
[00:29:25.520] show you what the prompt is right here as well as which sources were used. And
[00:29:28.310] as well as which sources were used. And
[00:29:28.320] as well as which sources were used. And if you want, you can click on this
[00:29:29.590] if you want, you can click on this
[00:29:29.600] if you want, you can click on this button and that will iterate on this
[00:29:32.789] button and that will iterate on this
[00:29:32.799] button and that will iterate on this prompt. meaning it will automatically
[00:29:35.430] prompt. meaning it will automatically
[00:29:35.440] prompt. meaning it will automatically open up the prompt box and fill it in.
[00:29:38.070] open up the prompt box and fill it in.
[00:29:38.080] open up the prompt box and fill it in. And then you can just make any changes
[00:29:39.830] And then you can just make any changes
[00:29:39.840] And then you can just make any changes that you want to have a similar podcast
[00:29:42.389] that you want to have a similar podcast
[00:29:42.399] that you want to have a similar podcast just with those small changes. And then
[00:29:44.950] just with those small changes. And then
[00:29:44.960] just with those small changes. And then finally, you could also delete it. So if
[00:29:48.310] finally, you could also delete it. So if
[00:29:48.320] finally, you could also delete it. So if we look at the next one, this one is our
[00:29:50.710] we look at the next one, this one is our
[00:29:50.720] we look at the next one, this one is our slide deck. And you can see that looks
[00:29:52.710] slide deck. And you can see that looks
[00:29:52.720] slide deck. And you can see that looks like right here. Now slide decks has
[00:29:55.190] like right here. Now slide decks has
[00:29:55.200] like right here. Now slide decks has something unique that you don't see for
[00:29:57.510] something unique that you don't see for
[00:29:57.520] something unique that you don't see for the other assets you create in studio.
[00:29:59.669] the other assets you create in studio.
[00:29:59.679] the other assets you create in studio. You can actually revise your slide

[00:30:01.830] You can actually revise your slide
[00:30:01.840] You can actually revise your slide decks. If you click up here where it
[00:30:03.669] decks. If you click up here where it
[00:30:03.679] decks. If you click up here where it says revise, you can tell it what
[00:30:06.070] says revise, you can tell it what
[00:30:06.080] says revise, you can tell it what changes you want to make to each slide.
[00:30:08.310] changes you want to make to each slide.
[00:30:08.320] changes you want to make to each slide. So let's say this title slide right
[00:30:10.070] So let's say this title slide right
[00:30:10.080] So let's say this title slide right here, I don't love something like maybe
[00:30:12.470] here, I don't love something like maybe
[00:30:12.480] here, I don't love something like maybe just the text. I can just describe those
[00:30:14.870] just the text. I can just describe those
[00:30:14.880] just the text. I can just describe those changes. In this case, I'll say I don't
[00:30:17.430] changes. In this case, I'll say I don't
[00:30:17.440] changes. In this case, I'll say I don't like the green.
[00:30:20.230] like the green.
[00:30:20.240] like the green. Make it
[00:30:22.389] Make it
[00:30:22.399] Make it blue instead. I actually do like the
[00:30:24.470] blue instead. I actually do like the
[00:30:24.480] blue instead. I actually do like the green, but we'll just do that for this
[00:30:26.310] green, but we'll just do that for this
[00:30:26.320] green, but we'll just do that for this example. And then I will click on the
[00:30:28.870] example. And then I will click on the
[00:30:28.880] example. And then I will click on the next slide. And this one's okay. So, I'm
[00:30:30.710] next slide. And this one's okay. So, I'm
[00:30:30.720] next slide. And this one's okay. So, I'm not going to ask for any changes here.
[00:30:32.789] not going to ask for any changes here.
[00:30:32.799] not going to ask for any changes here. This one's okay. So, I won't ask for any
[00:30:34.470] This one's okay. So, I won't ask for any
[00:30:34.480] This one's okay. So, I won't ask for any changes. This one, I can say I don't
[00:30:37.510] changes. This one, I can say I don't
[00:30:37.520] changes. This one, I can say I don't like the word crop roster or the words
[00:30:42.149] like the word crop roster or the words
[00:30:42.159] like the word crop roster or the words crop roster at the top. Remove those.
[00:30:46.070] crop roster at the top. Remove those.
[00:30:46.080] crop roster at the top. Remove those. So, once you've typed out all the
[00:30:48.310] So, once you've typed out all the
[00:30:48.320] So, once you've typed out all the changes you want to make, click on
[00:30:50.149] changes you want to make, click on
[00:30:50.159] changes you want to make, click on generate revised deck and then it will
[00:30:53.110] generate revised deck and then it will
[00:30:53.120] generate revised deck and then it will generate a new slide deck with those
[00:30:56.630] generate a new slide deck with those
[00:30:56.640] generate a new slide deck with those changes. While that's waiting, I'll open
[00:30:58.710] changes. While that's waiting, I'll open
[00:30:58.720] changes. While that's waiting, I'll open up the old slide deck. And I want to
[00:31:01.029] up the old slide deck. And I want to
[00:31:01.039] up the old slide deck. And I want to show you something else in here, which
[00:31:02.789] show you something else in here, which
[00:31:02.799] show you something else in here, which is this play button right here. That
[00:31:04.630] is this play button right here. That
[00:31:04.640] is this play button right here. That will start a slideshow that's full
[00:31:06.710] will start a slideshow that's full
[00:31:06.720] will start a slideshow that's full screen. And then to exit, you could just
[00:31:08.310] screen. And then to exit, you could just
[00:31:08.320] screen. And then to exit, you could just press press the escape key. Now, I
[00:31:10.230] press press the escape key. Now, I
[00:31:10.240] press press the escape key. Now, I showed you before those three dots. You
[00:31:12.789] showed you before those three dots. You
[00:31:12.799] showed you before those three dots. You get a little bit more with slideshows or
[00:31:15.669] get a little bit more with slideshows or
[00:31:15.679] get a little bit more with slideshows or slide decks. In addition to the other

[00:31:19.269] slide decks. In addition to the other
[00:31:19.279] slide decks. In addition to the other options, there's also options for again
[00:31:23.110] options, there's also options for again
[00:31:23.120] options, there's also options for again clicking on slideshow or revise, but you
[00:31:25.909] clicking on slideshow or revise, but you
[00:31:25.919] clicking on slideshow or revise, but you can also download in different formats.
[00:31:28.149] can also download in different formats.
[00:31:28.159] can also download in different formats. So there's two different formats you can
[00:31:29.510] So there's two different formats you can
[00:31:29.520] So there's two different formats you can download into a PDF or a PowerPoint. And
[00:31:33.269] download into a PDF or a PowerPoint. And
[00:31:33.279] download into a PDF or a PowerPoint. And you'll notice that with a few of the
[00:31:35.029] you'll notice that with a few of the
[00:31:35.039] you'll notice that with a few of the other assets you generate like for data
[00:31:38.070] other assets you generate like for data
[00:31:38.080] other assets you generate like for data tables, you can download those to sheets
[00:31:40.789] tables, you can download those to sheets
[00:31:40.799] tables, you can download those to sheets or export to sheets which is directly
[00:31:43.350] or export to sheets which is directly
[00:31:43.360] or export to sheets which is directly inside of Google Drive like Google
[00:31:44.710] inside of Google Drive like Google
[00:31:44.720] inside of Google Drive like Google Sheets. Let me just show you. Click on
[00:31:46.310] Sheets. Let me just show you. Click on
[00:31:46.320] Sheets. Let me just show you. Click on that. You can see it's exporting and
[00:31:48.070] that. You can see it's exporting and
[00:31:48.080] that. You can see it's exporting and then it opens it up inside of Google
[00:31:50.230] then it opens it up inside of Google
[00:31:50.240] then it opens it up inside of Google Sheets for you right here. And so each
[00:31:52.549] Sheets for you right here. And so each
[00:31:52.559] Sheets for you right here. And so each of them is going to be a little bit
[00:31:53.590] of them is going to be a little bit
[00:31:53.600] of them is going to be a little bit different in terms of what export
[00:31:56.630] different in terms of what export
[00:31:56.640] different in terms of what export options are available. Frustratingly, if
[00:31:59.350] options are available. Frustratingly, if
[00:31:59.360] options are available. Frustratingly, if we take a look at this infographic, and
[00:32:01.830] we take a look at this infographic, and
[00:32:01.840] we take a look at this infographic, and remember this is the Quai style just to
[00:32:03.669] remember this is the Quai style just to
[00:32:03.679] remember this is the Quai style just to give you an idea of what that looks
[00:32:05.029] give you an idea of what that looks
[00:32:05.039] give you an idea of what that looks like. Frustratingly, you cannot revise a
[00:32:09.029] like. Frustratingly, you cannot revise a
[00:32:09.039] like. Frustratingly, you cannot revise a infographic like you can a slide deck.
[00:32:11.669] infographic like you can a slide deck.
[00:32:11.679] infographic like you can a slide deck. I'm sure that capability is coming soon
[00:32:13.909] I'm sure that capability is coming soon
[00:32:13.919] I'm sure that capability is coming soon because it seems like it should be
[00:32:15.269] because it seems like it should be
[00:32:15.279] because it seems like it should be exactly the same, but we don't yet have
[00:32:17.669] exactly the same, but we don't yet have
[00:32:17.679] exactly the same, but we don't yet have that available. One final thing I'll
[00:32:19.669] that available. One final thing I'll
[00:32:19.679] that available. One final thing I'll show you inside of Studio down here is
[00:32:22.149] show you inside of Studio down here is
[00:32:22.159] show you inside of Studio down here is the option to add a note. Clicking on
[00:32:24.870] the option to add a note. Clicking on
[00:32:24.880] the option to add a note. Clicking on this, you can type out any note that you
[00:32:27.750] this, you can type out any note that you
[00:32:27.760] this, you can type out any note that you want. This is helpful if you want to
[00:32:31.350] want. This is helpful if you want to
[00:32:31.360] want. This is helpful if you want to take notes as you are learning
[00:32:33.190] take notes as you are learning
[00:32:33.200] take notes as you are learning something. You can just take down those

[00:32:35.190] something. You can just take down those
[00:32:35.200] something. You can just take down those notes right here and then it will
[00:32:37.830] notes right here and then it will
[00:32:37.840] notes right here and then it will automatically save. You just collapse it
[00:32:39.830] automatically save. You just collapse it
[00:32:39.840] automatically save. You just collapse it and you'll see your note here. Okay, at
[00:32:42.389] and you'll see your note here. Okay, at
[00:32:42.399] and you'll see your note here. Okay, at this point I think you have mastered the
[00:32:44.710] this point I think you have mastered the
[00:32:44.720] this point I think you have mastered the basics on how to use Gemini notebook. I
[00:32:47.269] basics on how to use Gemini notebook. I
[00:32:47.279] basics on how to use Gemini notebook. I want to show you some more advanced
[00:32:48.870] want to show you some more advanced
[00:32:48.880] want to show you some more advanced capabilities though. For that I want to
[00:32:51.110] capabilities though. For that I want to
[00:32:51.120] capabilities though. For that I want to start a new notebook. So we'll click on
[00:32:53.350] start a new notebook. So we'll click on
[00:32:53.360] start a new notebook. So we'll click on the top left here to return back to the
[00:32:56.470] the top left here to return back to the
[00:32:56.480] the top left here to return back to the Gemini notebook dashboard. Before we
[00:32:58.950] Gemini notebook dashboard. Before we
[00:32:58.960] Gemini notebook dashboard. Before we create that notebook though, I want to
[00:33:00.630] create that notebook though, I want to
[00:33:00.640] create that notebook though, I want to show you a little bit more about how to
[00:33:02.630] show you a little bit more about how to
[00:33:02.640] show you a little bit more about how to organize and navigate this dashboard. So
[00:33:06.149] organize and navigate this dashboard. So
[00:33:06.159] organize and navigate this dashboard. So up here at the top are what are called
[00:33:07.909] up here at the top are what are called
[00:33:07.919] up here at the top are what are called featured notebooks. These are ones that
[00:33:09.669] featured notebooks. These are ones that
[00:33:09.679] featured notebooks. These are ones that have been created by Google Gemini. I
[00:33:13.110] have been created by Google Gemini. I
[00:33:13.120] have been created by Google Gemini. I honestly usually ignore those ones. Down
[00:33:15.509] honestly usually ignore those ones. Down
[00:33:15.519] honestly usually ignore those ones. Down here you have your recent notebooks.
[00:33:18.149] here you have your recent notebooks.
[00:33:18.159] here you have your recent notebooks. These will be sorted so that the
[00:33:19.830] These will be sorted so that the
[00:33:19.840] These will be sorted so that the notebook that you last used will appear
[00:33:23.029] notebook that you last used will appear
[00:33:23.039] notebook that you last used will appear at the top. You'll notice that for all
[00:33:25.509] at the top. You'll notice that for all
[00:33:25.519] at the top. You'll notice that for all these notebooks there are these three
[00:33:26.950] these notebooks there are these three
[00:33:26.960] these notebooks there are these three little dots here. It can be harder to
[00:33:29.269] little dots here. It can be harder to
[00:33:29.279] little dots here. It can be harder to see when you have the images, but they
[00:33:31.269] see when you have the images, but they
[00:33:31.279] see when you have the images, but they are there. So clicking on that you can
[00:33:33.669] are there. So clicking on that you can
[00:33:33.679] are there. So clicking on that you can delete these notebooks. You can edit the
[00:33:35.750] delete these notebooks. You can edit the
[00:33:35.760] delete these notebooks. You can edit the title, you can add them to a collection,
[00:33:38.149] title, you can add them to a collection,
[00:33:38.159] title, you can add them to a collection, or you can pin them. So, if I click on
[00:33:39.830] or you can pin them. So, if I click on
[00:33:39.840] or you can pin them. So, if I click on pin to top, you'll see that it it
[00:33:42.149] pin to top, you'll see that it it
[00:33:42.159] pin to top, you'll see that it it appended to the top here so it's easier
[00:33:44.470] appended to the top here so it's easier
[00:33:44.480] appended to the top here so it's easier to find. Along the top here, there are
[00:33:48.070] to find. Along the top here, there are
[00:33:48.080] to find. Along the top here, there are some sorting options. So, we have all

[00:33:50.870] some sorting options. So, we have all
[00:33:50.880] some sorting options. So, we have all selected by default. That shows you all
[00:33:53.029] selected by default. That shows you all
[00:33:53.039] selected by default. That shows you all of the notebooks, both yours and the
[00:33:55.269] of the notebooks, both yours and the
[00:33:55.279] of the notebooks, both yours and the ones that were created by Google. My
[00:33:57.750] ones that were created by Google. My
[00:33:57.760] ones that were created by Google. My notebooks will only show you your
[00:33:59.909] notebooks will only show you your
[00:33:59.919] notebooks will only show you your notebooks. Featured notebooks will only
[00:34:02.630] notebooks. Featured notebooks will only
[00:34:02.640] notebooks. Featured notebooks will only show you the ones that were created by
[00:34:03.909] show you the ones that were created by
[00:34:03.919] show you the ones that were created by Google. And you can also share
[00:34:06.149] Google. And you can also share
[00:34:06.159] Google. And you can also share notebooks. So if anyone shares a
[00:34:07.509] notebooks. So if anyone shares a
[00:34:07.519] notebooks. So if anyone shares a notebook with you, that will appear
[00:34:09.750] notebook with you, that will appear
[00:34:09.760] notebook with you, that will appear here. Finally, we have collections.
[00:34:12.869] here. Finally, we have collections.
[00:34:12.879] here. Finally, we have collections. Collections are how you can organize
[00:34:14.950] Collections are how you can organize
[00:34:14.960] Collections are how you can organize your notebooks. So we'll start a new
[00:34:17.430] your notebooks. So we'll start a new
[00:34:17.440] your notebooks. So we'll start a new collection here, and I'll call this one
[00:34:19.669] collection here, and I'll call this one
[00:34:19.679] collection here, and I'll call this one home. I'm going to use this for any
[00:34:21.510] home. I'm going to use this for any
[00:34:21.520] home. I'm going to use this for any topics I'm studying about, you know, how
[00:34:24.389] topics I'm studying about, you know, how
[00:34:24.399] topics I'm studying about, you know, how to make my house and my life more homey.
[00:34:27.669] to make my house and my life more homey.
[00:34:27.679] to make my house and my life more homey. So I selected that one. And then down
[00:34:29.909] So I selected that one. And then down
[00:34:29.919] So I selected that one. And then down here, I can choose which notebooks I
[00:34:31.669] here, I can choose which notebooks I
[00:34:31.679] here, I can choose which notebooks I want to add to this collection. So here
[00:34:34.790] want to add to this collection. So here
[00:34:34.800] want to add to this collection. So here I have a notebook about how to bake
[00:34:36.310] I have a notebook about how to bake
[00:34:36.320] I have a notebook about how to bake chocolate chip cookies. I'll throw that
[00:34:37.909] chocolate chip cookies. I'll throw that
[00:34:37.919] chocolate chip cookies. I'll throw that one in there. And how to sleep better. I
[00:34:39.829] one in there. And how to sleep better. I
[00:34:39.839] one in there. And how to sleep better. I will choose that one in there. And then
[00:34:41.510] will choose that one in there. And then
[00:34:41.520] will choose that one in there. And then I'll select my one about gardening. And
[00:34:43.589] I'll select my one about gardening. And
[00:34:43.599] I'll select my one about gardening. And then click on create. So now here is my
[00:34:46.149] then click on create. So now here is my
[00:34:46.159] then click on create. So now here is my home collection. If I click on that, I
[00:34:48.869] home collection. If I click on that, I
[00:34:48.879] home collection. If I click on that, I see the three notebooks in here.
[00:34:51.190] see the three notebooks in here.
[00:34:51.200] see the three notebooks in here. Notebooks can exist in multiple
[00:34:53.270] Notebooks can exist in multiple
[00:34:53.280] Notebooks can exist in multiple collections, by the way. So, if I go
[00:34:55.589] collections, by the way. So, if I go
[00:34:55.599] collections, by the way. So, if I go backwards and start a new collection and
[00:34:57.829] backwards and start a new collection and
[00:34:57.839] backwards and start a new collection and maybe call this one outdoors or
[00:35:00.150] maybe call this one outdoors or
[00:35:00.160] maybe call this one outdoors or something, I can choose that same

[00:35:02.710] something, I can choose that same
[00:35:02.720] something, I can choose that same gardening notebook and it can exist in
[00:35:05.670] gardening notebook and it can exist in
[00:35:05.680] gardening notebook and it can exist in multiple collections. Let me return back
[00:35:08.150] multiple collections. Let me return back
[00:35:08.160] multiple collections. Let me return back now to the all notebooks section. I
[00:35:11.030] now to the all notebooks section. I
[00:35:11.040] now to the all notebooks section. I don't need this one pinned, so I'll
[00:35:12.550] don't need this one pinned, so I'll
[00:35:12.560] don't need this one pinned, so I'll click on these three dots and unpin it
[00:35:14.950] click on these three dots and unpin it
[00:35:14.960] click on these three dots and unpin it so I can see it back down here. Up here
[00:35:17.349] so I can see it back down here. Up here
[00:35:17.359] so I can see it back down here. Up here at the top, you can switch between this
[00:35:19.910] at the top, you can switch between this
[00:35:19.920] at the top, you can switch between this grid view to this list view. I prefer
[00:35:22.950] grid view to this list view. I prefer
[00:35:22.960] grid view to this list view. I prefer the grid view. And you can choose how
[00:35:25.190] the grid view. And you can choose how
[00:35:25.200] the grid view. And you can choose how they're sorted, most recent, or you can
[00:35:27.589] they're sorted, most recent, or you can
[00:35:27.599] they're sorted, most recent, or you can sort by title. I think most recent makes
[00:35:30.150] sort by title. I think most recent makes
[00:35:30.160] sort by title. I think most recent makes more sense to me. And then there's also
[00:35:31.750] more sense to me. And then there's also
[00:35:31.760] more sense to me. And then there's also a search button right here. So if you're
[00:35:33.589] a search button right here. So if you're
[00:35:33.599] a search button right here. So if you're having trouble finding one of your
[00:35:34.870] having trouble finding one of your
[00:35:34.880] having trouble finding one of your notebooks, you can just use this search
[00:35:37.670] notebooks, you can just use this search
[00:35:37.680] notebooks, you can just use this search function right here. All right, so for
[00:35:39.270] function right here. All right, so for
[00:35:39.280] function right here. All right, so for the dashboard, that's everything you
[00:35:41.109] the dashboard, that's everything you
[00:35:41.119] the dashboard, that's everything you need to know. Let me now move on and
[00:35:43.270] need to know. Let me now move on and
[00:35:43.280] need to know. Let me now move on and show you some of those more advanced
[00:35:44.630] show you some of those more advanced
[00:35:44.640] show you some of those more advanced capabilities. For this, we will create a
[00:35:46.470] capabilities. For this, we will create a
[00:35:46.480] capabilities. For this, we will create a new notebook, of course, by clicking
[00:35:48.069] new notebook, of course, by clicking
[00:35:48.079] new notebook, of course, by clicking right here where it says create new
[00:35:49.589] right here where it says create new
[00:35:49.599] right here where it says create new notebook. For this notebook, instead of
[00:35:51.670] notebook. For this notebook, instead of
[00:35:51.680] notebook. For this notebook, instead of uploading the same types of sources I
[00:35:53.990] uploading the same types of sources I
[00:35:54.000] uploading the same types of sources I showed you before, different websites
[00:35:55.750] showed you before, different websites
[00:35:55.760] showed you before, different websites and such, I'm going to do something a
[00:35:57.430] and such, I'm going to do something a
[00:35:57.440] and such, I'm going to do something a little bit differently because this
[00:35:58.630] little bit differently because this
[00:35:58.640] little bit differently because this notebook I'm going to use as a way to
[00:36:02.310] notebook I'm going to use as a way to
[00:36:02.320] notebook I'm going to use as a way to analyze different data and information I
[00:36:05.670] analyze different data and information I
[00:36:05.680] analyze different data and information I have. It's more of a personalized
[00:36:07.670] have. It's more of a personalized
[00:36:07.680] have. It's more of a personalized notebook. So, what I have on my computer
[00:36:10.230] notebook. So, what I have on my computer
[00:36:10.240] notebook. So, what I have on my computer is this folder right here that contains

[00:36:13.430] is this folder right here that contains
[00:36:13.440] is this folder right here that contains all of these files that I'm using to
[00:36:16.069] all of these files that I'm using to
[00:36:16.079] all of these files that I'm using to keep track of my family's budget. So, we
[00:36:18.470] keep track of my family's budget. So, we
[00:36:18.480] keep track of my family's budget. So, we have my 2023, 2024, and 2025 family
[00:36:22.230] have my 2023, 2024, and 2025 family
[00:36:22.240] have my 2023, 2024, and 2025 family expenses. We have my financial goals as
[00:36:25.109] expenses. We have my financial goals as
[00:36:25.119] expenses. We have my financial goals as well, and a file here with some trips I
[00:36:28.470] well, and a file here with some trips I
[00:36:28.480] well, and a file here with some trips I have planned for my family. In addition
[00:36:30.950] have planned for my family. In addition
[00:36:30.960] have planned for my family. In addition to that, I have this Google doc that
[00:36:32.950] to that, I have this Google doc that
[00:36:32.960] to that, I have this Google doc that also has my family trips in here. And
[00:36:35.510] also has my family trips in here. And
[00:36:35.520] also has my family trips in here. And this is something I share with other
[00:36:37.270] this is something I share with other
[00:36:37.280] this is something I share with other members of my family. So, we can keep
[00:36:39.270] members of my family. So, we can keep
[00:36:39.280] members of my family. So, we can keep this updated as we think of new trip
[00:36:41.589] this updated as we think of new trip
[00:36:41.599] this updated as we think of new trip ideas. So, I want all of that brought in
[00:36:45.030] ideas. So, I want all of that brought in
[00:36:45.040] ideas. So, I want all of that brought in to this notebook. So I can choose upload
[00:36:48.310] to this notebook. So I can choose upload
[00:36:48.320] to this notebook. So I can choose upload files here. Find the files I want to
[00:36:50.790] files here. Find the files I want to
[00:36:50.800] files here. Find the files I want to upload and select all of them then open
[00:36:53.190] upload and select all of them then open
[00:36:53.200] upload and select all of them then open those. So now those are being loaded in.
[00:36:56.069] those. So now those are being loaded in.
[00:36:56.079] those. So now those are being loaded in. We also have to add that Google doc. So
[00:36:58.069] We also have to add that Google doc. So
[00:36:58.079] We also have to add that Google doc. So I'll click on add source and I will
[00:37:00.390] I'll click on add source and I will
[00:37:00.400] I'll click on add source and I will select drive here and I'll select that
[00:37:02.710] select drive here and I'll select that
[00:37:02.720] select drive here and I'll select that file which is called travel ideas and
[00:37:04.550] file which is called travel ideas and
[00:37:04.560] file which is called travel ideas and click on insert. What's really neat
[00:37:07.430] click on insert. What's really neat
[00:37:07.440] click on insert. What's really neat about adding something from Google Drive
[00:37:10.310] about adding something from Google Drive
[00:37:10.320] about adding something from Google Drive is that that will stay updated. So if
[00:37:13.990] is that that will stay updated. So if
[00:37:14.000] is that that will stay updated. So if myself or another member of my family
[00:37:16.470] myself or another member of my family
[00:37:16.480] myself or another member of my family changes this file that will
[00:37:18.870] changes this file that will
[00:37:18.880] changes this file that will automatically automatically be reflected
[00:37:21.750] automatically automatically be reflected
[00:37:21.760] automatically automatically be reflected inside the notebook. So I don't have to
[00:37:23.829] inside the notebook. So I don't have to
[00:37:23.839] inside the notebook. So I don't have to refresh it or delete it and then edit
[00:37:26.390] refresh it or delete it and then edit
[00:37:26.400] refresh it or delete it and then edit again. Now we will come over to the chat
[00:37:28.870] again. Now we will come over to the chat
[00:37:28.880] again. Now we will come over to the chat in the middle cuz I want to show you
[00:37:30.630] in the middle cuz I want to show you
[00:37:30.640] in the middle cuz I want to show you some of the newer features of Gemini
[00:37:33.430] some of the newer features of Gemini
[00:37:33.440] some of the newer features of Gemini notebook. Under the hood, Google has

[00:37:36.230] notebook. Under the hood, Google has
[00:37:36.240] notebook. Under the hood, Google has added a lot more capabilities to Gemini
[00:37:38.230] added a lot more capabilities to Gemini
[00:37:38.240] added a lot more capabilities to Gemini notebook, a lot more powerful models,
[00:37:40.630] notebook, a lot more powerful models,
[00:37:40.640] notebook, a lot more powerful models, and each notebook also has its own
[00:37:43.190] and each notebook also has its own
[00:37:43.200] and each notebook also has its own private cloud compute computer running,
[00:37:45.990] private cloud compute computer running,
[00:37:46.000] private cloud compute computer running, which allows it to do a genetic work for
[00:37:49.670] which allows it to do a genetic work for
[00:37:49.680] which allows it to do a genetic work for you. That sounds like a mouthful, but
[00:37:51.829] you. That sounds like a mouthful, but
[00:37:51.839] you. That sounds like a mouthful, but all that means is that it can do more
[00:37:53.910] all that means is that it can do more
[00:37:53.920] all that means is that it can do more and it can analyze more information and
[00:37:56.069] and it can analyze more information and
[00:37:56.079] and it can analyze more information and more data. So here, for instance, we
[00:37:58.470] more data. So here, for instance, we
[00:37:58.480] more data. So here, for instance, we have all of these expenses from the past
[00:38:00.390] have all of these expenses from the past
[00:38:00.400] have all of these expenses from the past 3 years. I'm going to ask it to
[00:38:02.950] 3 years. I'm going to ask it to
[00:38:02.960] 3 years. I'm going to ask it to summarize all that information. Create a
[00:38:05.349] summarize all that information. Create a
[00:38:05.359] summarize all that information. Create a PNG file that has a pie chart that
[00:38:07.829] PNG file that has a pie chart that
[00:38:07.839] PNG file that has a pie chart that summarizes how my family spends spends
[00:38:10.470] summarizes how my family spends spends
[00:38:10.480] summarizes how my family spends spends money broken up into different
[00:38:12.390] money broken up into different
[00:38:12.400] money broken up into different categories. I should really say broken
[00:38:14.069] categories. I should really say broken
[00:38:14.079] categories. I should really say broken down into different categories. For this
[00:38:16.310] down into different categories. For this
[00:38:16.320] down into different categories. For this one, I don't needed to have access to
[00:38:18.069] one, I don't needed to have access to
[00:38:18.079] one, I don't needed to have access to all the files, only the ones with my
[00:38:20.310] all the files, only the ones with my
[00:38:20.320] all the files, only the ones with my expenses. So, I've only selected those
[00:38:22.550] expenses. So, I've only selected those
[00:38:22.560] expenses. So, I've only selected those three. So, this new capability allows
[00:38:25.589] three. So, this new capability allows
[00:38:25.599] three. So, this new capability allows you to create all these different file
[00:38:27.990] you to create all these different file
[00:38:28.000] you to create all these different file types directly from the chat. Here I'm
[00:38:30.310] types directly from the chat. Here I'm
[00:38:30.320] types directly from the chat. Here I'm demonstrating how it creates a PNG file,
[00:38:32.550] demonstrating how it creates a PNG file,
[00:38:32.560] demonstrating how it creates a PNG file, but you can also use this to create Word
[00:38:34.230] but you can also use this to create Word
[00:38:34.240] but you can also use this to create Word documents, PDFs, Excel documents,
[00:38:36.870] documents, PDFs, Excel documents,
[00:38:36.880] documents, PDFs, Excel documents, PowerPoints, all of that. All right,
[00:38:38.950] PowerPoints, all of that. All right,
[00:38:38.960] PowerPoints, all of that. All right, check that out. You can now see the PNG
[00:38:40.710] check that out. You can now see the PNG
[00:38:40.720] check that out. You can now see the PNG file over here on the right. And it's
[00:38:43.349] file over here on the right. And it's
[00:38:43.359] file over here on the right. And it's kind of walking through exactly what it
[00:38:45.750] kind of walking through exactly what it
[00:38:45.760] kind of walking through exactly what it found. So, let's just open this up
[00:38:47.430] found. So, let's just open this up
[00:38:47.440] found. So, let's just open this up instead. And you can see that breakdown

[00:38:50.230] instead. And you can see that breakdown
[00:38:50.240] instead. And you can see that breakdown right here. So, notice how I'm using
[00:38:52.630] right here. So, notice how I'm using
[00:38:52.640] right here. So, notice how I'm using notebooks two different ways. one is for
[00:38:56.470] notebooks two different ways. one is for
[00:38:56.480] notebooks two different ways. one is for learning where I'm pulling information
[00:38:58.470] learning where I'm pulling information
[00:38:58.480] learning where I'm pulling information from the web and then we have notebooks
[00:39:00.069] from the web and then we have notebooks
[00:39:00.079] from the web and then we have notebooks like this where I'm analyzing and it's
[00:39:02.870] like this where I'm analyzing and it's
[00:39:02.880] like this where I'm analyzing and it's analyzing my information my data so we
[00:39:06.550] analyzing my information my data so we
[00:39:06.560] analyzing my information my data so we can create another one in here so I can
[00:39:09.030] can create another one in here so I can
[00:39:09.040] can create another one in here so I can say something like create a word
[00:39:10.710] say something like create a word
[00:39:10.720] say something like create a word document that contains a breakdown of
[00:39:12.630] document that contains a breakdown of
[00:39:12.640] document that contains a breakdown of this same info and this is what it looks
[00:39:15.910] this same info and this is what it looks
[00:39:15.920] this same info and this is what it looks like so we have this sort of title page
[00:39:17.910] like so we have this sort of title page
[00:39:17.920] like so we have this sort of title page here and then you can see it's quite a
[00:39:20.390] here and then you can see it's quite a
[00:39:20.400] here and then you can see it's quite a comprehensive report really nicely put
[00:39:23.670] comprehensive report really nicely put
[00:39:23.680] comprehensive report really nicely put together. Another thing you can always
[00:39:26.069] together. Another thing you can always
[00:39:26.079] together. Another thing you can always do inside the chat for any of the
[00:39:28.310] do inside the chat for any of the
[00:39:28.320] do inside the chat for any of the responses that you get, even if you're
[00:39:30.230] responses that you get, even if you're
[00:39:30.240] responses that you get, even if you're not using it to create assets like we
[00:39:32.470] not using it to create assets like we
[00:39:32.480] not using it to create assets like we just did, you can click right here where
[00:39:34.230] just did, you can click right here where
[00:39:34.240] just did, you can click right here where it says save to note,
[00:39:36.710] it says save to note,
[00:39:36.720] it says save to note, and that will save the response as a
[00:39:38.790] and that will save the response as a
[00:39:38.800] and that will save the response as a note over here on the right if you want.
[00:39:41.829] note over here on the right if you want.
[00:39:41.839] note over here on the right if you want. Now, with this new functionality, you
[00:39:44.790] Now, with this new functionality, you
[00:39:44.800] Now, with this new functionality, you can also search for sources using the
[00:39:47.750] can also search for sources using the
[00:39:47.760] can also search for sources using the chat. What I'll do now is turn on all of
[00:39:50.790] chat. What I'll do now is turn on all of
[00:39:50.800] chat. What I'll do now is turn on all of my existing sources. So, we are now
[00:39:53.190] my existing sources. So, we are now
[00:39:53.200] my existing sources. So, we are now using all of them. And I will ask it, I
[00:39:56.230] using all of them. And I will ask it, I
[00:39:56.240] using all of them. And I will ask it, I want to budget better with my family.
[00:39:58.069] want to budget better with my family.
[00:39:58.079] want to budget better with my family. Can you find some reputable sources that
[00:40:00.470] Can you find some reputable sources that
[00:40:00.480] Can you find some reputable sources that can help with that? And now it will look
[00:40:03.910] can help with that? And now it will look
[00:40:03.920] can help with that? And now it will look at the sources I already have and all
[00:40:06.390] at the sources I already have and all
[00:40:06.400] at the sources I already have and all the information in here and find new
[00:40:09.910] the information in here and find new
[00:40:09.920] the information in here and find new sources from the web that would actually

[00:40:12.870] sources from the web that would actually
[00:40:12.880] sources from the web that would actually be helpful for my situation. So, here it
[00:40:16.470] be helpful for my situation. So, here it
[00:40:16.480] be helpful for my situation. So, here it looked at my sources and it says, "Your
[00:40:18.069] looked at my sources and it says, "Your
[00:40:18.079] looked at my sources and it says, "Your sources outline your family specific
[00:40:19.750] sources outline your family specific
[00:40:19.760] sources outline your family specific financial goals, including prioritized
[00:40:22.150] financial goals, including prioritized
[00:40:22.160] financial goals, including prioritized goals, and you need to have a monthly
[00:40:24.710] goals, and you need to have a monthly
[00:40:24.720] goals, and you need to have a monthly savings sequence and internal house
[00:40:26.630] savings sequence and internal house
[00:40:26.640] savings sequence and internal house rules. Would you like me to do some web
[00:40:28.710] rules. Would you like me to do some web
[00:40:28.720] rules. Would you like me to do some web research to find highly recommended,
[00:40:30.630] research to find highly recommended,
[00:40:30.640] research to find highly recommended, reputable external sources?" I'll say,
[00:40:32.710] reputable external sources?" I'll say,
[00:40:32.720] reputable external sources?" I'll say, "Yes, please do that." So, this is
[00:40:35.109] "Yes, please do that." So, this is
[00:40:35.119] "Yes, please do that." So, this is different from using the research tool
[00:40:37.190] different from using the research tool
[00:40:37.200] different from using the research tool right here like I showed you before
[00:40:39.109] right here like I showed you before
[00:40:39.119] right here like I showed you before because this one doesn't take into
[00:40:41.190] because this one doesn't take into
[00:40:41.200] because this one doesn't take into consideration the sources you already
[00:40:43.589] consideration the sources you already
[00:40:43.599] consideration the sources you already have or the things you've already
[00:40:45.589] have or the things you've already
[00:40:45.599] have or the things you've already chatted about. But this search tool is
[00:40:48.950] chatted about. But this search tool is
[00:40:48.960] chatted about. But this search tool is looking at the full picture when it's
[00:40:51.829] is looking at the full picture when it's
[00:40:51.839] is looking at the full picture when it's going out and finding and doing research
[00:40:54.069] going out and finding and doing research
[00:40:54.079] going out and finding and doing research for you. This can also be helpful in the
[00:40:56.870] for you. This can also be helpful in the
[00:40:56.880] for you. This can also be helpful in the other notebook I showed you before that
[00:40:58.790] other notebook I showed you before that
[00:40:58.800] other notebook I showed you before that we started together, the one about
[00:41:01.190] we started together, the one about
[00:41:01.200] we started together, the one about gardening. Because this one I could ask
[00:41:03.349] gardening. Because this one I could ask
[00:41:03.359] gardening. Because this one I could ask it for instance, look at all the
[00:41:05.349] it for instance, look at all the
[00:41:05.359] it for instance, look at all the sources. Is there anything that I'm
[00:41:08.230] sources. Is there anything that I'm
[00:41:08.240] sources. Is there anything that I'm missing? And if there is, can you find
[00:41:10.710] missing? And if there is, can you find
[00:41:10.720] missing? And if there is, can you find some sources to fill in those gaps? And
[00:41:12.710] some sources to fill in those gaps? And
[00:41:12.720] some sources to fill in those gaps? And it's really good at doing that as well.
[00:41:15.190] it's really good at doing that as well.
[00:41:15.200] it's really good at doing that as well. But returning back to our new financial
[00:41:18.470] But returning back to our new financial
[00:41:18.480] But returning back to our new financial family planning notebook, you can see
[00:41:20.870] family planning notebook, you can see
[00:41:20.880] family planning notebook, you can see here that it went out, did the research,
[00:41:23.109] here that it went out, did the research,
[00:41:23.119] here that it went out, did the research, and it found some things for us and
[00:41:25.109] and it found some things for us and
[00:41:25.119] and it found some things for us and actually broke it down into these

[00:41:26.550] actually broke it down into these
[00:41:26.560] actually broke it down into these different key themes. And here are the
[00:41:29.829] different key themes. And here are the
[00:41:29.839] different key themes. And here are the sources that it recommends importing. So
[00:41:32.790] sources that it recommends importing. So
[00:41:32.800] sources that it recommends importing. So if you want to import these, you can now
[00:41:34.470] if you want to import these, you can now
[00:41:34.480] if you want to import these, you can now click on import and those will be added
[00:41:36.790] click on import and those will be added
[00:41:36.800] click on import and those will be added here on the left. Since this is a family
[00:41:39.990] here on the left. Since this is a family
[00:41:40.000] here on the left. Since this is a family financial report notebook, I want to
[00:41:42.230] financial report notebook, I want to
[00:41:42.240] financial report notebook, I want to share this with other members of my
[00:41:43.910] share this with other members of my
[00:41:43.920] share this with other members of my family. To do that, you can click on the
[00:41:45.829] family. To do that, you can click on the
[00:41:45.839] family. To do that, you can click on the top right here where it says share and
[00:41:48.150] top right here where it says share and
[00:41:48.160] top right here where it says share and you can put in the other user's email
[00:41:50.390] you can put in the other user's email
[00:41:50.400] you can put in the other user's email address and they will have access to
[00:41:52.630] address and they will have access to
[00:41:52.640] address and they will have access to this notebook. You can change the access
[00:41:54.790] this notebook. You can change the access
[00:41:54.800] this notebook. You can change the access settings. So with this, it can be anyone
[00:41:57.430] settings. So with this, it can be anyone
[00:41:57.440] settings. So with this, it can be anyone with the that you put in here. That's
[00:41:59.430] with the that you put in here. That's
[00:41:59.440] with the that you put in here. That's what restricted means. Or you can change
[00:42:01.270] what restricted means. Or you can change
[00:42:01.280] what restricted means. Or you can change it to anyone with the link or you can
[00:42:03.109] it to anyone with the link or you can
[00:42:03.119] it to anyone with the link or you can make it public. Notebooks that you
[00:42:05.190] make it public. Notebooks that you
[00:42:05.200] make it public. Notebooks that you create inside of Gemini notebook don't
[00:42:07.750] create inside of Gemini notebook don't
[00:42:07.760] create inside of Gemini notebook don't just exist inside of Gemini notebook.
[00:42:10.150] just exist inside of Gemini notebook.
[00:42:10.160] just exist inside of Gemini notebook. You can also access them to some degree
[00:42:13.030] You can also access them to some degree
[00:42:13.040] You can also access them to some degree inside of Gemini directly. So here I've
[00:42:16.230] inside of Gemini directly. So here I've
[00:42:16.240] inside of Gemini directly. So here I've come over to gemini.google.com.
[00:42:18.230] come over to gemini.google.com.
[00:42:18.240] come over to gemini.google.com. This is Google Gemini. If you open up
[00:42:20.309] This is Google Gemini. If you open up
[00:42:20.319] This is Google Gemini. If you open up the sidebar, you'll see right here
[00:42:23.030] the sidebar, you'll see right here
[00:42:23.040] the sidebar, you'll see right here notebooks. And if I click on all
[00:42:24.870] notebooks. And if I click on all
[00:42:24.880] notebooks. And if I click on all notebooks, you can see all of my Gemini
[00:42:27.750] notebooks, you can see all of my Gemini
[00:42:27.760] notebooks, you can see all of my Gemini notebook notebooks. And here is the one
[00:42:30.069] notebook notebooks. And here is the one
[00:42:30.079] notebook notebooks. And here is the one that we created together about
[00:42:31.510] that we created together about
[00:42:31.520] that we created together about gardening. Here is the one with the
[00:42:33.589] gardening. Here is the one with the
[00:42:33.599] gardening. Here is the one with the family financial records. Let's look at
[00:42:35.829] family financial records. Let's look at
[00:42:35.839] family financial records. Let's look at the gardening one. I'll click on that.
[00:42:38.230] the gardening one. I'll click on that.
[00:42:38.240] the gardening one. I'll click on that. And you'll see right here the name of

[00:42:39.910] And you'll see right here the name of
[00:42:39.920] And you'll see right here the name of the notebook and I can see all the
[00:42:42.230] the notebook and I can see all the
[00:42:42.240] the notebook and I can see all the sources right here. I can even add new
[00:42:45.190] sources right here. I can even add new
[00:42:45.200] sources right here. I can even add new sources directly from Gemini. Closing
[00:42:47.910] sources directly from Gemini. Closing
[00:42:47.920] sources directly from Gemini. Closing this out, you'll then see the Gemini
[00:42:50.390] this out, you'll then see the Gemini
[00:42:50.400] this out, you'll then see the Gemini chat. This is very similar to how
[00:42:53.349] chat. This is very similar to how
[00:42:53.359] chat. This is very similar to how regular Gemini chat works, but it's
[00:42:55.829] regular Gemini chat works, but it's
[00:42:55.839] regular Gemini chat works, but it's going to have access to all of these
[00:42:57.670] going to have access to all of these
[00:42:57.680] going to have access to all of these sources, and it's going to prioritize
[00:43:00.069] sources, and it's going to prioritize
[00:43:00.079] sources, and it's going to prioritize these sources when answering your
[00:43:02.230] these sources when answering your
[00:43:02.240] these sources when answering your questions. So, if I were to ask the same
[00:43:04.950] questions. So, if I were to ask the same
[00:43:04.960] questions. So, if I were to ask the same question with regular Gemini Chat or
[00:43:07.589] question with regular Gemini Chat or
[00:43:07.599] question with regular Gemini Chat or with Gemini Chat inside the notebook,
[00:43:09.270] with Gemini Chat inside the notebook,
[00:43:09.280] with Gemini Chat inside the notebook, I'm going to get slightly different
[00:43:10.710] I'm going to get slightly different
[00:43:10.720] I'm going to get slightly different answers. If you click on the three dots
[00:43:13.030] answers. If you click on the three dots
[00:43:13.040] answers. If you click on the three dots on the top right, you can find your
[00:43:14.710] on the top right, you can find your
[00:43:14.720] on the top right, you can find your notebook settings. There's not much in
[00:43:17.190] notebook settings. There's not much in
[00:43:17.200] notebook settings. There's not much in here, but what I want to point out is
[00:43:18.710] here, but what I want to point out is
[00:43:18.720] here, but what I want to point out is that you can use notebook memory. With
[00:43:21.349] that you can use notebook memory. With
[00:43:21.359] that you can use notebook memory. With this toggled on, then anytime you start
[00:43:24.230] this toggled on, then anytime you start
[00:43:24.240] this toggled on, then anytime you start a chat from within this notebook, it
[00:43:26.470] a chat from within this notebook, it
[00:43:26.480] a chat from within this notebook, it will remember the prior chats from this
[00:43:29.190] will remember the prior chats from this
[00:43:29.200] will remember the prior chats from this notebook. Let me start a few chats and
[00:43:31.349] notebook. Let me start a few chats and
[00:43:31.359] notebook. Let me start a few chats and show you an example. So, I'll ask it,
[00:43:33.829] show you an example. So, I'll ask it,
[00:43:33.839] show you an example. So, I'll ask it, can I grow any fruit in Colorado? So,
[00:43:36.230] can I grow any fruit in Colorado? So,
[00:43:36.240] can I grow any fruit in Colorado? So, here is the answer that it's giving me.
[00:43:38.790] here is the answer that it's giving me.
[00:43:38.800] here is the answer that it's giving me. And now, if I return back to that
[00:43:40.630] And now, if I return back to that
[00:43:40.640] And now, if I return back to that notebook, which you can see right here,
[00:43:43.270] notebook, which you can see right here,
[00:43:43.280] notebook, which you can see right here, then down here we can see the past
[00:43:45.109] then down here we can see the past
[00:43:45.119] then down here we can see the past chats. And you see that chat that I just
[00:43:47.910] chats. And you see that chat that I just
[00:43:47.920] chats. And you see that chat that I just started. So, inside of Gemini, notebooks
[00:43:51.349] started. So, inside of Gemini, notebooks
[00:43:51.359] started. So, inside of Gemini, notebooks are in part a folder system. It will
[00:43:54.470] are in part a folder system. It will
[00:43:54.480] are in part a folder system. It will organize all of your chats to keep them

[00:43:57.349] organize all of your chats to keep them
[00:43:57.359] organize all of your chats to keep them nice and tidy, and you'll know and be
[00:43:59.589] nice and tidy, and you'll know and be
[00:43:59.599] nice and tidy, and you'll know and be able to return back to them pretty
[00:44:01.270] able to return back to them pretty
[00:44:01.280] able to return back to them pretty easily. Another interesting feature
[00:44:03.910] easily. Another interesting feature
[00:44:03.920] easily. Another interesting feature about this is that if we now return back
[00:44:06.230] about this is that if we now return back
[00:44:06.240] about this is that if we now return back to Gemini notebook and I come over to
[00:44:09.670] to Gemini notebook and I come over to
[00:44:09.680] to Gemini notebook and I come over to that notebook, you'll now see as a
[00:44:12.309] that notebook, you'll now see as a
[00:44:12.319] that notebook, you'll now see as a source on the side the chats from
[00:44:14.630] source on the side the chats from
[00:44:14.640] source on the side the chats from Gemini. And if I open this up, I can see
[00:44:18.710] Gemini. And if I open this up, I can see
[00:44:18.720] Gemini. And if I open this up, I can see all the chats that I started in Gemini.
[00:44:21.910] all the chats that I started in Gemini.
[00:44:21.920] all the chats that I started in Gemini. In this case, it's only one. So, it goes
[00:44:24.550] In this case, it's only one. So, it goes
[00:44:24.560] In this case, it's only one. So, it goes both way. Gemini can pull the
[00:44:27.589] both way. Gemini can pull the
[00:44:27.599] both way. Gemini can pull the information from Gemini notebook and
[00:44:30.470] information from Gemini notebook and
[00:44:30.480] information from Gemini notebook and Gemini notebook can pull the chats from
[00:44:32.710] Gemini notebook can pull the chats from
[00:44:32.720] Gemini notebook can pull the chats from Gemini as long as it was started from
[00:44:34.870] Gemini as long as it was started from
[00:44:34.880] Gemini as long as it was started from within the notebook in Gemini. So that
[00:44:37.030] within the notebook in Gemini. So that
[00:44:37.040] within the notebook in Gemini. So that is literally everything you can do with
[00:44:38.790] is literally everything you can do with
[00:44:38.800] is literally everything you can do with Gemini notebook. You now know how to
[00:44:40.870] Gemini notebook. You now know how to
[00:44:40.880] Gemini notebook. You now know how to create notebooks, fill them with the
[00:44:42.550] create notebooks, fill them with the
[00:44:42.560] create notebooks, fill them with the right sources, create infographics,
[00:44:44.390] right sources, create infographics,
[00:44:44.400] right sources, create infographics, slide decks, and audio overviews, and
[00:44:46.630] slide decks, and audio overviews, and
[00:44:46.640] slide decks, and audio overviews, and how to use this more advanced
[00:44:47.990] how to use this more advanced
[00:44:48.000] how to use this more advanced capabilities. If you made it this far,
[00:44:50.390] capabilities. If you made it this far,
[00:44:50.400] capabilities. If you made it this far, I'm willing to bet that you got some
[00:44:52.309] I'm willing to bet that you got some
[00:44:52.319] I'm willing to bet that you got some value out of this video. If you did,
[00:44:54.309] value out of this video. If you did,
[00:44:54.319] value out of this video. If you did, again, the best way to show your
[00:44:55.910] again, the best way to show your
[00:44:55.920] again, the best way to show your appreciation is to give this video a
[00:44:57.750] appreciation is to give this video a
[00:44:57.760] appreciation is to give this video a thumbs up and to leave a comment. But if
[00:45:00.150] thumbs up and to leave a comment. But if
[00:45:00.160] thumbs up and to leave a comment. But if you're not done learning about how to
[00:45:01.589] you're not done learning about how to
[00:45:01.599] you're not done learning about how to use AI, then check out this video right
[00:45:04.069] use AI, then check out this video right
